Disclaimers

Please read the following disclaimers, which apply to all material contained in this publication, before using it. The material in this publication is provided subject to the reader having read the following disclaimers.

(1) The material contained in each “One-Page Summary” and the “Local Counsel Explanatory Notes” section of this publication has not been provided by Pillsbury Winthrop Shaw Pittman LLP (“Pillsbury”) unless otherwise stated. Instead, it has been provided by the law firm(s) and the person(s) / contributor(s) indicated in such summary or notes.

(2) This publication is issued to inform Pillsbury clients and other interested parties of the current legal climate in certain countries and jurisdictions that may be of interest to them in relation to aircraft, and no other use of this publication or the material contained in this publication is permitted. The material contained herein does not constitute the legal opinion, business advice or other advice of Pillsbury, any other law firm or any person(s) or contributor(s) identified in this publication. The material contained in this publication is not, and should not be regarded as, a substitute for legal or business advice under any circumstance.

(3) No reader may rely on this publication or the material contained herein as any form of legal, business or other advice or opinion. Each of the executive editors, the general editor, each of the co-editors, Pillsbury, each of the contributing author(s) and each of their respective law firms, and each other contributor to this publication expressly disclaims all liability to any person with respect to anything done or omitted to be done, and with respect to the consequences of anything done or omitted to be done, wholly or partly in reliance upon the whole or any part of the material contained in this publication.

(4) The material provided in this publication is general and may not apply in a specific situation. Subject to the foregoing, material provided in this publication provides a general estimate and preliminary indication only as to the current legal climate in relation to repossessing, deregistering and exporting aircraft from the country and jurisdiction(s) indicated, based on information received from local counsel in such country and/or jurisdiction as of the date indicated. The actual likelihood of success for any specific set of circumstances will depend on the particular facts and parties involved. Readers must obtain actual and up-to-date legal and other professional advice in the relevant jurisdiction(s) with respect to any specific situation that may relate to material provided in this publication.

(5) The material provided in this publication does not represent an exhaustive analysis of all legal issues in the country and/or jurisdiction(s) indicated relevant to financing, leasing, repossessing, registering and deregistering and/or exporting aircraft in or from such country and/or jurisdiction. There are relevant issues not addressed herein and further legal, business and other professional advice in the relevant country and/or jurisdiction(s) should be sought.

Appendix: 30-Minute (Check-Box) Jurisdictional Questionnaire
Preface

World Aircraft Repossession Index
Third Edition

Pillsbury Winthrop Shaw Pittman LLP is pleased to publish this Third Edition of the World Aircraft Repossession Index.

This Third Edition builds on the success of our Second Edition and covers 31 “new” jurisdictions. In this edition we analyze a total of 102 popular jurisdictions worldwide in which aircraft are registered and operate. Utilizing seven primary criteria and a proprietary scoring methodology, this Third Edition synthesizes expert analysis provided by reputable local counsel and select data obtained from other third-party sources to numerically score the legal environment in each jurisdiction with respect to repossessing and exporting aircraft assets.

The attorneys in Pillsbury’s global Asset Finance team are well aware of the challenges inherent in leasing and financing aircraft in jurisdictions around the globe. When doing business in any location, it is advisable to understand the local issues that may affect your investment. Prudent lessors and financiers of aircraft should know in advance what issues they might encounter in the event they need to repossess their aircraft. Analyzing jurisdictional questionnaires from local counsel is often an important part of this educational process. However, reviewing narrative responses contained in traditional jurisdictional questionnaires and comparing them across various jurisdictions can be time consuming and costly. This publication represents a refinement of this process and serves as a desk-top resource. By utilizing an objective scoring methodology we highlight key challenges within, and differences among, jurisdictions.

The foundation of the World Aircraft Repossession index is Pillsbury’s unique “check-box” jurisdictional questionnaire, the form of which can be found in the Appendix. In addition to a one-page summary for each jurisdiction, the results of our analysis are represented in a global rankings chart and a world map, indicating the comparative ranking that each jurisdiction has achieved.

The Pillsbury team has been delighted to discuss the World Aircraft Repossession Index at numerous public events and private meetings around the world including those hosted by the American Bar Association, Aviation Working Group, Euromoney, Ishka and ISTAT. The overwhelmingly positive feedback we have received is an endorsement of our methodology and the hours of work devoted to this publication by each local counsel participant and the Pillsbury team. In addition, we have found that the World Aircraft Repossession Index has proven to be a welcome addition to the tools available to industry participants, particularly leasing companies and financial institutions, for analyzing jurisdictions at every stage of a transaction.

Please read the disclaimer on page 2 before using any of the information contained in this publication.

We gratefully acknowledge and would like to thank all of the local counsel contributors in each jurisdiction, as well as each of our third-party data providers, for dedicating their time and data, free of charge, to make this publication possible. Special thanks to Ms. Crystal Siu, a highly experienced transaction manager and prized Asset Finance team member, whose contributions to this publication were essential. We are most grateful to Ms. Sarah Humpleby, formerly of Pillsbury, who served as a co-editor of the Second Edition and who made a significant contribution to this Third Edition. We would also like to give due recognition to Mr. Dominic Pearson, formerly of Pillsbury, who created the World Aircraft Repossession Index and served as the general editor of the First Edition. Many thanks to you all!

About the Editors

Mark N. Lessard, Partner and Global Head, Finance
Mark Lessard is a partner in the New York office and global head of Pillsbury's finance practice, primarily representing clients who are active in the Aviation, Aerospace and Transportation sectors. Mr. Lessard represents a worldwide clientele of lenders, lessors, investors, operators, underwriters, liquidity providers, manufacturers, rating agencies and trustees in connection with all forms of transportation asset-backed financings. Mr. Lessard has particular experience in cross-border transactions, having placed, financed or repossessed aviation assets in dozens of jurisdictions around the world. He has been an active member of the Legal Advisory Panel to the Aviation Working Group since 2012, at the forefront of the adoption and implementation of the Cape Town Convention on International Interests in Mobile Equipment. Mr. Lessard has been recognized with the following awards: Acritas Star (2018); Lexology and the International Law Office's “Client Choice Award” for Asset Finance in New York (2018); Overall Debt Deal of the Year, Airline Economics (2018); Chambers USA, Aviation Finance—National (2009-Present); Chambers Global—Aviation Finance, Legal 500 US, Asset Finance and Leasing (2010, 2013-2016); International Who's Who of Aviation Lawyers (2010-2013); and Guide to the World's Leading Aviation Lawyers, Euromoney/Legal Media Group (2013).

Paul P. Jebely, Partner and Co-Leader, Asset Finance
Paul Jebely is the managing partner of Pillsbury's Hong Kong office and co-leader of the firm's Asset Finance practice. Recognized as a leading aviation lawyer, Mr. Jebely advises on billions of dollars' worth of commercial and business aircraft finance transactions, leasing and trading transactions and enforcement and repossession situations.

Mr. Jebely has been repeatedly recognized by Chambers, Legal 500 and Who's Who as a “very highly rated” leading individual in aviation finance and has been singled out in Chambers as ”extremely competent,” “commercially aware,” “responsive,” “courteous,” “technically skilled,” “capable,” “attentive” and “driven.” He has been quoted by the Financial Times, the Wall Street Journal, Bloomberg, the China Business Network and various industry publications on the basis of his experience in the aviation markets in Asia and Africa in particular. He was the 2015 recipient of the “Outstanding Contribution to African Aviation Development” award—the only lawyer to receive the award since its inception in 1999, and was recognized by Asian Legal Business in October 2016 among “Asia 40 Under 40” top “brightest legal minds in the region.” Mr. Jebely has earned a Band 1 ranking globally in Chambers High Net Worth for private aircraft-related legal counsel in 2018. Sources have noted that “he is one of the best lawyers [they] have ever met in [their] life, in terms of professionalism and knowledge in the field and patience explaining everything.”

Jonathan C. Goldstein, Partner, Asset Finance
Jonathan Goldstein is a Pillsbury Finance partner based in the New York office whose transactions have won several awards, including Airfinance Journal’s “Deal of the Year.” He has also been recognized by The Legal 500 US in Structured Finance and as a “Leading Lawyer and Rising Star” by Airfinance Journal and IFLR 1000. He also was a team member on Airfinance Journal 2016 Editor’s Deal of the Year for his contribution on the Labrador ABS transaction. Mr. Goldstein represents sponsors, lenders, hedge funds, commercial banks and leasing companies in connection with a broad spectrum of international financial and corporate transactions. He advises clients on public offerings and private placement of securities (equipment notes and portfolio securitizations), acquisitions, leveraged leasing, secured and unsecured lending, structured financings, syndicated credit facilities, pre-delivery payment and warehouse facilities. Mr. Goldstein's practice also addresses simple and complex bank loans, mergers and acquisitions, leverage financings, joint ventures, sale/resale transactions and bankruptcy workouts.
Jason P. Greenberg, Special Counsel, Asset Finance

Jason Greenberg is a special counsel in the law firm's Finance practice and is located in the Los Angeles office. His practice focuses on equipment finance and leasing, and he specializes in cross-border secured lending as well as commercial aircraft and private jet transactions. He has significant experience representing leasing companies, financial institutions, lessees/operators, trustees and rating agencies in all types of financing, acquisition, sale and leasing transactions. He helps manage a team of lawyers and paraprofessionals located in Los Angeles and in the Firm's other offices around the globe to efficiently negotiate and close complex transactions involving assets wherever they may be located. Prior to joining Pillsbury, Mr. Greenberg worked at two global top-10 commercial aircraft lessors and in the aviation finance practice of a major international law firm.

Richard J. Evans, Counsel, Asset Finance

Richard Evans is a counsel in the law firm’s Finance practice and is located in the Los Angeles office. He is dual-qualified as an attorney in California and a solicitor of England & Wales and focuses on finance and leasing transactions involving commercial aircraft and private jets.

Mr. Evans’ notable commercial leasing clients include Aergen, AerCap, Air Lease Corporation, Aviation Capital Group, BBAM, Cusco Aviation, FPG Amentum, Jackson Square Aviation (JSA), Orix Aviation, Sky Leasing and Wings Capital Partners. In addition to his private practice experience, he was interim general counsel at JSA, a consultant at a startup aircraft leasing company, and in-house counsel at Airbus Group. His broad asset finance experience and connections to high net worth individuals on the West Coast and aviation industry players worldwide make him ideally-placed to coordinate and deliver the firm’s expertise to private aviation clients in a wide range of practice areas, including: asset finance, employment, estates trusts & tax planning, executive benefits and regulatory.

Sharon Nourani, Associate, Asset Finance

Sharon Nourani is an associate in the law firm’s Asset Finance practice and is located in the Hong Kong office. Qualified as a solicitor of England & Wales, Ms. Nourani has closed over one hundred aircraft financing transactions, advising clients that represent the full range of industry participants in matters concerning all classes of commercial and business aircraft. She is experienced in negotiating and executing international aircraft and engine financing, leasing and trading transactions, including pre-delivery payment financings, sale and leasebacks and secured loan transactions.

Ms. Nourani speaks regularly at client briefings and industry conferences on trends in aviation finance, most recently at the AirFinance Journal’s Africa 2018 Conference in Johannesburg.

Abigail Carter, Associate, Asset Finance

Abigail Carter is an associate based in Pillsbury’s London office, focusing on aviation finance. She is experienced in acting on a range of cross-border aircraft finance transactions such as leasing, secured loan transactions and sale and acquisition transactions and related novations. Recently, Ms. Carter acted for Oaktree Capital and World Star Aviation on the purchase and financing of 18 aircraft, which was awarded the Airline Economics Overall Debt Deal of the Year 2018. Prior to joining Pillsbury, she completed a six month secondment to Singapore focusing on aviation finance transactions.
About Pillsbury

Pillsbury’s global Asset Finance practice is a leader in the field of structuring, negotiating and closing transactions for transportation assets, with particular emphasis on aircraft and other aviation equipment. For more than 65 years, we have been representing some of the most active international participants in the financing of transportation assets, including major banks, leasing companies, airlines, investors, traders and manufacturers.

Since 2000, Pillsbury attorneys have assisted their clients in the financing or refinancing of more than a thousand commercial and corporate jet aircraft with an aggregate value of more than $40 billion—and in the financing or refinancing of more than 400 spare aircraft engines with an aggregate value of more than $2.5 billion. We have had important roles in all of the US, and many foreign, airline bankruptcies and restructurings and work closely with lawyers in our restructuring group on these matters. Our team also has significant experience with railroad rolling stock, locomotives, ships, containers and fleets of land-based vehicles, as well as other capital assets financed with similar techniques, such as floating drilling rigs, satellites, telecommunications and manufacturing equipment. In recent years we have successfully negotiated and documented Ex-Im Bank-supported financings for equipment valued at more than $4 billion. We have also dealt with other export credit agencies and government-supported programs, such as Japan Eximbank, ECGD, COFACE and HERMES, as well as transactions involving the latest financing structures including those involving JOLCOs and AFIC support.

Pillsbury’s Asset Finance team includes attorneys in our New York, London, Hong Kong, Tokyo, Los Angeles, San Francisco and Washington D.C. offices who are supported by leading practitioners in related fields such as taxation, aviation regulatory, restructuring, capital markets, mergers and acquisitions, international trade and licensing, corporate aviation, insurance, accident investigations and litigation. Our team has extensive experience with cross-border financings of transportation assets located and operated throughout the world and often handles large scale transactions involving multiple jurisdictions. Our offices and network of local law firms stand ready to assist our clients any place, any time. This broad-based, integrated approach allows us to offer a full range of legal services to all industry participants.

Our Asset Finance attorneys are well-known in the industry for their contributions to the state of the art, whether it is completing novel transactions, publishing articles on new financing techniques, sitting on standard-setting committees or speaking at some of the many conferences, seminars, workshops and other events organized for the asset finance community. These contributions are consistently recognized by industry observers, including the prestigious Chambers, which has named us one of the leading aviation finance firms in the world. We have also recently received awards and accolades for our legal work from *Jane’s Transport Finance, AirFinance Journal, Global Trade Review* and *Trade Finance*.

Methodology and Interpretation of Results

Creating an index of this sort poses two big challenges. Firstly, in order to allow quantitative-based scoring, the jurisdictional questionnaire must be crafted in a way that allows the questions to be efficiently and comfortably answered by local counsel in a closed-ended fashion without qualification; that is, by selecting an answer from a pre-defined set of responses (such as “Yes” or “No”). Secondly, having boxed-in those answers so as to allow for scoring, careful consideration needs then to be given to how the jurisdiction may be scored in a meaningful and useful manner. The first of these challenges has been accomplished by the creation of what we have called the “30-Minute (Check-Box) Jurisdictional Questionnaire”. The second of these challenges has been accomplished by generating a simple but effective weighted scoring mechanism. You should read this section to understand better what the results contained in the one-page summaries mean, and how to interpret them.

