I. BACKGROUND

A. The United States of America ("United States"), on behalf of the Administrator of the United States Environmental Protection Agency ("EPA"), filed a complaint in this matter pursuant to Sections 106 and 107 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA"), 42 U.S.C. §§ 9606 and 9607.

B. As a result of the release or threatened release of hazardous substances, EPA has undertaken response actions at or in connection with the Site under Section 104 of CERCLA, 42 U.S.C. § 9604, and will undertake response actions in the future. In performing these response actions, EPA has incurred and will continue to incur response costs at or in connection with the Site.

C. The United States in its complaint seeks, inter alia: (1) reimbursement of costs incurred and to be incurred by EPA and the Department of Justice for response actions at the Bennington Landfill Superfund Site in Bennington, Vermont ("Site"), together with accrued interest; and (2) performance of response work by the defendants at the Site consistent with the National Contingency Plan, 40 C.F.R. Part 300 (as amended) ("NCP").

D. The State of Vermont also has filed a complaint against the defendants in this Court alleging that the defendants are liable to the State under Section 107 of CERCLA, 42 U.S.C. § 9607, and 10 Vt.Stat.Ann. Ch. 159, § 6615.

E. In accordance with the NCP and Section 121(f)(1)(F) of CERCLA, 42 U.S.C. § 9621(f)(1)(F), EPA notified the State of Vermont (the "State") on July 24, 1995, of negotiations with potentially responsible parties regarding the implementation of the non-time critical removal action ("NTCRA") for the Site, and EPA has provided the State with an opportunity to participate in such negotiations and be a party to this Consent Decree.

F. In accordance with Section 122(j)(1) of CERCLA, 42 U.S.C. § 9622(j)(1), EPA notified the federal natural resource trustee(s) on July 20, 1995, of negotiations with potentially responsible parties regarding the release of hazardous substances that may have resulted in injury to the natural resources under Federal trusteeship and encouraged the trustee(s) to participate in the negotiation of this Consent Decree.

G. Pursuant to Section 105 of CERCLA, 42 U.S.C. § 9605, EPA placed the Site on the National Priorities List, set forth at 40 C.F.R. Part 300, Appendix B, by publication in the Federal Register on March 31, 1989, 54 Fed. Reg. 13,295.

H. In response to a release or a substantial threat of a release of a hazardous substance(s) at or from the Site, 12 Potentially Responsible Parties ("PRPs") commenced in June 1991, a Remedial Investigation and Feasibility Study ("RI/FS") under EPA oversight, pursuant to two Administrative Orders by Consent, EPA Docket Nos. CERCLA I-91-1093 and CERCLA I-91-1094, for the Site pursuant to 40 C.F.R. § 300.430.

I. Based upon the preliminary results of the RI/FS, the EPA required the parties to the RI/FS Administrative Orders to prepare an engineering evaluation and cost analysis ("EE/CA"). EPA signed an approval memorandum for the EE/CA in May 1994. Based upon the EE/CA, the public was provided the opportunity to comment on a proposed NTCRA for the Site. EPA held a 45-day public comment period and a transcribed public hearing was held on September 13, 1994. After consideration of the comments received, EPA signed and issued an Action Memorandum on December 23, 1994, selecting the proposed alternative as the NTCRA. Before EPA signed the Action Memorandum, the State had a reasonable opportunity

to review and comment on the decision. The NTCRA authorized the following response actions at the Site: (1) construction of a composite barrier low permeability cap; (2) excavation, from the drainage pond and underdrain discharge pipe, of those contaminated soils and sediments which exceed the action levels; (3) consolidation, in the existing landfill, of such contaminated soils and sediments; (4) gas management; (5) isolation of the upgradient groundwater from the landfill; (6) monitoring; and (7) post-removal site control of the completed NTCRA.