The Pillsbury World Aircraft Repossession Index measures the legal environment for aircraft repossessions in each country or jurisdiction using seven factors (repossession, insolvency, deregistration, export, judgments and arbitral awards, preferential liens and political stability). Each factor is assigned a weighting in accordance with its relative importance, with each factor’s score and its weighting being used to calculate the overall score for the country or jurisdiction. Each factor’s score is determined according to several sub-factors comprising either: (a) the questions asked in the jurisdictional questionnaire, or (b) certain other information about the jurisdiction collected from external sources. A summary of each of the seven factors and their component sub-factors is presented in the Table on the next page and described in detail in the commentary below.

Overall Score and Recoverability Category. The overall score for each jurisdiction is expressed near the top of the page of each one-page summary. A score of 0% represents the poorest possible score and the lowest rating in terms of asset recoverability. In contrast, a score of 100% represents the best possible score and the highest rating in terms of asset recoverability. Additionally, each jurisdiction has been assigned a broader asset recoverability rating or category as follows: those jurisdictions whose overall score was 75% or higher have been assigned a “LOWER RISK” asset recoverability rating; those jurisdictions whose overall score was 50% or higher, but less than 75%, have been assigned a “MODERATE” asset recoverability rating; and finally those jurisdictions whose overall score was less than 50% have been assigned a “HIGHER RISK” asset recoverability rating.

World Map. On page 21 we have summarized the overall scores and asset recoverability ratings of each jurisdiction in the form of a world map. The green, yellow and red colorings represent jurisdictions whose asset recoverability ratings are “LOWER”, “MODERATE” and “HIGHER” respectively, with the finer gradient of the color indicating whether the jurisdiction sits at the top, middle of bottom of the range for that category of risk.

30-Minute (Check-Box) Jurisdictional Questionnaire. For each country or jurisdiction covered in this index, a reputable local counsel completed a 30-Minute (Check-Box) Jurisdictional Questionnaire. A copy of the pro-forma jurisdictional questionnaire is provided in the Appendix on page 222. The completed questionnaires provided the majority of the information used to score the jurisdictions. However, the Political Stability factor was determined using information collected from other third-party sources.

Aircraft Registration. In the 30-Minute (Check-Box) Jurisdictional Questionnaire, we asked local counsel to answer questions relating to the registration of the aircraft on the country’s aircraft register. While this information is not scored (as it is the characteristics of deregistration of the aircraft, not registration, that is most relevant), it serves two purposes which we hope will be of use to readers.

Firstly, it is informative in respect of whose name the aircraft may be registered in that jurisdiction and whether the interests of the owner and mortgagee may also be noted, either on the aircraft register, the certificate of registration or on some other public register. It is also informative in respect of the existence of any delegation arrangements with other countries, such as 83bis delegation agreements pursuant
to Article 83bis of the Chicago Convention,\(^1\) such that an aircraft operating and habitually based in that country may be registered in another country.

Secondly, because delegation arrangements allow operating lessors and financiers to mitigate against the adverse effects of the local aircraft registration (and deregistration) rules by allowing an aircraft to be registered in another country, this has allowed us to blend the deregistration score of such other country with the scores of each of the remaining factors for the country in which the aircraft is habitually based. This blended score thus more accurately reflects the total aircraft repossession risk, and is presented in the one-page summary.

### Repossession by Owner-Lessor or by Mortgagee?
We have designed the questions in the 30-Minute (Check-Box) Jurisdictional Questionnaire in a manner that contemplates both repossession of an aircraft from a defaulting lessee under an aircraft lease, as well as repossession by a “mortgagee” from a defaulting owner-debtor. The phrase “mortgagee” when used in this publication and in the jurisdictional questionnaire means a person who has a first priority security interest in the aircraft, and includes a person in the equivalent position to a mortgagee under applicable local law, such as a “pledgee”, or a “chargee” holding an “international interest” in the airframe and aircraft engines pursuant to the Cape Town Convention.\(^2\)

#### Factor 1: Repossession (weighting: 22.5%).
This factor evaluates the owner-lessee or mortgagee’s theoretical ability to repossess the aircraft in a cost effective and timely manner. This factor comprises the following sub-factors:

- **Self-help remedies.** Credit was given if the local jurisdiction allows the owner-lessee or mortgagee to exercise so-called self-help remedies. “Self-help” means that the laws of the local jurisdiction permit an owner-lessee or mortgagee, as applicable, to repossess the aircraft from an uncooperative lessee (or debtor) without the need to obtain a court order, provided that it does so peaceably, without using force or the threat of force.

- **Requirement for a deposit, bond or other security in judicial proceedings.** Credit was given if the courts of the jurisdiction do not typically require the owner-lessee or mortgagee, as a condition to obtaining a judicial order for repossession of the aircraft, to deposit a bond or other guarantee with the court.

- **Repossession taxes and fees.** Credit was given if there are no significant fees or taxes payable in order for the owner-lessee or mortgagee to obtain a judicial order for repossession.

---

\(^1\) The Convention on International Civil Aviation, signed at Chicago, on 7 December 1944.

of the aircraft. An example of such a tax might include a stamp tax payable as a condition to admitting documents in evidence for the purposes of repossession proceedings (where self-help remedies are not available). We left it to local counsel to determine, using their professional judgement, whether they thought any such fees were significant; however, we indicated that “significant” fees or taxes would include any fees or taxes assessed on a percentage basis against the value of the aircraft or the sum secured by a mortgage, etc., but might exclude nominal fees or nominal taxes amounting to less than US$1,000 or its equivalent in the local currency of the jurisdiction.

**Speed of repossession.** We asked local counsel to estimate, on the balance of probabilities, how quickly a court order may be obtained for repossession of an aircraft, following commencement of judicial proceedings, given a choice of four bands: (a) less than or equal to 60 days; (b) more than 60 days but less than or equal to 180 days; (c) more than 180 days but less than or equal to one year; or (d) more than one year. Greater credit was given to the faster bands. In estimating the speed with which such order could be obtained, we asked local counsel to ignore any self-help remedies that may be available as an alternative means of repossession. We also asked local counsel to assume that:

1. the mortgagee or the owner-lessee is ultimately successful;
2. the proceedings are contested by the lessee (or an insolvency practitioner or bankruptcy trustee on its behalf), but are otherwise not contested by any competing creditor;
3. where judicial proceedings are instigated by the mortgagee, it has the cooperation of the owner-lessee;
4. there is already either an English or New York judgment or an arbitration award ordering repossession (and that local counsel should select the answer that represents the quickest of either litigating afresh on the merits or enforcing such judgment or award);
5. the lessee is insolvent at the time the proceedings are instituted; and
6. the proceedings may either be for a preliminary (i.e. interim) or a final order, whichever can be obtained the quickest in the local jurisdiction.

**Legal cost of repossession.** We also asked local counsel to estimate, on the balance of probabilities, the legal costs of obtaining a court order for repossession of an aircraft, following commencement of judicial proceedings, given a choice of four bands: (a) less than or equal to US$50,000; (b) more than US$50,000 but less than or equal to US$250,000; (c) more than US$250,000 but less than or equal to US$1,000,000; or (d) more than US$1,000,000. Greater credit was given to the less costly bands. We asked local counsel to make an equivalent set of assumptions as they made when answering the speed of repossession question. In addition, we also indicated to local counsel that their estimate should be inclusive of all court and lawyer fees incurred by the owner-lessee or mortgagee, but should disregard any amounts that represent any potential recovery of those costs.

**ASU Cape Town Discount or Qualifying OECD Status.** Bonus credit was given if either or both of the following apply: (1) as of August 30, 2018, the country qualifies for the OECD’s Aircraft Sector Understanding Cape Town Discount (www.oecd.org/tad/xcred/ctc.htm); and/or (2) as of June 25, 2018 the country is an OECD “high-income” or “zero-rated” country (www.oecd.org/tad/xcred/cre-crc-current-english.pdf), with an investment grade sovereign credit rating, according to Standard & Poor’s (or where a Standard & Poor’s rating is not available, according to Moody’s, if available).

**Factor 2: Insolvency (weighting: 12.5%).** This factor evaluates the friendliness of the jurisdiction’s insolvency laws from a creditor’s perspective. This factor comprises the following sub-factors:

**Sophistication of insolvency laws.** Credit was given where local counsel was of the opinion that the jurisdiction’s insolvency laws were moderately or well developed. We asked local counsel to restrict their analysis to insolvency law as it relates to the rights of a mortgagee (as a creditor) and an owner-lessee (as a creditor/owner) and to take into account both the frequency, volume and history of case law and any applicable legal commentary on the subject, as well as the sophistication of the applicable statutes.

**Insolvency moratorium.** We asked local counsel to indicate, under the mandatorily applicable laws of the local jurisdiction, the period during which a moratorium may be imposed in the event of a lessee (or debtor) insolvency / bankruptcy which adversely affects the rights of the owner-lessee (or mortgagee) to repossess an aircraft on termination of the leasing of the aircraft or enforcement of the mortgage. A choice of four bands was given: (a) less than or equal to 60 days; (b) more than 60 days but less than or equal to 180 days; (c) more than 180 days but less than or equal to one year; or (d) more than one year or variable. We asked local counsel to assume that the lessee (or debtor) entity is subject to the mandatorily applicable insolvency / bankruptcy laws of the local jurisdiction. In circumstances where, under the law of the local jurisdiction, more than one answer is applicable because the moratorium period may vary depending on other factors (e.g. whether or not the Cape Town Convention applies or some other criteria are met), local counsel was
asked to select the most favorable (i.e. the shortest) such time period, and to indicate that the answer applied only to limited circumstances. Greater credit was given for a shorter moratorium period, and additional credit was given where a shorter moratorium period applied in all circumstances, rather than only in limited circumstances.

*Overreaching of the lessee’s insolvency estate.* Credit was given where the mandatorily applicable insolvency laws of the local jurisdiction did not deem the aircraft to be the lessee’s property and part of its bankruptcy or insolvency estate (notwithstanding the owner-lessee’s status as legal owner), in circumstances where the lessee is put into administration, liquidation or similar bankruptcy or insolvency process. In answering this question, we asked local counsel to assume that the lessee entity is subject to the mandatorily applicable insolvency / bankruptcy laws of the local jurisdiction, and that the lease is a true operating lease (and not a finance or capital lease).

**Factor 3: Deregistration (weighting: 10%).** This factor evaluates the ease with which an owner-lessee or a mortgagee may deregister an aircraft registered on the country’s aircraft register. This factor comprises the following sub-factors:

*Third party deregistration rights.* Credit was given if the laws of the local jurisdiction and/or the local practice of the aircraft register or aviation authority will honor a unilateral request by the owner-lessee or mortgagee to deregister the aircraft from the aircraft register, without the cooperation of the lessee. Such a request could be honored either: (a) pursuant to the exercise of a deregistration power of attorney or an “irrevocable deregistration and export authorization” (“IDERA”) pursuant to the Cape Town Convention granted in favor of the owner-lessee or mortgagee (or a person’s status as owner-lessee or mortgagee of the aircraft, even without any such power or IDERA. In answering these questions, we also asked local counsel to assume that:

1. the owner-lessee or mortgagee has repossessed or repossession of the aircraft, or is seeking simultaneous repossession of the aircraft;
2. the leasing has terminated or the mortgage has become enforceable, as applicable;
3. where any such deregistration request is made by an owner-lessee, it is with the consent of the mortgagee (if any); and
4. “cooperation of the lessee” includes a requirement that the original of the certificate of registration be surrendered.

*Historical precedent of refusing to deregister.* In the event that laws of the local jurisdiction and/or the local practice of the aircraft register or aviation authority entitle an owner-lessee or mortgagee to deregister an aircraft, credit was deducted if local counsel was aware of any instances where the aircraft register or aviation authority had refused to honor a request by the owner-lessee and/or the mortgagee (as applicable) to deregister the aircraft, despite being otherwise entitled to do so. “Despite being otherwise entitled to do so” means that the owner-lessee or mortgagee, in submitting the deregistration request, has complied with the local law and the paperwork required for deregistration is otherwise in order.

*Convenience of deregistration.* Credit was given if, with respect to deregistration of an aircraft, the aircraft register or aviation authority does not require the application forms necessary for registration, any necessary consents, authorizations or supporting documents to be notarized and/or authenticated before it will accept and process the deregistration of an aircraft. “Authenticated” includes any requirement that a document be apostilled, consularized, legalized or translated.

**Factor 4: Export (weighting: 10%).** This factor evaluates the ease with which an owner-lessee or a mortgagee may export an aircraft habitually based in the country. This factor comprises the following sub-factors:

*Third party export rights.* Credit was given if the laws of the local jurisdiction allow an owner-lessee (with the consent of the mortgagee, if any) or a mortgagee to unilaterally export the aircraft from the country without the cooperation of the lessee (and the owner-lessee, in the case of the mortgagee). We asked local counsel to assume that:

1. the owner-lessee or mortgagee has repossessed and deregistered the aircraft, or is seeking simultaneous repossession and deregistration of the aircraft;
2. the leasing has terminated or the mortgage has become enforceable, as applicable;
3. the owner-lessee or mortgagee has an export power of attorney granted in its favor; and
4. the lessee or owner-debtor is insolvent and uncooperative at the time the owner-lessee or mortgagee is seeking to export the aircraft from the country.

*Export licenses and permits.* Credit was given if an owner-lessee or mortgagee may export the aircraft from the country without requiring an export license or permit. We asked local counsel to disregard any restrictions relating to the export of goods to countries subject to sanctions or with respect to classified or military equipment installed on the aircraft.

*Export taxes and fees.* Credit was given if there are no
significant fees or taxes payable in order for the owner-lessee or mortgagee to export the aircraft from the country. We left it to local counsel to determine, using their professional judgement, whether they thought any such fees were significant; however, we indicated that “significant” fees or taxes would include any fees or taxes assessed on a percentage basis against the value of the aircraft or the sum secured by a mortgage, etc., but might exclude nominal fees or nominal taxes amounting to less than US$1,000 or its equivalent in the local currency of the jurisdiction.

Factor 5: Judgments and Arbitral Awards (weighting: 7.5%). This factor evaluates the ease with which an owner-lessee or a mortgagee may enforce a judgment or arbitral award in the jurisdiction without having to re-litigate the case on its merits. This factor comprises the following sub-factors:

Enforceability of judgments. Credit was given if the courts of the jurisdiction will recognize and enforce either: (a) a judgment rendered by a New York state or US federal court sitting in New York; or (b) a judgment rendered by an English court, without the case being re-examined on its merits. “Enforcement” means the enforcement of money awards only (and not injunctive or any other type of non-monetary relief). We also indicated to local counsel that “without the case being re-examined on its merits” meant that enforcement would only be subject to the satisfaction of one or more of the following threshold conditions (and would not be subject to any other additional conditions):

1. the court rendering the judgment must have had jurisdiction over the defendant and has obtained such jurisdiction in a way that is compatible with the laws of the local jurisdiction;
2. the judgment of the rendering court must have been final and conclusive and not subject to appeal;
3. the judgment must have been given on the merits of the case (and, for example, must not have been obtained by way of “judgment in default”);
4. the judgment must not have been obtained by fraud;
5. the judgment must not be incompatible with the public policy of the local jurisdiction;
6. the judgment must not contradict another judgment rendered by a court in the local jurisdiction; and/or
7. in the case of a judgment rendered by an English court, if the country is a sister EU member state, any of the conditions or exceptions permitted by the “recast” Brussels Regulation (Council Regulation (EU) 1215/2012).

Additionally, we made clear that a requirement for reciprocity of recognition/enforcement by a New York or English court (as applicable) is NOT a permitted threshold condition, unless it can be said with reasonable certainty that on a general basis (rather than on a case by case basis) such reciprocity requirement will be satisfied with respect to any such New York or English court judgment (because, for example, a reciprocal enforcement treaty exists).

Enforceability of arbitral awards. Credit was given if the country has adopted the 1958 Convention on the Recognition and Enforcement of Foreign Arbitral Awards (the New York Convention) and the courts of the local jurisdiction recognize and enforce a decision of an arbitrator. We asked local counsel to assume that a court in the local jurisdiction would be entitled to refuse enforcement of the arbitral award based on one of the exceptions and carve-outs enumerated in the New York Convention.

Factor 6: Preferential Liens (weighting: 7.5%). This factor evaluates the status of any onerous or unusual non-consensual preferential liens and requisition risks which could be imposed by the laws of the local jurisdiction and which may adversely affect an owner-lessee’s or mortgagee’s rights to the aircraft. “Preferential lien” means a lien that would take priority over the owner/lessee’s ownership and/or a mortgagee’s secured creditor rights in the aircraft, and “non-consensual” means that it arises by operation of law and not by agreement between a person with rights in the aircraft and the lien-holder. This factor comprises the following sub-factors:

Onerous and unusual preferential liens—non-possessory liens. Credit was given if the laws of the local jurisdiction do not provide for any non-consensual preferential non-possessory liens over aircraft that could arise in favor of a repairer / mechanic or a landlord / hangar-keeper.

Onerous and unusual preferential liens—fleet-wide liens. Credit was given if the laws of the local jurisdiction do not provide for any “fleet-wide” non-consensual preferential liens or equivalent rights or rights of detention over aircraft that could arise in favor of third parties not requiring any form of registration. A “fleet-wide” lien means a lien that has arisen as a result of unpaid amounts attributable to a particular aircraft in an operator’s fleet, but has attached or is capable of attaching to any other aircraft in that operator’s fleet (i.e. any other aircraft operated by that operator), regardless of the fact that the owners of such aircraft may be different.

Onerous and unusual preferential liens—liens in favor of a lessee or debtor. Credit was given if the laws of the local jurisdiction do not provide for any non-consensual preferential liens or equivalent rights or rights of detention over aircraft that could arise in favor of a lessee or debtor (i.e. not a third party) not requiring any form of registration. An example
of such lien might include a non-consensual preferential lien over the aircraft arising by operation of law in favor of a lessee in circumstances where the lessee has a valid counterclaim against the owner-lessor.

**Government requisition and confiscation.** Credit was given if the laws of the local jurisdiction do not allow the government to requisition or confiscate an aircraft without needing to pay the owner reasonable compensation. We asked local counsel to disregard government requisition or confiscation of the aircraft in circumstances where there has been a violation of any drug-trafficking laws or other criminal offenses.

**Factor 7: Political Stability (weighting: 30%).** This factor evaluates, predominantly, the adherence by the jurisdiction to the rule of law, by reference to a number of rule of law indices and other approximate measures, and should be helpful in determining the ease with which the theoretical legal rights available to an owner-lessee or mortgagee may be enforced in practice. This factor comprises the following sub-factors:

- **OECD status.** Credit was given if the country is an OECD “high-income” or “zero-rated” country according to the OECD’s “country risk” classification system (see further, www.oecd.org/tad/xcred/cre-crc-current-english.pdf).

- **Sovereign credit rating.** Credit was given to countries with an investment grade sovereign credit rating, according to Standard & Poor’s (or where a Standard & Poor’s rating is not available, according to Moody’s, if available).

- **World Justice Project – Rule of Law Index (2017-2018).** Greater credit was given to countries with higher scores on the following measures: “Absence of Corruption”, “Open Government”, “Regulatory Enforcement” and “Civil Justice” (see further, worldjusticeproject.org/our-work/wjp-rule-law-index).

**Heritage Foundation – 2018 Index of Economic Freedom.** Greater credit was given to countries with higher scores on the following measures: “Property rights” and “Government Integrity” (see further, www.heritage.org/index/).

**World Economic Forum – Global Competitiveness Report 2017-2018.** Greater credit was given to countries with higher scores on the following measures: “Property rights”, “Irregular payments and bribes”, “Judicial independence”, “Favoritism in decisions of government officials”, “Efficiency of legal framework in settling disputes”, “Efficiency of legal framework in challenging regulations” and “Transparency of government policymaking” (see further, reports.weforum.org/global-competitiveness-index-2017-2018/).

In the event that there is no data on the country in either one or two of the rule of law indices, each such index is ignored for scoring purposes without any negative effect on that country’s aggregate score for this factor. In the rare event that there is no data on the country in all three of the indices, then the Political Stability factor is ignored in its entirety and a note is made on the one-page summary for that country (and in the Summary of Scores table beginning on page 18) indicating that no such data is available.
# Summary of Scores

Summarized in the table below are the overall scores for each jurisdiction analyzed in this publication, together with a breakdown of the scores for each factor. The table has been sorted in descending order of overall score, with the highest scoring country at the top and the lowest scoring country at the bottom.

World Map

This world map summarizes the overall scores and asset recoverability ratings for each jurisdiction. The green, yellow and red colorings represent jurisdictions whose asset recoverability ratings are “LOWER RISK,” “MODERATE,” or “HIGHER RISK” respectively with the finer gradient of the color indicating whether the jurisdiction sits in the top, middle or bottom range of that category.

Of Swords and Shields: The Role and Limits of Courts in the Enforcement of the Cape Town Convention’s Substantive Repossession Remedies*

by Mark N. Lessard, Paul P. Jebely, Jeffrey Wool**

The Cape Town Convention and its Aircraft Protocol (the ‘CTC’) create a system whereby courts having jurisdiction over the territory where an object is located can be used as a ‘sword’ to obtain speedy repossession of mobile assets, but cannot be used as a ‘shield’ to delay or frustrate such repossession activity, especially on the basis of national law principles that are inconsistent with the CTC. Improper shielding actions can arise in particular from (1) a failure by courts to enforce the Convention’s substantive remedies (including the issuance of blocking or injunctive orders contrary to the Convention) or (2) the improper application of the Convention’s jurisdictional rules. This is not to say that the CTC overrides all national laws (although it does override national law on matters within its scope), or that the CTC does not contain any debtor protections (which it does; see, for example, the obligation to exercise remedies in a commercially reasonable manner as will be discussed below). Nor does this mean that a creditor should always win in any repossession case brought under the CTC. Instead, we are deploying this formulation to emphasize that the CTC creates a state responsibility (applicable through the relevant state’s judiciary) to adjudicate matters consistent with CTC jurisdictional rules and to provide creditors with the substantive remedies and protections intended by the treaty text, state declarations and party agreements.

Introduction
The Cape Town Convention on International Interests in Mobile Equipment (the ‘Convention’) and its related Aircraft Protocol (the ‘Aircraft Protocol’) signed on 16 November 2001 (together, the ‘CTC’) form an international treaty designed to promote the cross-border financing of aircraft. The CTC mitigates jurisdictional risk around the ability to immobilize, recover and redeploy aircraft speedily in a default situation, including on insolvency, with a framework that centers on the ‘international interest’. Following contractual default, the CTC offers creditors holding an international interest two key substantive repossession remedies: non-judicial remedies (also known as ‘self-help’) and advance judicial relief pending final determination. These rights and remedies are sui generis in that they arise from the CTC and are ontologically independent of national law.

Implementation of the CTC at the executive and legislative levels has been relatively successful to date, and we are entering a period of judicial implementation of the treaty’s substantive remedies, which are now being tested in national courts. This is because the CTC system, like other private commercial law treaties, does not contain an independent dispute resolution mechanism. Instead, creditors must rely on national courts for the practical realization of the CTC benefits. This can lead to an inconsistent application of the CTC’s principles in different jurisdictions.

Because the treaty is not an all-encompassing commercial code, the relationship between its international substantive

---

** Mr. Lessard and Mr. Jebely are Executive Editors of the World Aircraft Repossession Index. Their biographies can be found on Page 7. Their collaborator Mr. Wool is secretary general of the Aviation Working Group, professor of global business law, University of Washington, and an associate faculty member, University of Oxford. He is also the executive director of the Cape Town Convention Academic Project, the general editor of the Cape Town Convention Journal, and the chair of the Advisory Board to the International Registry (Aircraft Protocol).

2 For purposes of this article, ‘creditor’ refers to a chargee, conditional seller or lessor as the context requires.
3 These may be remedies of a chargee under Article 8(1)(a) or of a lessor or conditional seller under Article 10(3).
4 Article 13(1)(a)-(c) and Aircraft Protocol, Article X.
5 Since 2006, 84 countries and the European Union have signed the treaty and 73 countries and the European Union have ratified the treaty. The number of registered international interests has been increasing steadily every year, with over 30,000 international interests (including prospective international interests) registered annually since 2013. Because of the declaration system, not all ratifications are equal. The OECD keeps a list of countries that have made the qualifying declarations, and have implemented the CTC, thus entitling them to a discount on export credit financing.
6 Needless to say the establishment of an international commercial court would have gone far beyond the original intent of the treaty and have been highly impractical in every sense.
law provisions and otherwise applicable national law remains critical. Where a matter is not expressly addressed by the CTC, the treaty itself resorts to gap-filling through ‘general principles,’ both explicit and implicit—on which the CTC is based—before turning to domestic law. The CTC also contains jurisdictional rules, which are intended to override the private international law principles that a court seized of a matter normally would apply to determine which national courts have jurisdiction to hear CTC cases and enforce the substantive rights created by the CTC. CTC gap-filling and jurisdictional rules are essential to the core purpose of the treaty: to allow for speedy and predictable repossession of mobile assets following default.

Early cases have shown that some courts are either not sufficiently aware of the CTC and its applicability (sometimes from omissions in the pleadings submitted) or otherwise suffer from institutional bias in favor of pre-CTC national law. These instances are, in the best case, inconsistent with the core notion that the CTC takes precedence over national law and often place contracting states in violation of international law. In order to help elucidate and avoid the pitfalls of misapplication, this article examines ways in which courts may erroneously thwart CTC remedies by reference to national conflicts rules or national substantive law. In

7 See Karl F Kreuzer, ‘Jurisdiction and Choice of Law Under the Cape Town Convention and the Protocols Thereto’ (2013) 2(1) CTCJ 149 on complementarity of CTC system with certain national substantive and procedural rules. However, this is always subject to the absence of conflict with the terms of the CTC.

8 See Article 5 of the Convention, which mandates reference to the general principles on which the CTC is based, in order to promote uniformity and predictability in the application of the CTC, as well as its international character: Roy Goode, Official Commentary on the Convention on International Interests in Mobile Equipment and Protocol thereto on Matters Specific to Aircraft Equipment (3rd edn, UNIDROIT 2013) (the ‘Official Commentary’); Jeffrey Wool and Andrej Jonovic, ‘The Relationship Between Transnational Commercial Law Treaties and National Law – A Framework as Applied to the Cape Town Convention’ (2013) 2(1) CTCJ 65, 74-75 (articulating general principles).

9 See Wool and Jonovic (n 8) 70-80 on penumbra theory; Brian F. Havel and John Q. Mulligan, ‘The Cape Town Convention and The Risk of Renationalization: A Comment in Reply to Jeffrey Wool and Andrej Jonovic’ (2014) 3(1) CTCJ 81. Havel and Mulligan describe ‘renationalization’ as the process by which domestic institutions – including judges, administrative agencies, and regulatory bodies – erode the uniformity of transnational commercial treaties by reverting to local law when interpreting and enforcing such treaties. According to the authors, the CTC presents a particular risk of renationalization because it touches on areas of law that are typically the subject of elaborate and well-established domestic legal and regulatory regimes (eg registration, insolvency). Moreover, it does not provide for a dedicated international tribunal with authority to adjudicate disputes, but rather leaves interpretation and enforcement to local institutions that might be unfamiliar with the tenets of the CTC.

10 See Havel (n 9) on risk of renationalization, referencing Joost Pauwelyn and Manfred Elsig, ‘The Politics of Treaty Interpretation: Variations and Explanations Across International Tribunals’ in J Dunoff and M Pollack (eds) International Law and International Relations: Taking Stock (CUP 2013) 447 on the default reliance of some treaties on national judicial systems or regulatory agencies. The issue of general non-compliance with treaty terms and the consequences under public international law are beyond the scope of this article.

defining the proper role and limits of courts by reference to specific examples, we hope to contribute to better and more uniform enforcement of CTC rights. Nevertheless, much work remains in promoting uniform CTC analysis and creating precedent.

While this article focuses on CTC repossession rights, the principles herein apply more generally to court proceedings involving other substantive CTC rights, including those relating to deregistration, export or sale of aircraft equipment.

**Thesis and Outline**

This paper seeks to explore the proper role and limits of courts in the context of the CTC’s substantive repossession remedies. We will argue that the CTC, where supported by contracting state declarations and party intent in their contractual agreements, creates a system whereby courts having jurisdiction over the territory in which an object is located can be used as a ‘sword’ to obtain speedy possession of that object, but cannot be used as a ‘shield’ to delay that repossession activity.