J. On August 18, 1997, the United States District Court for the District of Vermont entered a Consent Decree (the "1997 Decree"), to which the United States, the State of Vermont, and 19 defendants were parties. The 1997 Decree required five PRPs to implement the NTCRA at the Site and to implement a wetlands restoration project on a parcel of property owned by the Town of Bennington. The 1997 Decree also provided for 14 of the 19 PRPs collectively to pay \$1.8 million and provided them with a *de minimis* release. Four parties, Bennington Potters, Inc., EHH Realty Corporation, Graphitek of Vermont, Inc., and Lauzon Machine & Engineering, Inc., were not parties to the 1997 Decree, and now seek to resolve their alleged liability at the Site.

K. The Regional Administrator of EPA, Region I, or his delegate, has determined the following: (1) prompt settlement with each Settling Defendant is practicable and in the public interest within the meaning of Section 122(g)(1) of CERCLA, 42 U.S.C. § 9622(g)(1); (2) the payment to be made by each Settling Defendant under this Consent Decree involves only a minor portion of the response costs at the Site within the meaning of Section 122(g)(1) of CERCLA, 42 U.S.C. § 9622(g)(1), based upon EPA's estimate that the total response costs incurred and to be incurred at or in connection with the Site by the EPA Hazardous Substance Superfund and by private parties is between \$10 million and \$15 million; and, (3) the amount, if any, of hazardous substances contributed to the Site by each Settling De Minimis Defendant and the toxic or other hazardous effects of the hazardous substance contributed to the Site by each Settling Defendant are minimal in comparison to other hazardous substances at the Site within the meaning of Section 122(g)(1)(A) of CERCLA, 42 U.S.C. § 9622(g)(1)(A). The amount of hazardous substances contributed to the Site by each Settling Defendant does not exceed 1.5% of the hazardous substances at the Site and the hazardous substances, if any, contributed by each Settling Defendant to the Site are not significantly more toxic or of significantly greater hazardous effect than other hazardous substances at the Site.

L. The United States Department of Interior ("DOI") has identified and prepared a preliminary evaluation of potential damages relating to possible injury to, destruction of, or loss of natural resources under its trusteeship in connection with the Site.

M. Solely for the purposes of Section 113(j) of CERCLA, the NTCRA selected by the Action Memorandum and the work to be performed by the Performing Settling Defendants under the 1997 Decree shall constitute a response action taken or ordered by the President.

N. The Parties recognize, and the Court by entering this Consent Decree finds, that this Consent Decree has been negotiated by the Parties in good faith and implementation of this Consent Decree will expedite the cleanup of the Site and will avoid prolonged and complicated litigation between the Parties, and that this Consent Decree is fair, reasonable, and in the public interest.

O. The Settling Defendants do not admit any liability to Plaintiffs arising out of the transactions or occurrences alleged in the complaints.

P. The United States, the State of Vermont and Settling Defendants agree that settlement without further litigation and without the admission or adjudication of any issue of fact or law is the most appropriate means of resolving this action with respect to Settling Defendants.

THEREFORE, with the consent of the Parties to this Consent Decree, it is ORDERED, ADJUDGED, and DECREED:

II. JURISDICTION

1. This Court has jurisdiction over the subject matter of this action pursuant to 28 U.S.C. §§ 1331 and 1345, and 42 U.S.C. §§ 9606, 9607, and 9613(b). Settling Defendants shall not challenge the terms of this Consent Decree or this Court's jurisdiction to enter and enforce this Consent Decree. The complaints state claims upon which relief may be granted.

 - b. To simplify any remaining administrative and judicial enforcement activities concerning the Site by eliminating a number of potentially responsible parties from further involvement at the Site; and
 - c. To obtain settlement with Settling Defendants for their fair share of response costs incurred and to be incurred at or in connection with the Site by the EPA Hazardous Substance Superfund and by private parties and to provide for full and complete contribution protection for Settling Defendants with regard to the Site pursuant to Sections 113(f)(2) and 122(g)(5) of CERCLA, 42 U.S.C. §§ 9613(f)(2) and 9622(g)(5).