While courts will be more likely to err in their application of the CTC if it has not been properly implemented under national law, the proper legislative and regulatory implementation of the CTC is beyond the scope of this paper. We instead focus on the actions that a court can take (or refuse to take) that would improperly shield a debtor from otherwise enforceable CTC remedies, effectively putting a country in violation of its international legal obligations. Such shielding actions typically arise from either (1) a failure by courts to enforce the CTC’s substantive remedies (including the issuance of blocking or injunctive orders contrary to the CTC) or (2) the improper application of the CTC’s jurisdictional rules. Examples of a failure to enforce treaty remedies might include: ignoring express treaty remedies that require time-bound and/or non-discretionary court action, or adding restrictions to these based on national law; construing the substantive elements of the treaty in an unintended narrow manner; or turning to local substantive or procedural provisions in a manner that undermines the intent of the CTC. Examples of improper application of jurisdictional rules might include: claiming jurisdiction over a dispute contrary to treaty provisions or refusing to accept jurisdiction on the basis of national conflict-of-laws rules contrary to treaty provisions.

We will first describe our proposed sword/shield theory followed by an overview of the CTC’s judicial and non-judicial repossession remedies. Next, we will examine the key jurisdictional CTC provisions applicable to these remedies, focusing on the manner in which these are intended to override certain aspects of national law and analyzing a recent case that we believe to be inconsistent with the CTC. We will then explore the role and limits of courts in the
context of substantive enforcement, emphasizing the main areas in which a court having jurisdiction over the territory in which an object is located may improperly seek to shield a debtor from the exercise of CTC repossession remedies. Our discussion will elucidate various instances of implicit and explicit non-compliance with a particular focus on the inherent limits placed by the CTC on the granting of preliminary injunctions barring CTC remedies on the basis of local law principles that are otherwise inconsistent with the CTC.

Finally, we will use a multi-jurisdictional case study to illustrate the dynamics and tensions in the enforcement of the CTC repossession remedies, including the proper use of courts as a ‘sword’ and the potential misuse of courts as a ‘shield’. This will involve a Mexican airline operating a Mexican registered aircraft under a New York law-governed finance lease where the lessor is a Delaware special purpose trust that, as borrower, has granted a New York law mortgage to a commercial lender.

Of Swords and Shields
The English case of Combe v Combe stands, inter alia, for the proposition that promissory estoppel is ‘to be used as a shield and not as a sword’. In that case, Lord Denning explained that the doctrine of promissory estoppel ‘does not create new causes of action ... It only prevents a party from insisting upon his strict legal rights, when it would be unjust to allow him to enforce them, having regard to the dealings which have taken place between the parties.’ The idea is that detrimental reliance, as applied in the specific context of promissory estoppel, cannot be expanded so far as to create a contractual cause of action in the absence of consideration, which itself is an essential part of any contractual cause of action.

The authors would propose their own sword/shield theory in the context of the CTC’s repossession remedies: that the CTC system allows courts having jurisdiction over the territory where an object is located to be used as a sword to obtain speedy repossession of that object, but not as a shield to block such repossession action, especially on the basis of national law principles that are inconsistent with the CTC. This is not to say that the CTC overrides all national laws (although it does override national law on matters within its scope), or that the CTC does not contain any debtor protections (which it does; see, for example, the obligation to exercise remedies in a commercially reasonable manner as will be discussed below). Nor does this mean that a creditor should always win in any repossession case brought under the CTC. Instead, we are deploying this formulation to emphasize that the CTC creates a state responsibility (applicable through the relevant state’s judiciary) to adjudicate matters consistent with CTC jurisdictional rules and to provide creditors with the substantive remedies and protections intended by the treaty text, state declarations and party agreements.

The CTC is a sword in that it is designed for the very purpose of allowing the speedy and predictable recovery of expensive mobile assets in default situations. When we say that courts cannot be used as a shield in CTC repossession actions, we mean that the CTC does not permit domestic courts to block or enjoin applicable CTC remedies in reliance upon otherwise inconsistent local principles.

Overview of Repossession Remedies
The substantive repossession remedies contained in Article 8 and Article 10 of the Convention are an important, if not ground-breaking, construct in transnational private law. They hinge upon the international interest and allow for the exercise of repossession remedies either without the leave of courts (within the bounds of commercial reasonableness) or with the sanction of courts (where the claimant has adduced evidence of a default by the debtor), notwithstanding any local law to the contrary.

Article 8 and Article 10: Non-Judicial Repossession Remedies
Article 8 of the Convention allows a chargee, in the event of default, to take possession or control of an object, sell or grant a lease of it and collect or receive any income arising from the management or use of that object. Article 10 allows a conditional seller or lessor, in the event of default, to terminate a lease or conditional sale agreement and take possession or control of any object to which the agreement relates (it also allows the conditional seller or lessor to apply for a court order authorizing or directing either of these acts). Article 11 specifies the meaning of default, allowing the debtor and creditor to define the events that constitute a default or otherwise give rise to CTC remedies, failing which, definition of a ‘default’ is taken to mean any failure on the part of the debtor which substantially deprives the creditor of what it is entitled to expect under the agreement. In addition, in the case of Article 8, any non-judicial remedies must specifically be agreed to in writing by the debtor in the relevant security instrument.

Given the sensitivity of ‘self-help’ remedies in many jurisdictions, these remedies are only applicable without leave of the court where non-judicial remedies are specifically declared by the relevant contracting state pursuant to Article 54(2). This is the only state declaration under the CTC system that is mandatory, meaning that there is no default ‘opt-in’ or

11 [1951] 2 KB 215 (KB).
12 ibid.

13 In the case of a lease, consistent with principles of international commercial finance, the CTC does not require that the agreement specifically allow the owner to repossess after default an object which does not belong to the debtor, though in practice such right will always be contained in any well-drafted lease.
‘opt-out’ application for a failure to declare. A contracting state’s instrument of ratification will not be accepted by UNIDROIT unless it has declared whether or not remedies under the CTC require leave of the court. Accordingly, a declaration that remedies do not require leave of the court is an affirmative state action that (in addition to constituting a binding legal rule) serves as ipso facto evidence that, in the context of the CTC, non-judicial remedies reflect the law and policy of the contracting state making such declaration.14 The availability of non-judicial remedies does not however preclude a creditor from applying to a court for permission to exercise these repossession remedies.15

Article 13: Judicial Repossession Remedies
Recognizing that non-judicial remedies may not be compatible with some judicial systems, the framers of the CTC included a special judicial remedy allowing for ‘speedy’ relief by a creditor following an event of default. Article 13 of the Convention allows a creditor to request speedy return of collateral from a court pending final determination of any dispute when, for example, a debtor is disputing the creditor’s right to exercise a repossession remedy under the CTC, or the creditor cannot gain access to its collateral. The contemplated judicial relief takes the form of an order for the preservation of an object and its value, the possession, control or custody of the object and/or its immobilization.

As with non-judicial remedies, the CTC expressly allows a contracting state date-of-ratification optionality with respect to the application of Article 13 remedies. In this case, a contracting state may at that time opt-out of this provision (and the related jurisdictional provision in Article 43, discussed in more detail below) in whole or in part.16 In addition, Article 13 conditions such remedies upon the debtor having agreed to the availability of this relief. While the CTC does not elaborate on the meaning of ‘speedy’, Article X of the Aircraft Protocol requires that contracting states specify in their declarations the number of working days from filing of the petition that will constitute speedy relief (which has typically been between 3 and 10 calendar days).

Role and Limits of Courts: Giving Precedence to the Provisions and Principles of the CTC Over Conflicting National Rules
The proper role and limits of courts are determined first by the intended scope and application of the CTC and its relationship with national law.17 Where appropriately seized of a matter, courts in contracting states have a responsibility to enforce CTC remedies in a manner consistent with the CTC and international law. But courts are not always equipped to interpret and apply sui generis international legal norms, especially when based on principles that differ from the domestic law typically applied by these courts. This makes it difficult for less experienced courts to fulfill their principal role in a repossession scenario – giving effect to CTC provisions and principles as a matter of priority over national laws.

That the CTC framework exists independently of, and takes precedence over, domestic law is fundamental to the practical realization of the benefits of the CTC.18 The principle of autonomous interpretation enshrined in the CTC requires a court to interpret the CTC by reference to its terms and principles instead of by reference to analogous principles of domestic law.19 Article 5(1) of the Convention provides:

In the interpretation of this Convention, regard is to be had to its purposes as set forth in the preamble, to its international character and to the need to promote uniformity and predictability in its application.

The ‘general principles’ described in the Preamble of the Convention and reinforced in Article 5(1) are the primary source for gap-filling.20 These include the principles of prompt enforcement, uniformity and predictability, as well as party autonomy, which have been articulated by Wool and Jonovic as follows:21

(I) There should be a strong presumption of the enforceability of contract provisions even when the CTC is silent on a topic (the ‘party autonomy principle’);22

14 The CTC declaration system allows contracting states to opt in and out of certain Articles of the CTC and the Aircraft Protocol, thus providing them with the opportunity to adopt the CTC and the Aircraft Protocol in a manner that suits their policy preferences and needs. The declaration system is designed to allow states to determine mandatory law or public policy, in the context of the CTC, on non-judicial remedies, rights of detention and similar matters. The international law-based requirement is that courts will act in a manner which carries out, and is consistent with, the declarations made by their governments (or where not made, the CTC itself).

15 See Article 8(2) and Article 10(b) of the Convention.

16 Article 55 of the Convention; although of vital importance to the realization of the CTC’s benefits, it is acknowledged that a contracting state has the right to opt-out of the provision in whole or in part where inconsistent with some issue of national or public policy. Where there is no opt-out, one must conclude that the article is consistent with public policy of the contracting state.

17 While Article 5 of the Convention does contain some general conflict of laws rules (see Article 5(3) in particular, which defaults to the law of the state whose law otherwise applies under private international law where matters are not settled by the express terms of the CTC or the principles on which it is based), this article deals with the application of substantive treaty law by domestic courts. Accordingly, we will not address choice of law generally in this article.

18 This assumes the CTC has been properly implemented under national law. Legislative implementation of the CTC and related constitutional law issues are beyond the scope of this article.

19 See Goode (n 6) para 2.18: ‘This is clear from Article 5(1) and (2) and reflects the general rule of interpretation laid down in Article 31(1) of the 1969 Vienna Convention on the Law of Treaties.’

20 Goode (n 8) para 4.63.

21 See Wool and Jonovic (n 8) 74-75.

22 Goode (n 8) para 2.9(9).
(II) Terms should be implied, when needed, that enhance transactional predictability and reflect international best practices in asset-based financing and leasing (the ‘asset-based financing and leasing principle’);

(III) Terms should be implied from the treaty and international legal sources, as opposed to national law, when needed to preserve the intent, internal logic and uniformity of *sui generis* concepts and their legal implications (the ‘*sui generis* concept principle’); and not settled by the express terms of the CTC or the principles on which it is based), this article deals with the application of substantive treaty law by domestic courts. Accordingly, we will not address choice of law generally in this article.

(IV) Governments (including courts) may not impose conditions on basic CTC rights and remedies, or take action that would adversely affect or render them ineffective, including in cases where the CTC is silent on a particular matter (the ‘no adverse effect principle’).

It is only where the foregoing does not yield a legal principle allowing a case to be decided that resort may be had to the applicable substantive national law.

Without a doubt, the CTC extends into many important areas of commercial and secured transactions law that have previously been examined and adjudicated by courts in accordance with domestic principles. This creates a risk of conflict that courts may be inclined to resolve through a domestic legal lens. But such inclination may not be followed, where treaty compliance is sought. There are many more and less explicit ways for a court to either exceed its limits or otherwise fail to fulfill its role in adjudicating CTC remedies. In the most obvious instance, a court may simply disregard express treaty remedies, which generally require time-bound and non-discretionary action, or it may seek to impose restrictions to the exercise of these remedies based on national laws that otherwise conflict with the express terms of the CTC. While resort may be had to national legal sources where the CTC does not otherwise provide an answer, the result cannot be inconsistent with the express terms and principles of the CTC. For example, a court may not construe the substantive elements of the treaty so narrowly as to denude a party from any remedy for the enforcement of the rights created under the CTC. Similarly, a court may not turn to local substantive or procedural provisions in a manner that undermines the intent of the CTC.

---

23 As discussed above, the CTC’s repossession remedies constitute *sui generis* relief.

**Role and Limits of Courts: Jurisdiction in the Enforcement of the CTC’s Substantive Repossession Remedies**

Predictability is crucial in the area of secured transactions and leasing. A financier who extends secured credit needs to ensure that its security will be recognized in the state of the main location of the debtor and in other states where its security may have to be enforced.

Traditionally, courts seized of a matter apply their own conflict of laws rules to determine the jurisdiction whose substantive law will apply to a particular legal issue. Each state has its own conflict of laws rules, which may differ from one state to another, many of which provide that the substantive law applicable to a security interest in any kind of asset will be the law where the asset is situated. With mobile assets such as aircraft, this would require a creditor to obtain a valid and perfected security interest in all states where the asset may land.

The Geneva Convention on the International Recognition of Rights in Aircraft (1948) (the ‘Geneva Convention’) was an attempt to harmonize conflict rules on property interests in or leases of aircraft. It provides that the applicable substantive law is the law of the state of nationality of the aircraft. The Geneva Convention is however outdated in many respects, including in the manner it addresses leases and extra-judicial enforcement. More importantly, the Geneva Convention is based on a conflict rule approach, referring most issues to the law of the nationality of the aircraft. This approach is insufficient to achieve the desired uniformity and predictability as outcomes could be different depending on the national regime designated by the conflict rule. By creating an overriding international substantive legal regime, the CTC ‘intends to elude as far as possible the need to have recourse to conflict of laws provisions’.

Similarly, with respect to choice of forum, the lex fori of each state provides for different criteria with respect to access to their courts or the recognition of a choice of forum clause in a contract. To reinforce the predictability of the CTC system, the CTC contains two uniform rules mandating jurisdiction for the adjudication of claims brought under the CTC, including claims related to the CTC’s substantive repossession remedies. The first is prorogated jurisdiction under Article 42, governing all possible claims or actions that are covered by the CTC (‘CTC Claims’). This enables the parties to determine, on an exclusive or non-exclusive basis, which court is best suited to settle their disputes. The second is the jurisdiction under Article 43 to hear petitions for speedy relief pending final determination under Article 13. Courts of contracting states have a responsibility to cede or assume jurisdiction where required under Article 43 of
the Convention, notwithstanding anything to the contrary under their own national choice of forum rules.

**Article 42 Jurisdiction: Giving Effect to the Principle of Party Autonomy**

Article 42 is a general jurisdictional rule allowing the parties to an agreement creating an international interest to choose specific courts to adjudicate CTC Claims.

It expressly overrides domestic conflict of laws rules with respect to CTC Claims insofar as contracting states are involved, so long as the choice of forum is concluded in writing or otherwise in accordance with the formal requirements of the law of the chosen forum. Importantly, the relevant forum need not have a connection to the parties or otherwise satisfy any formal requirements of private international law. While the requirements as to formal validity of a forum selection are governed by the law of the forum chosen by the parties, the material validity of the forum selection is governed by the applicable substantive law.

The determination of the forum by the parties has to be seen in connection with the general reference in Article 5(2) and (3) to the rules of private international law of the forum State for the designation of the applicable substantive law. Thus, by choosing the (exclusively) competent courts of a State Party the parties determine, at the moment of the conclusion of a transaction, the applicable conflict rules and in that way indirectly or, by virtue of a choice of law agreement, even directly the governing substantive law.

The selected jurisdiction is assumed to be exclusive unless it is stated by the parties to be non-exclusive. An exclusive choice of court agreement under the CTC precludes a court in a different contracting state from claiming jurisdiction (exclusive or otherwise) in a claim or action under the CTC. However, it does not necessarily guarantee that the forum chosen under Article 42 will hear all cases involving CTC Claims, as the application of substantive or procedural conflict rules of that forum (such as the forum non conveniens rule) could result in a finding there is some other available forum which has jurisdiction and is the appropriate forum for trial of the action. Where the Article 42 agreement is non-exclusive, the debtor may be in a position to commence an action in its home or other territory unless the non-exclusivity runs in favor of the creditor only. If, and only if, action is taken by a debtor in a non-contracting state in a manner that is not precluded under an Article 42 agreement, the CTC would not apply.

If Article 42 jurisdiction is limited to CTC Claims, such jurisdiction could conceivably be challenged by alleging that a claim is outside the scope of the CTC, or alternatively in an injunction or similar proceeding advanced by a debtor, by failing to inform the court seized of a matter that the CTC applies or even exists. Claims and counter-claims by the debtor that are not within the scope of the CTC include claims for civil liability (including lender liability), and criminal matters. CTC Claims or actions within the scope of the CTC must however, and clearly do, include the claims and actions that are the subject of this article, namely those related to the exercise by a creditor of the CTC’s substantive repossession remedies. Article 42 must therefore determine the forum for any attempt by a debtor to block an Article 8 or Article 10 extra-judicial repossession, to the exclusion of any other forum (including the home forum of the debtor).

**Article 43 Jurisdiction: Giving Effect to the Principle of Predictability and Universal Protection of Security in Mobile Equipment**

Article 43 grants concurrent jurisdiction to courts of the state where an object is situated in connection with an exercise of Article 13 repossession remedies. Such jurisdiction extends to orders for in rem relief, such as the preservation of an object and its value, the possession, control or custody of the object and its immobilization. Under the express language of the CTC, Article 43 jurisdiction is mandatory.

---

28 See Kreuzer (n 7) 152. However, ‘prorogation agreements selecting the courts of a State which is not a party to the CTC regime does not bind the courts of [contracting states]. Whether and to what extent such a choice of jurisdiction clause is valid has to be determined by the lex fori’.

29 Article 42(2) of the Convention. This was inserted in order to ensure conformity with Article 23 of the European Community Council Regulation No. 44/2001 of 22 December 2000 on jurisdiction and the enforcement of judgments in civil and commercial matters which replaces the 1968 Brussels Convention on Jurisdiction and the Enforcement of Judgments in Civil and Commercial Matters and binds all Member States of the European Union.

30 Goode (n 8) para 4.287.

31 Kreuzer (n 7) 151.

32 See Goode (n 8) para 4.285.

33 The CTC does not exclude this principle of private international law.

34 When it comes to advance relief under Article 13, Article 43 of the Convention confers mandatory concurrent jurisdiction on the courts of the contracting state on the territory of which the object or debtor is situated, which raises the question of whether non-exclusive clauses remain desirable for creditor parties. One-way non-exclusivity in form selection in favor of the creditor (but mandating an exclusive jurisdiction (within a contracting state) for proceedings initiated by the debtor) may be a preferable route and would be enforceable under Article 42. See Aersale 25362 Aviation Ltd v Med-View Airline plc (Com Ct, 15 September 2017) (enforcing non-exclusive New York forum selection clause that granted creditor the right to initiate proceedings in jurisdiction of its choosing, and rejecting debtor’s application to stay claim based on forum non conveniens argument).

35 Under Article XXI of the Aircraft Protocol, a court of a contracting state also has jurisdiction under Article 43 where it is the state of registry for a helicopter or airframe pertaining to an aircraft.

36 Article 13(1)(a)-(c) of the Convention.

37 Article 43(1) states: ‘The courts of a Contracting State chosen by the parties and the courts of the Contracting State on the territory of which the object is situated have jurisdiction to grant relief under Article 13(1)(a), (b), (c) and Article 13(4) in respect of that object.’ (emphasis added). Article 13(1)(a), (b), and (c) encompass the CTC’s sui generis
and overrides the lex fori. The mandatory nature of this jurisdiction is inherent to the very exercise of Article 13 repossession rights, which cannot be exercised if the court having jurisdiction over the territory where the object is located refuses to accept jurisdiction.\textsuperscript{38} This is the case notwithstanding any contrary national conflicts rules that may allow the court to refuse jurisdiction in the instance where another jurisdiction has a closer connection to the dispute. However, Article 43 only applies if the contracting state has made the relevant declaration under Article 55 (noting that a contracting state may not apply Articles 13 or 43 in whole or in part).\textsuperscript{39}

\textbf{Article 43 jurisdiction is not exclusive in relation to CTC Claims and is in fact concurrent with any other applicable jurisdiction, including Article 42 jurisdiction as chosen by the parties}

Concurrent jurisdiction means that the choice as to whether an Article 13 claim should be filed in the contractual forum to which the parties agreed or in the forum where the object is located is entirely at the option of the creditor.\textsuperscript{40} The jurisdiction of courts in the state where the object is located cannot be excluded by agreement of the parties under Article 42 or displaced by national conflicts rules. That a court is seized does not prevent application by that court of its regular rules and procedures; however, such rules (including conflicts rules) may not be applied if inconsistent with CTC, which, as noted, affirmatively provides without qualification in Article 43 that such courts ‘have’ jurisdiction to hear Article 13 claims. This is because the specific intent and effect of the CTC is to remove cases of urgency from the regime of private international law that governs enforcement of judgments.

The CTC does not give any court general jurisdiction to enjoin repossession remedies on the basis of local law principles or allow a debtor to initiate preemptive injunctive action to block an Article 13 petition prior to any action by a creditor. For one, under the terms of the Convention, any such preemptive action is not ‘a claim for relief under Article 13’ as required for the application of jurisdiction under Article 43. Any such claim by the debtor must therefore be brought in the forum specified by the parties in their agreement under Article 42 (unless the election is non-exclusive in favor of the debtor). More crucially, even if the parties had expressly selected the jurisdiction where the object is situated as prorogation jurisdiction under Article 42, any effort to block Article 13 remedies on the basis of local law would be inconsistent with each of the general principles elevated above national law by Article 5 of the Convention. For example, enjoining Article 13 remedies is inconsistent with the party autonomy principle, since Article 13 remedies only apply where agreed by the parties in the relevant agreement. It is also inconsistent with the asset-based financing and leasing principle, since predictable application of rules and speedy access to collateral following default are essential to the proper functioning of cross-border finance, as well as the \textit{sui generis} concept principle, since Article 13 remedies are a creature of the CTC and not of national advance relief law. Finally, the no adverse effect principle would preclude a court from importing national concepts surrounding injunctive relief to block Article 13 remedies, since this amounts to imposing additional conditions on the exercise of otherwise available CTC remedies.

\textbf{First Nation Airways Case}

In First Nation Airways (SS) Limited,\textsuperscript{41} the courts of Nigeria claimed jurisdiction over a repossession action covered by the CTC in a manner that was inconsistent with the principles of Article 42, notwithstanding that the parties had designated the courts of England as their exclusive forum to hear CTC claims. Having taken jurisdiction, the court then proceeded to enjoin the exercise of applicable CTC repossession remedies based on domestic legal principles.

The lessee airline had entered into leases for three aircraft with an international lessor. Following payment defaults under the leases, the lessor sought to take possession of the aircraft (located in Nigeria) in accordance with Article 8(1)(a) of the Convention without recourse to the court, on the basis that Nigeria, in acceding to the CTC, had made a declaration under Article 54 pursuant to which the remedies provided by Article 8 can be exercised without leave of the court. Just when the lessor was about to commence proceedings before the High Court of London in accordance with the forum selection clause of the leases, the lessee petitioned the Federal High Court of Lagos to prevent the lessor from pursuing its action in England. The Nigerian court claimed full jurisdiction over the matter.

In its motion to dismiss, the lessor referred the court to Article VIII of the Aircraft Protocol, which provides that the parties’ choice of law to govern their contractual rights and obligations must be respected in all Contracting States which have made a declaration to that effect under Article

---

\textsuperscript{38} Unlike the in rem repossession remedies of Article 13(1)(a)-(c), relief under Article 13(d) is viewed as operating in personam, and therefore the debtor must be situated in the territory of the forum state where enforcement is sought (as opposed to where the object is located). See Goode (n 8) para 4.287.

\textsuperscript{39} Article X of the Aircraft Protocol extends Article 13 remedies to sale; it also substantially modifies Article 13, for example, by preventing the imposition by a court of a bond requirement if the parties have excluded application of Article 13(2) in their contract.

\textsuperscript{40} Goode (n 8) para 4.294.

\textsuperscript{41} First Nation Airways (SS) Limited v Castle 2003-IA LLC & others [2016] FHC/L/CS/1343 1.
XXX(1), as Nigeria did. The lessor’s argument to oust the Nigerian court rested on this provision as well as Article 42. The lessee, on the other hand, argued the Nigerian court must have the power to rule over the matter as a result of a series of connections between the transaction and the local forum, namely the location of the aircraft, the airline, the witnesses and the lawyers in the case. The airline claimed that the forum selection clause of the lease agreement should be considered null and void to the extent that such clause sought to oust the local jurisdiction of Nigerian courts and conflicted with Nigerian domestic mandatory law.

In considering the matter, the court acknowledged that ‘recognition must be given to the principles of international law’ and to ‘the concept of autonomy of the parties to international commercial contracts’ to select a forum of their choice, as provided under Article 42. However, the court questioned ‘whether domestic rules and laws shall be subservient to international rules and principle’ and went on to conclude:

where a domestic forum is asked to stay proceedings because parties in their contract chose a foreign court and a foreign law to apply, it should be very clearly understood by our courts that the power to stay proceedings is not mandatory. Rather it is discretionary power which in the ordinary way, and in the absence of strong reasons to the contrary will be exercised both judicially and judiciously bearing in mind each party’s right to justice.42

Having considered the arguments raised by the lessee to support its requests, the Court found that the Nigerian restrictions on foreign exchange (which prevent the lessee from paying for its representation before the English courts) constituted ‘strong cause’ for the court to take jurisdiction over the matter and reject the lessor’s motion to dismiss. The court also ruled that its decision to adjudicate the matter pre-empted the jurisdiction of the English court.

These judicial actions were inconsistent with the jurisdictional rules and intent of the CTC, which overrides pre-CTC law (including national conflicts rules). The Court did not enforce the choice of forum set by the parties in the leases despite recognizing that the CTC and Aircraft Protocol were effective and enforceable in Nigeria. This ruling is particularly troubling since in the present case, the Court could have decided that Article 42 did not apply because the United Kingdom had not acceded to the CTC at the time the courts of England were designated as the exclusive forum for CTC claims.43 Instead, the court peremptorily applied national doctrines (such as the ‘strong cause’ exemption) notwithstanding that the parties’ exclusive choice of forum was deemed to have been validly made. No matter how critical the connections to Nigeria are to determining jurisdiction under Nigerian conflicts rules, these are not relevant under a CTC analysis. As stated by Professor Goode, ‘where exclusive, [Article 42] precludes courts of other Contracting States from accepting or asserting jurisdiction’ over a case.44

Role and Limits of Courts: Enforcement of the CTC’s Substantive Repossession Remedies

We will now turn to the process and dynamics surrounding the substantive exercise of repossession remedies, focusing on the key ways that the CTC provisions, principles and framework might be contorted to use courts in the jurisdiction where the object is located as a shield against an otherwise legitimate exercise of CTC remedies.

Improperly Shielding the Exercise of the CTC’s Non-Judicial Repossession Remedies

The Convention contains two key provisions that can impact the exercise of Article 8 and Article 10 repossession remedies: the general requirement in Article 14 that remedies be exercised in accordance with the procedures prescribed by the law of the place where the remedy is to be exercised; and the principle in Article 8 (as supplemented by the Aircraft Protocol with respect to aircraft objects) that remedies must be exercised in a ‘commercially reasonable’ manner. If it is the role of courts to ensure that CTC principles are faithfully applied, under which circumstances then, if any, can a court exercising jurisdiction over the territory where the object is located legitimately block or enjoin the exercise of CTC non-judicial repossession remedies?

Article 14 of the Convention provides that, subject to Article 54(2), substantive repossession remedies will be exercised in accordance with the procedural laws of the lex loci (ie the law of the jurisdiction where the remedy is exercised). This will often be the law of the jurisdiction of a debtor, which may create some institutional bias. However, Article 14 cannot be relied upon by courts to impose any requirement for a court order (even a derivative requirement) where a contracting state has declared that remedies are available without leave of the court under Article 54(2). Other procedural laws that conflict with the existence and availability of non-judicial remedies are also problematic. For example, the imposition of undue administrative delays for access to airport facilities, ferry flight permits or air traffic control permissions would all render the effectiveness of declared remedies moot. The intention of the CTC is that the foregoing be effected on a swift basis.

42 ibid.
43 As discussed above, only the courts of Contracting States may be designated pursuant to Article 42 of the Convention.
44 Goode (n 8) para 4.285.
Implementation issues may arise where a system that did not previously allow non-judicial remedies makes an affirmative Article 54(2) declaration. A recent article published in this Journal examined these issues in detail in the case of Québec, which made a deliberate attempt in its legislative implementation to bring the applicable commercial and procedural law into line with CTC principles. The article concludes that even in the absence of any specific enabling changes to the rules of civil procedure or any jurisprudence from domestic sources:

the Lessor and the Bailiff must be able to take reasonable measures to physically repossess the aircraft in the face of airline opposition. Such reasonable measures would need to be exercised in good faith with prudence and diligence; the Lessor and the Bailiff are not entitled to apply force to an individual. The key conclusion, however, is that the lack of existing procedural rules cannot be used to deprive a creditor of the remedy specifically given to it by the Governments of Canada and Québec to exercise non-judicial remedies.

Accordingly, even if the contracting state at issue has an entire body of jurisprudence stating that non-judicial remedies were against pre-CTC public policy in such a state (which was changed by the permitting declaration), a court could not grant an injunction to a defaulting debtor prohibiting non-judicial repossession on that basis where the contracting state has made an affirmative Article 54(2) declaration, since Article 5 does not allow resort to local principles where a matter is expressly addressed in the CTC. In other words, mere repossession of the asset cannot be deemed to create irreparable harm or prejudice where the availability of this remedy has been declared by a contracting state and agreed to in writing by the debtor.

Accepting that the CTC allows for extra-judicial remedies does not permit a creditor to breach the peace or otherwise engage in abusive behavior. This is because Article 8(3) requires that a secured party exercise remedies in a ‘commercially reasonable’ manner. Specified remedies under the relevant agreement, including notice periods, are deemed to be commercially reasonable except where such provision is ‘manifestly unreasonable’. This wording ‘embodies a strong presumption in favour of the reasonableness of a contractual provision as to the mode of exercise of a remedy and is designed to encourage reliance on contract wording, particularly where the wording is customary in international aircraft financing and leasing contracts’. Article 8(3) is mandatory and cannot be derogated from by agreement of the parties.

Since the term ‘commercially reasonable’ is not expressly defined under the CTC, courts must first look to general principles, as discussed above, when applying the concept. These principles include party autonomy, which is expressly embodied in the presumption as to the reasonableness of agreed remedies, but, critically, also the ‘international character’ of the CTC and the ‘need to promote uniformity and predictability in its application’ as expressly stated in Article 5(1). Accordingly, in determining what is ‘commercially reasonable’, a court should always look at established commercial and international practices, along with industry standards and customary practices within the cross-border equipment financing and leasing industry, prior to resorting to domestic law. Established commercial practice in the international aircraft financing space hinges upon the rapid repossession and redeployment of assets following an event of default. A full comparative legal analysis as to what constitutes commercial reasonableness in international commerce is beyond the scope of this article, but in matters relating to the exercise of repossession remedies, the essence is that creditors should avoid violence or breach of the peace and use reasonable efforts to preserve the value of the recovered property and to mitigate the creditor’s losses resulting from the default. These principles are emphasized in various international law texts, sources and guidelines, including the UNCITRAL Legislative Guide on Secured Transactions.

References to commercial reasonableness in international legal instruments have largely been inspired by Article 9 of the United States Uniform Commercial Code, which has, since its enactment in the 1960s, influenced many different national and international personal property security regimes in need of a ‘device to control, on an ex-post basis, the creditor’s behavior’.

46 The Québec CTC Regulation specifically provides that ‘any remedy available to the creditor under any provision of the CTC which is not there expressed to require application to the court may be exercised without leave of the court’.
47 Gray, MacIntyre and Wool (n 45) 37.
48 Under the CTC itself, the ‘commercially reasonable’ requirement only applies to Article 8 remedies. Article IX(3) of the Aircraft Protocol, however, extends this limitation to all remedies for aircraft objects, including those available under Article 10. It is important to note that Article 8(3) is focused on the commercial reasonableness of CTC repossession remedies (ie dispossession) and not on the commercial reasonableness of sales of collateral in the exercise of remedies (ie foreclosure).
49 Goode (n 8) para 5.51.
50 Article IV(3) of the Aircraft Protocol.
51 Gray, MacIntyre and Wool (n 45).
The ‘ex-post’ nature of this device is critical to the framework of the CTC. This is because the CTC allows debtors to pursue claims for lender liability separate and apart from the repossession action of the creditor. The exercise of these rights is typically subject to contractual jurisdiction as agreed by the parties, rather than the jurisdiction where the object happens to be located, and the creditor liability claims themselves are not secured by the relevant object. In fact, the CTC itself does not even purport to govern these claims, something which is reinforced in the Aircraft Protocol which expressly provides that ‘nothing in the Convention or [this] Protocol affects the liability of [a] creditor for any breach of the agreement under the applicable law in so far as that agreement relates to an aircraft object’.54 Therefore, the CTC does not permit a court to block an impending non-judicial repossession pending a determination by the court as to whether or not the action is commercially reasonable. To impose any ex ante judicial standard of review as to the commercial reasonableness of a proposed extra-judicial action would undermine the very essence of the CTC’s non-judicial repossession remedies. This would be inconsistent with the general principles that take precedence over applicable law, in particular the sui generis concept principle and the no adverse effect principle.

Other matters outside the scope of the CTC include criminal law, regulatory public law and torts/civil liability, all of which are similarly independent from the right of the creditor to obtain possession of an object and are not secured by the object. The existence of these types of claim or counter-claim cannot be used in the courts to block non-judicial remedies where the requirements of the CTC have otherwise been met.

Improperly Shielding the Exercise of the CTC’s Judicial Repossession Remedies

Where a contracting state has declared that CTC remedies may only be exercised with leave of the court, or in certain instances where the exercise of non-judicial remedies is not possible without breaching the peace given the facts on the ground (eg security in place at large international airports), gaining access to the relevant object may require a prejudgment order from a court having jurisdiction over the territory where the object is located. To standardize the approach courts take in these cases, the CTC contains a specific judicial procedure in Article 13 designed to ensure that speedy relief is available with very limited opportunity for ex ante judicial control. Article 13 is a substantive CTC remedy intended to provide a rapid, cost-effective process that is separate from any interim or other remedies available under domestic law. Its essence is that courts are required to provide the creditor who adduces evidence of default with speedy relief pending final determination of its claim. In the context of repossession remedies, the contemplated judicial relief takes the form of an order for the preservation of an object and its value, the possession, control or custody of the object and/or its immobilization. It only applies where it has not been excluded by a contracting state declaration under Article 55 and where agreed to by a debtor in the relevant agreement.

There has been some limited debate in the international legal community over the nature of the ‘relief pending final determination’ in the Convention text. In the inaugural issue of this Journal, Gilles Cuniberti suggested that Article 13 could be seen as a hybrid between interim relief and a final remedy,55 a theory that could lead courts and debtors to leverage local pre-CTC interim relief procedures in and around injunctions and standards of proof by, for example, reference to Article 14 and the gap-filling rules of Article 5. The result would be an inconsistent application of Article 13 remedies and, in the worst case, the potential dismantling of this CTC remedy in contravention of general principles which require that remedies be interpreted in a manner that renders them effective. This would have been accentuated by the wide berth given to many judges in weighing issues of fairness or equity in determining access to interim remedies under national systems. Since the Cuniberti paper56 was published, the international legal community and courts generally have become more comfortable with the overriding sui generis nature of Article 13 remedies.57 Indeed, notwithstanding the views expressed by Cuniberti, the specificity of the Convention text, as back-stopped by the application of its general principles, requires that Article 13 be interpreted and applied on its own terms, autonomously from any existing or analogous domestic law concepts.58

Notably, the CTC does not provide courts with any discretion to refuse an Article 13 order or to suspend the effectiveness of an order for a period to allow the default to be cured. The only factual predicate is that the creditor ‘adduces’ evidence of a default in the forum where the Article 13 petition is filed. The Oxford Dictionary defines the verb as to ‘cite in evidence’, as in to provide reasons as opposed to proving the

54 See Wool and Jonovic (n 8) 77.
56 ibid.
58 See Goode (n 8) para 2.98 (‘While Article 13(4) refers to “interim relief” this description was intentionally avoided in the heading to Article 13 and in Article 13(1) so as to make it clear that the relief is a CTC relief and should not be characterised by reference to concepts of municipal procedural law’); Goode (n 8) para 4.109; Veneziano (n 57).
incontrovertible existence of a default. Accordingly, there is no resort to local procedural standards of proof; the creditor merely needs to provide prima facie evidence that the default exists, which can, for example, be in the form of an affidavit of non-payment.

That Article 13 relief is granted ‘pending’ final determination of the creditor’s claim simply means that the proceedings for recovery of the object are ancillary to, or undertaken in parallel with foreign, the main proceedings, which may be commenced either by the creditor or the debtor, presumably in the forum identified in the relevant agreement and having jurisdiction under Article 42. Article 13 does not require that a hearing take place, or that any pending claims be finally determined. In addition, nothing in Article 13 specifically militates for the preservation of the status quo as between the parties. This is because protection of the debtor is intended primarily to be provided by way of compensation following final judgment (which in certain circumstances may be secured by a bond as discussed below).

This makes sense given that Article 13(2) allows courts to impose terms to protect the debtor or other interested persons in the event that the creditor fails to perform its obligations under the CTC or otherwise fails to establish its claim on final determination. This protection can take various forms, including an undertaking to pay damages to the debtor or other interested party, or the provision of a bond or demand guarantee covering potential liability for breach of a CTC obligation (including the obligation to act in a commercially reasonable manner).59 For aircraft objects, following the ‘ex post’ theory of commercial reasonableness noted above, this requirement can be waived in writing by the parties under Article X(5) of the Aircraft Protocol. The courts may also require notice to interested parties under Article 13(3). Under Article 13(4), the creditor remains entitled to other forms of relief, including interim relief, under local law (such as interim payment orders).

Once an Article 13 action is commenced, only the terms of the CTC apply. Article 13(2) therefore must be interpreted on the basis of the Convention text and the above-described gap-filling provisions before resorting to local principles. Article 13(2), if not excluded (see above), gives a court fairly wide discretion with respect to protective measures against a breach by a creditor of its CTC obligations. Some of these measures, including the requirement to post a bond or demand guarantee covering potential creditor liability for a breach of the CTC, can be waived by the debtor in writing under the Aircraft Protocol.60 Such judicial discretion, however, is limited to two specific circumstances: protection against a creditor’s breach of its obligations under the CTC; and failure of the creditor to adduce evidence of its claim, as where the court concludes that the debtor was not in fact in default. The court has no general power to deny an Article 13 petition or to enjoin any repossession pending a trial on the merits, both of which situations would be inconsistent with the text and principles of the CTC.61 Similarly, the statement in Article 13(4) that ‘[n]othing in [Article 13] … limits the availability of forms of interim relief other than those set out in paragraph 1…’ is not a signal that a debtor may counter an Article 13 petition with a request for injunctive relief under national legal principles. Article 13(4) is entirely related to the ‘relief’ available to a creditor and not the defenses available to a debtor. This is a very concrete example of why the CTC empowers courts to be used as a sword and not as a shield.

Role and Limits of Courts: A Case Study
This article concludes with a case study intended to illustrate many of the principles that we have reviewed. It involves a fictitious Mexican airline operating a Mexican-registered aircraft under a New York law-governed finance lease, where the lessor is a Delaware special purpose trust that has granted a New York law mortgage to a commercial lender. We will examine a hypothetical non-judicial repossession scenario while the aircraft is located in Miami, Florida and an Article 13 petition for repossession and control of the aircraft while it is located in Mexico. The below scenario is entirely hypothetical and posited for illustrative purposes only. The authors do not purport to take a definitive position as to how a court would rule in such case, only as to how a court should rule in light of CTC principles.

Factual Background
A Delaware owner-trustee (the ‘Lessor’) leased a Boeing 757 (the ‘Aircraft’) to an airline (the ‘Lessee’), incorporated and located in Mexico for purposes of the CTC. The Aircraft was leased pursuant to a finance lease (the ‘Lease’) that was executed in January 2008 (the ‘Lease’), after the Convention entered into force in Mexico on November 11, 2007. A New York law mortgage (the ‘Mortgage’) was granted by the Lessor in favor of a security trustee for the benefit of a commercial bank (the ‘Security Trustee’). The Mortgage was the first registration made on the International Registry, followed by the Lease. Both the Lease and the Mortgage were translated into Spanish and registered with the Mexican civil aviation authority.

59 Goode (n 8) para 4.111.
60 Article X of the Aircraft Protocol extends Article 13 remedies to sale; it also substantially modifies Article 13 by, for example, preventing a court from imposing a bond requirement if the parties’ contract excludes application of Article 13(2).
61 Goode (n 8) para 4.109.
The parties agreed in the Lease and the Mortgage that these documents would be governed by New York law and submitted to the exclusive jurisdiction of the courts of the State of New York. The Lease was assigned to the Security Trustee and was, by its terms, subject and subordinate to the Mortgage, meaning that in the event of a loan default the Security Trustee was contractually permitted to terminate and avoid the Lease. The parties further agreed that each of the events of default specified in the Lease, including a payment default by the Lessee, were capable of giving rise to the remedies set forth in the CTC and that any default under the Lease would also constitute an event of default under the Mortgage. Remedies under both the Lease and the Mortgage were deemed to be exercised in a ‘commercially reasonable manner’ if carried out in a manner consistent with the New York Uniform Commercial Code (‘NY UCC’). The Lease and the Mortgage also provided that upon a continuing event of default by the Lessee or Lessor, as applicable, the Security Trustee would have the right to terminate the Lease and enter upon the premises where the Aircraft or any part thereof was located and take immediate possession of and remove the same to the fullest extent permitted by applicable law.

**Default and Attempted Self-Help**

Upon the occurrence and continuation of multiple events of default by Lessee, including failure to pay basic rent for several months and failure to maintain the insurance required under the Lease, the Lessor first served a notice of default on the Lessee, and then on May 2, 2017, a notice of termination of the Lease. Notwithstanding the notices, the Lessee continued to operate the Aircraft. On June 5, 2017, after becoming aware that the Aircraft was stored outdoors at Miami International Airport for some routine checks, the Lessor decided to initiate the procedure to repossess the Aircraft by exercising self-help remedies under the CTC.

The Declarations lodged by the United States of America under the Convention at the time of the deposit of its instrument of ratification provide that pursuant to Article 54 of the Convention, ‘all remedies available to the creditor under the Convention or Protocol which are not expressed under the relevant provision thereof to require application to the court may be exercised, in accordance with United States law, without leave of the court.’ New York Courts treat a finance lease as a security agreement for purposes of the CTC and, therefore, in proceedings involving the law of New York, a finance lease falls under the scope of Article 8 of the CTC (as opposed to Article 10). Article 8(3) of the Convention (and Article 1X(3) of the Aircraft Protocol) requires that a secured party exercise remedies in a ‘commercially reasonable’ manner. Specified remedies under the relevant agreement, including notice periods, are deemed to be commercially reasonable except where such provision is ‘manifestly unreasonable’. In this case, the agreement provides that remedies exercised in accordance with the standards of the NY UCC will be deemed commercially reasonable.

A repossession agent was hired who, with the aid of a ground handler, sought to access the Aircraft, attach a notice of repossession from the Lessor to the first front door of the Aircraft, get the aircraft certificates and logbooks stored in the cabin and move the Aircraft to one of the handler’s hangars. The Aircraft, however, was stored in a hangar belonging to a third party.

When the repossession agent arrived at the site, security guards were patrolling the hangar. Unfortunately, the repossession could not occur without breaching the peace.

**Lessee Claim for Injunctive Relief; Resort by Security Trustee to Article 13 Remedies**

With self-help unavailable, the Security Trustee and the Lessor (acting at the direction of the Security Trustee as part of its exercise of remedies under the NY UCC as assignee of the lease and beneficial interest in the lessor) filed a claim in the Supreme Court of the State of New York for breach of contract demanding return of the aircraft. Before the process had been served on the Lessee, the Aircraft was flown away to Cancun. Self-help remedies are not available in Mexico and in acceding to the CTC, Mexico declared that all remedies available to a creditor under the CTC which are not expressed under the relevant provision thereof to require application to the court (including the remedies provided by Article 8 of the Convention) shall not be exercised without leave of the court.

The Lessee then initiated proceedings before the Mexican Federal Court in Cancun seeking pre-emptively to enjoin the Security Trustee or Lessor from exercising remedies on the grounds that the non-consensual repossession of a commercial airliner that is in service is by definition commercially unreasonable, since it would result in passenger disruptions that were not in the public interest. A few days later, the Security Trustee and Lessor filed a counter-claim in the Mexican Federal Court requesting to take possession of the Aircraft pending final determination of the New York case under Article 13(1)(b) of the Convention.

As a legal basis for the counter-claim, the Security Trustee and Lessor sought to establish (1) the applicability of the CTC with connecting factors, (2) the location of the Aircraft in Cancun, (3) the commencement of a case on the merits in New York courts and (4) the wording in the loan and lease documentation where the parties specifically agreed that CTC remedies (including Article 13 remedies) applied following a default. The Security Trustee and Lessor submitted invoices and bank records as evidence of the
existence of a payment default. In objecting to the motion for an injunction, the Security Trustee and Lessor argued that (1) Mexican courts did not have jurisdiction to grant preliminary relief in respect of a matter governed by the CTC, including the creditors’ right to possession of the Aircraft, since the Lessee agreed to submit to New York courts under Article 42; (2) that the Security Trustee and Lessor’s Article 13 claim for speedy relief needed to be evaluated strictly on the basis of the CTC and not on the basis of Mexican legal principles; (3) that any claim that the Security Trustee or Lessor did not act in a commercially reasonable manner had to be assessed separate and apart from the right of the creditor parties to obtain possession under Article 13; and (4) finally, that in any event passenger disruptions were not a sufficient basis under the CTC to preclude Article 13 remedies or for a finding that their actions were not commercially reasonable.

The Lessee in turn asked the court to dismiss the Article 13 counter-claim asserting, inter alia, that the Lessor and the Security Trustee failed to provide evidence of default, that the parties’ choice of law in the Lease and in the Mortgage was invalid under Mexican law, and that the order requested by the Lessor and the Security Trustee, if granted, would violate Mexican law which had to be considered supreme.

Findings of Mexican Court
In first instance, the Fifth District Judge of the State of Quintana Roo dismissed Lessee’s request for a preliminary injunction on the basis that the Security Trustee and Lessor were seeking judicial relief under Article 13 and therefore there was no danger that the Lessee’s rights would be impaired since it would continue to have possession of the Aircraft during pendency of the Article 13 hearing. In doing so, the Mexican court accepted jurisdiction to hear the motion for preliminary injunction, though the basis for that might be argued.

On the matter of the Article 13 counter-claim, the court correctly evaluated the claim on the basis of CTC principles, without resort to the rules on interim attachment orders contained in the Commercial Code (‘Codigo de Comercio’). The court agreed to grant the requested relief subject to requiring a surety to be put in guarantee by the claimants for $250,000 USD pursuant to Article 1182 of the Commercial Code to secure the remaining obligations of the creditor parties to act in a commercially reasonable manner. The court refused to rule as to whether any actions or proposed actions of the creditor parties were commercially reasonable or not, indicating that such an analysis was beyond the scope of the Article 13 procedure and should be assessed as part of the New York proceedings. While the relief granted was generally consistent with Article 13 of the Convention and allowed the creditor parties to recover physical possession of the Aircraft within a few days of filing their claim, the basis for this protective measure should have been Article 13(2) of the Convention as opposed to Mexican law.

Conclusion
The CTC, where supported by contracting state declarations and party intent in their contractual agreements, creates a system whereby courts having jurisdiction over the territory in which an object is located can be used as a ‘sword’ to obtain speedy possession of that object, but cannot be used as a ‘shield’ to delay that repossession activity. Improper shielding actions typically arise from either (1) a failure by courts to enforce the Convention’s substantive remedies (including the issuance of blocking or injunctive orders contrary to the Convention) or (2) the improper application of the Convention’s jurisdictional rules. The principle of autonomous interpretation enshrined in the Convention requires a court to interpret the Convention by reference to its terms and principles instead of by reference to analogous principles of domestic law. The Convention does not give any court general jurisdiction to enjoin repossession remedies on the basis of local law principles or allow a debtor to initiate preemptive injunctive action to block an Article 13 petition prior to any action by a creditor.

Catch Me If You Can: Prelude to an Aircraft Repo

By Paul P. Jebely
March 15, 2017

Introduction
Aviation leasing is a study in the notion that where there is reward, there is risk (which is to say that, sometimes, return on capital becomes more about return of capital). Yet, in an environment where there appears in certain circles to be a barely finite amount of investor confidence (especially among newer investors, and especially in the Far East), it seems that some market participants may occasionally lose sight of the fact that aviation is a risky enterprise. Good lease deals can go bad, and bad lease deals—if, for whatever unfortunate reason, they were done in the first instance—can get far worse.

The worst case scenario of having to “get the plane back” from an uncooperative airline requires adequate consideration, before it is time to get the plane back. Repossession risk in any given lease deal should be a known-known rather than a known-unknown. That said, the actual act of getting the plane back—what is generally considered legal “repossession”—is often the anticlimax that follows the physical detention of the aircraft. It is beyond simple semantics, and not widely appreciated outside of a relatively small circle of in-house and external counsel. Little guidance exists on the very critical step of actually getting the plane, before getting the plane back, by those who have “been there and done that” many times, and look forward to doing it many times again. In that light, the following are some insights that could otherwise only be gained after a great deal of experience actually repossessing aircraft on behalf of lessors (and lenders) worldwide. The following is not exhaustive (and has not been exhausting to write), and is intended for mature audiences.

Prelude to a Prelude to a Repo
There are, of course, many intervening steps between an initial default and a termination of a lease. While not the focus here, experience shows that there are always early warning signs that an airline is in trouble that are overlooked in hindsight. Among these are delayed payments and/or requests to reschedule payments, covenant breaches and/or requests for waiver, failure to undertake required maintenance, failure to maintain insurances, market “chatter,” adverse press articles, fall in share price (if publicly traded), restatement of accounts, failure to provide accounts, new limitations on operating licenses, and so on. In military parlance, it is important for a lessor to stay frosty.

When financial distress does become evident, it is best to start by evaluating the need or possibility of a restructuring or workout, while also beginning to formulate the repossession strategy—or, the proverbial nuclear option: the insolvency strategy. Restructures and workouts are preferred, if the life of the deal is to continue, since they are discreet (reducing risks from other creditors and loss of passenger business), maintain income from aircraft, avoid the need for distressed sale of the aircraft and usually do not involve third party interlopers like pensions regulators, suppliers, unions, et cetera.

It is important to assemble a team consisting of commercial, legal and technical players to analyze the situation at the outset when trouble first arises. If there is a willingness to consider engaging in a restructure or workout such that the life of the deal continues, key considerations are (i) the lessor’s relationship with and total exposure to the airline and (ii) the airline’s prospects for recovery (which should include an objective competitive analysis of its routes, operating costs, equipment, management strength, franchise value, and market/industry position).

At this juncture, a good question to ask is: do we even want the aircraft back? “Get the plane back” is a practically innate reaction, and this question is therefore often-overlooked. This is especially true with older generation aircraft where the cost of repossession negates the benefits in favor of a restructure/workout—or, if the life of the deal is to end early, debt recovery by means other than aircraft repossession. The aircraft value, condition, carrying costs and remarketability are the key considerations in this respect at each stage.

The Best Repossession Is No Repossession
Aircraft repossession is, at best, an unpleasant and disruptive affair. If the life of the deal is to come to an end, then a “friendly return” of the aircraft, ideally in expected return condition, should always be the next option that the parties work toward as part of what amounts to mitigation and a negotiated settlement of the lessor’s losses. Often, however, it is necessary for a lessor to employ the Rooseveltian edict of “speak softly and carry a big stick”—which embodies the principles of coercive diplomacy—to promote friendliness in this context. Use the “carrot and the stick” approach by offering a combination of enticement and threat of harm to...
try and induce the desired “friendly return” behavior. This idiom (a reference to a cart driver dangling a carrot in front of a mule while holding a stick behind the mule) is used in diplomacy to describe the realist concept of “hard power.” It is worth highlighting that it is both carrot and stick (and not carrot or stick) that are to be used. The threat of disruptive, costly (and public) court action itself is likely the most common stick that can be used (and the avoidance thereof can be considered a carrot). In this light, keep in mind that discretion is to be earned by a defaulting party, not assumed.

**“Worst Case Scenario” Strategy**

As soon as it becomes evident that a friendly return is unlikely to be achieved, lessors need to be as strong and aggressive as possible going forward. Once the final decision to repossess has been taken, the time for further indulgences has passed. Map out a final repossession strategy rooted in a clear understanding of commercially rational and legally sound objectives. Do not take or make it personal. The decision to repossess an aircraft and how to do so should be a rational decision, whereby passion and chance are subordinate to commercial and legal reason. Apply the principle of “real options analysis,” and avoid what is known as “negative target fixation.” Successful aircraft repossession requires intelligent strategy and decisive leadership, foremost by lead (internal or external) counsel. Aircraft repossession is a legal task necessitated by commercial failure. It could be argued that the technical aspects are of near-tantamount importance, but this point will be not argued here. In any case, be aware that aircraft repossession can be an all-consuming affair for those involved in the day-to-day handling of the legal, technical and commercial issues that will arise. The decision maker(s) with responsibility for the repossession must be empowered to make quick decisions.

If all else fails—and assuming that the lessor (or lender) actually wants the aircraft back then, by all means, repossess, but focus first on securing physical possession of the aircraft somewhere “nice”—which, as discussed further below, is not just a reference to the jurisdiction’s weather.

**Fresh Eyes**

It is useful at the outset of an aircraft repossession to (re-) analyze the underlying deal documents with fresh eyes (i.e.: with external counsel) and ask the basic questions such as to (i) ascertain what (if any) debt recovery alternatives to repossession may still be available, (ii) confirm when repossession can take place, and (iii) perform a “sanity check” to ensure that there are no relevant defects in the original deal documents that could frustrate the repossession.

**Local Lawyers**

Select the right local counsel because having an adept and experienced local counsel is critical to the success of your repossession efforts. That noted, do not expect any counsel to work miracles. Request an early honest assessment and encourage frankness, because it is critical that expectations be managed and realistic objectives and timelines be formulated.

Do not select counsel based solely on their skills as an apparent fortune-teller, and bear in mind that “tell us what we want hear” is not a productive instruction to local counsel. The most important considerations in appointing the right local counsel are (i) the firm's and lead lawyer's experience in the substantive and procedural law relevant to aircraft repossession, (ii) domestic aviation industry experience/familiarity, and (iii) their fees. The order of importance is as presented.

**Lien In**

Be aware that there are likely to be other creditors, including super-priority creditors that may be able to assert statutory or possessorial liens and/or exercise detention rights over the aircraft. These creditors can present very significant and firm hurdles to effective repossession. Most often, it is best that these creditors, including the airport authority, are paid (rather than fought in the local court) in order to facilitate therepossession, de-registration and re-positioning of the aircraft. In this sense, it is a good idea to hope for the best, but expect the worst. This is especially true when it comes to issues with aviation and airport authorities (which can be a repossessing lessor’s best friend or worst enemy in this context, but seldom in between).

**Location, Location, Location**

To state the obvious: aircraft are designed to cross borders, and almost all (jet) engines are designed to be swapped. In that light, it is critical to determine a friendly venue or venues for repossession, which may not be the state of aircraft registration. Flight schedule visibility is necessary to ascertain when the subject aircraft (and/or engines) may be located in a jurisdiction that is amenable to taking interim subject matter jurisdiction and granting injunctive relief in favor of the repossessing party.

One tried and tested method of persuading courts in common law jurisdictions, for example, is to claim that the tort of conversion is being perpetrated in the jurisdiction in question by virtue of the fact that the aircraft and/or engines are located in such jurisdiction in the possession of the airline despite the fact that the airline’s bailment of the aircraft and engines was terminated following an event of default.
While on the topic of location, the location and status of the aircraft records are of almost tantamount importance. From a logistical perspective, it is critical to have flight schedule visibility and awareness of records location so that arrangements (such as facility and ramp access, and access for contract flight crew) can be made wherever required in advance, including ensuring that ground handling, insurance and storage arrangements are in place.

**Ground and Pound**

The ultimate key to any successful aircraft repossession is usually, first and foremost, physical control of the aircraft in a creditor-friendly jurisdiction. Self-help may not always be available—and even where it is technically available pursuant to local law, it may not be desirable—and so repossession via court action, or multiple court actions in different jurisdictions, may be required. Typically this takes the form of applications for interim injunctive relief. In most cases, the repossession—or, rather, detention—of an aircraft will not immediately secure full possession such that, for example, the lessor can deregister and fly the aircraft away at its will. Regardless, it is almost always in the lessor’s best interest to gain physical (although limited) control of the aircraft without delay. Simple physical control can often be acquired more quickly and therefore less expensively through self-help, freezing/mareva, replevin writ (or other injunctive order) than full possession. A replevin writ enables an interim injunction that orders the airline to return the aircraft to the possession and control of the lessor, pending final judgment or settlement, whereas a freezing order (formerly called a mareva injunction) is an interim injunction that restrains an airline from dealing with the aircraft in order to preserve the aircraft until a final judgment can be enforced.

The lessor will often gain significant leverage in negotiation after securing the detention of the aircraft, even though it has not yet secured actual repossession. Typically at this stage, a defaulting and formerly unfriendly airline becomes highly incentivized to engage in damage control since its strategy to stall the process while continuing to operate the aircraft will have failed. Most often, physical control in this manner yields “friendly return” behavior after the fact, and signals the conclusion of the aircraft repossession—though ongoing debt recovery may continue.

Arbitration of Aviation Disputes in China

By Peter McCullough
September 27, 2018

Aviation Soars in the People's Republic of China
The growth of the aviation sector in the People's Republic of China has not gone unnoticed. The facts speak for themselves.

In 2017 alone, 549 million Chinese passengers travelled by air. This was a year-on-year increase of 7.1%. Similarly, over 7.1 million tons of air cargo were carried. The major OEMs predict that over the next 20 years Chinese airlines will spend in excess of 5 trillion US Dollars on aircraft purchases. It is also predicted that over the same period Chinese airlines will need an extra 5,000 pilots per year – many of whom may be recruited from overseas.

A new mega-airport is under construction to the south of Beijing. Once completed, it will have taken 5 years to build and will boast 8 runways, 268 aircraft parking bays and an amazing 700,000 square meter terminal complex. The airport is designed to handle an initial 120 million passengers a year, but we understand that this impressive capacity may be increased to over 200 million passengers a year, with future expansion plans under consideration.

From Pillsbury’s Hong Kong office, we have witnessed this impressive growth first hand and recognize that there will be many industry participants seeking advice on doing business, and inevitably handling disputes, in this region.

Litigating Aviation Disputes in the PRC
Historically in the People's Republic of China, aviation disputes have been heard in local courts, known as Intermediate People's Courts. If an underlying contract stipulates non-PRC law as the governing law, critical and often determinative issues will come into play. First, an Intermediate People's Court is likely to disregard the parties' choice of foreign law if the transaction is not “foreign related.” Second, even if it the transaction is deemed “foreign related,” the choice of non-PRC law may not be accepted by the court if it determines that to do so would be against “public interests” (which is broadly defined). Third, mandatory provisions of PRC law cannot be waived by contract and will be imposed in any event.

Attempting to resolve a dispute in the PRC courts, as with litigation conducted in most other jurisdictions, may be time consuming and costly. As one might expect, there are procedural rules that must be adhered to. Both parties must be represented by local PRC counsel. If the dispute is of a technical nature, then PRC expert witnesses may also be required to testify. There may also be many volumes of documents and evidence that must be translated into Mandarin Chinese so the presiding judge can read the materials and make a well informed judgment. Given the specialized and technical nature of most aviation disputes, the learning curve is likely to be steep and the opportunity to have an aviation-related dispute heard by a presiding judge with experience in aviation matters may be severely limited.

Furthermore, litigation conducted in the People's Republic of China is quite different from the Western equivalent. In PRC proceedings the presiding judge serves an inquisitorial role, cross-examination and disclosure are limited or nonexistent, and experts are more likely to be appointed by the court rather than the parties. In our experience, these differences often lead non-PRC parties to favor dispute resolution venues other than the PRC courts.

Alternative Dispute Resolution Takes Flight
Two of the traditional benefits of arbitration in the aviation context are that the process is flexible and that it caters well to an industry that operates on an international basis. Litigation is a confrontational process, fought in the public and risks damaging long-standing commercial relationships. This is of particular concern within the close-knit aviation industry.

Although any dispute will involve confrontational elements, parties resorting to arbitration typically benefit from the private and confidential nature of this dispute resolution process. As a result, the very existence of a dispute and the outcome of the arbitration can often be kept out of public view. In addition, arbitration is typically perceived as a neutral forum, as it provides an opportunity for the parties to agree in advance on certain parameters of the arbitral proceedings and to select arbitrators with experience in aviation matters. As a result, parties may have a better chance of receiving a fair hearing and prompt resolution of their dispute.
Arbitration is not only for private commercial parties. It has also been utilized to seek resolution of traffic rights disputes between nation states—a recent example being a referral to the ICAO of the ban on all Qatari-registered aircraft from using the airports and airspace of the UAE, Egypt and Bahrain.

The SHIACA
As the aviation market has expanded in the People’s Republic of China, the number of aviation-related disputes has also increased. A result of this increase is the need for a forum to resolve these disputes locally in a way which is fair, efficient and cost-effective for all concerned.

On 28th August 2014, the Shanghai International Aviation Court of Arbitration (SHIACA) was established as a result of cooperation among the China Air Transport Association, the International Air Transport Association and the Shanghai International Arbitration Centre. The SHIACA is the world’s first arbitration center dedicated to handling aviation disputes. Its aim is to become the premier forum for resolving aviation-related disputes, with a bespoke set of industry-focused procedures which are unique to this institution.

The SHIACA has been structured as a blend of PRC and international arbitration rules to assist with the recognition and enforcement of its awards. The SHIACA is aimed at PRC parties and Western parties alike.

The SHIACA is fittingly located next to Hongqiao International Airport in Shanghai, and provides all the facilities and meeting rooms that parties would come to expect for an arbitration that may last for several days, or even several weeks. There is a roster of ‘panel’ arbitrators comprising local and international aviation and legal experts.

The SHIACA promotes itself as offering expertise in aircraft manufacturing disputes, aircraft transactional disputes, airport ground services and aviation fuel supply disputes, among other areas.

Historically, one of the challenges of resolving disputes involving parties located in the People’s Republic of China was that arbitral awards obtained as a result of non-PRC court or ad hoc tribunal proceedings were not enforceable. This position remains unchanged. The PRC courts continue to recognize only institutional arbitral awards as far as enforcement is concerned. Conducting arbitration proceedings pursuant to the International Chamber of Commerce (ICC) or Hong Kong International Arbitration Centre (HKIAC) rules, or now SHIACA rules, is critical to parties’ ability to resolve commercial disputes involving contractual counterparties based in the People’s Republic of China.

Practice Points
• When drafting an aviation contract involving PRC parties, bear in mind the various forums for dispute resolution—litigation is no longer the only option. The SHIACA, ICC, HKIAC or other institutional arbitral institutions can be designated by agreement as the parties’ dispute resolution forum.
• An arbitration clause should never be an afterthought in an aviation contract, and parties should negotiate these provisions with the idea that a serious dispute could occur.
• As the SHIACA grows in popularity, it is likely to become a go-to venue of choice, boasting increasing numbers of local arbitrators who will have a good understanding of the technical issues that lie at the core of aviation disputes.
• Arbitration is a flexible process—use this to your advantage when trying to solve the dispute.
• Use of the SHIACA may help to reduce your client’s legal costs, beyond the savings otherwise achievable via arbitration. Arbitration in the PRC is typically less expensive than arbitration conducted in other institutional arbitral institutions.
• In the SHIACA, as with most arbitral institutions, you can select your arbitrators and set some of the terms of the arbitral proceedings. These options are not available in the PRC courts. Selecting an arbitrator with experience in the aviation industry will facilitate the efficient resolution of any aviation-related dispute.

World Aircraft Repossession Index 80
Supreme Court Unanimously Clarifies Avoidance Action Exposure

Merit Management increases avoidance action exposure for all recipients of transfers of debtor assets in connection with securities transactions and provides increased leverage to unsecured creditors.

By Leo T. Crowley, Cecily A. Dumas, David S. Forsh
March 1, 2018

Introduction
Section 546(e) of the Bankruptcy Code provides a safe harbor for certain securities transactions from the broad preference and fraudulent transfer avoidance powers available to debtors or trustees under the Bankruptcy Code. However, the scope of the section 546(e) safe harbor has remained uncertain despite considerable litigation. On February 27, 2018, in Merit Management Group, LP v. FTI Consulting, Inc., No. 16-784, 2018 WL 1054879, 583 US, the Supreme Court unanimously resolved a significant circuit split by affirming the Seventh Circuit’s holding in FTI Consulting, Inc. v. Merit Management Group, LP, 830 F.3d 690 (7th Cir. 2016), that section 546(e) does not provide a safe harbor from avoidance under sections 544, 545, 547 or 548 for a transaction merely by being effectuated through a financial intermediary as a conduit. This decision is significant because the existence of colorable avoidance claims is frequently a key factor in restructuring negotiations and value allocation among creditors. By limiting the scope of the section 546(e) safe harbor, the Merit Management decision increases potential avoidance action exposure for recipients of transfers from the debtor and thereby provides unsecured creditors with additional leverage.

Background
The Bankruptcy Code provides broad powers to the bankruptcy estate to avoid and recover prepetition transfers of the debtor’s property that are preferential or are actually or constructively fraudulent. However, section 546(e) provides that the bankruptcy estate may not employ these broad powers to avoid any “settlement payment” or a transfer “in connection with a securities contract” if such payment or transfer is “made by or to (or for the benefit of) a commodity broker, forward contract merchant, stockbroker, financial institution, financial participant, or securities clearing agency” unless such payment or transfer is actually fraudulent under section 548(a)(1) (A). These categories of protected counterparties are terms that are defined in section 101, and the terms “settlement payment” and “securities contract” are defined in section 741 (in particular, any contract for the purchase or sale of a security is within the definition of a “securities contract”).

Avoidance actions sometimes are the only source of recovery for unsecured creditors and therefore are a consideration in allocating value among competing creditor classes. Because many settlement payments or payments in connection with a securities contract are effectuated through an intermediary that is a protected entity under section 546(e), the applicability of this safe harbor is a significant issue in many restructuring contexts. In particular, courts had reached different conclusions on whether a transfer is protected merely by being routed through an entity that is protected under section 546(e) but serves only as an intermediary or conduit for that transfer. The Second, Third, Sixth, Eighth and Tenth Circuits had held that such transfers are protected by the safe harbor, while the Seventh and Eleventh Circuits had held to the contrary.

Some decisions have expanded the effect of section 546(e) even further by relying on its broad language and purpose to preempt other claims that are not explicitly encompassed by the statutory text. While courts have reached varying conclusions on the scope of section 546(e) and on whether its language or key terms are ambiguous, it is broadly acknowledged that this safe harbor, which was first enacted in 1982 in response to a decision exposing a clearing association to potential avoidance liability and subsequently amended in 1984, 2005 and 2006 to encompass additional categories.
of entities and transactions, was intended by Congress to minimize systemic disruption to commodities and securities markets in the event of a major bankruptcy of a participant in those markets.

Discussion
The Merit Management decision resulted from an appeal from the Seventh Circuit’s decision in August 2016 holding that the section 546(e) safe harbor does not protect transfers merely by being effectuated through a financial intermediary. The underlying facts were that Valley View Downs, a racetrack owner, had acquired all shares of a competitor, Bedford Downs, in exchange for $55 million. Valley View Downs arranged to borrow the funds needed for the acquisition, and the funds were wired from Credit Suisse to Citizens Bank, as escrow agent for the Bedford Downs shareholders. Valley View Downs filed for bankruptcy shortly afterwards. Subsequently, FTI Consulting, as trustee of a litigation trust with the Valley View Downs estate claims, commenced an action against Merit Management Group (“Merit”), a 30 percent shareholder in Bedford Downs, seeking to avoid and recover the $16.5 mm consideration paid to Merit as a constructively fraudulent transfer. It was undisputed that the transfer at issue was either a “settlement payment” or a payment made “in connection with a securities contract,” that neither Valley View Downs nor Merit was a financial institution or other protected entity under section 546(e), and that the transfers had passed through Credit Suisse and Citizens Bank, each of which was a financial institution protected under section 546(e). On appeal after the district court had entered judgment on the pleadings in favor of Merit, the Supreme Court disagreed with the majority view and joined the Eleventh Circuit in holding that a transfer of funds is not “made by or to (or for the benefit of)” a financial institution for purposes of section 546(e) merely because the funds pass through a financial institution acting as a conduit.

In a 9-0 decision, the Supreme Court affirmed the Seventh Circuit’s judgment and held that the relevant transfer for determining the applicability of the section 546(e) safe harbor is the transfer to be avoided by the bankruptcy trustee, rather than any “component parts” of that transfer. The Supreme Court did not find section 546(e) to be ambiguous and reached its decision based on “the language of §546(e), the specific context in which that language is used, and the broader statutory structure” of the avoidance powers and safe harbor. Notably, the Supreme Court pointed out in a footnote that a financial institution is defined to include, among other things, “. . . when any such Federal reserve bank, receiver, liquidating agent, conservator or [commercial or savings bank, industrial savings bank, savings and loan association, trust company, or federally-insured credit union] is acting as agent or custodian for a customer . . . such customer,” but that neither party contended that Merit was a “financial institution” under such definition. The Supreme Court rejected Merit’s policy-based argument for broad applicability of section 546(e), that the safe harbor was intended to encompass all transactions made through a protected entity in order to promote finality in the securities markets, as being inconsistent with the statutory text.

Implications
Merit Management eliminates a significant limitation on potential avoidance action exposure. However, many potential defendants—and some of the deepest pockets—may fall within one of the categories of protected entities under section 546(e), namely, commodity brokers, forward contract merchants, stockbrokers, financial institutions, financial participants, or securities clearing agencies. In particular, some potential defendants may qualify as financial participants, which may be satisfied by, among other things, having gross mark-to-market positions of at least $100 million in securities contracts with the debtor or other non-affiliated entities at any time in the 15 months prior to the petition date. All market participants should review their qualifications (or those of their investment vehicles) for such protected status, and should consider the “customer as financial institution” argument explicitly not addressed by the Supreme Court. The exposure is likely greatest for smaller investment vehicles or stockholders receiving distributions or being bought out in a leveraged buyout scenario. This risk may prompt such investors to trade out of positions shortly before a transaction that may expose the holder to avoidance action risk even if such trade is effectuated at some discount to the consideration being offered for such transaction. Overall, the decision is likely to lead to additional litigation as these issues are developed and may provide additional opportunities in the distressed space.

US Court Favors Aircraft Financier in Non-Citizen Trust Case

District court case shines a light on the extent and limits of a lender’s duties in both structuring loan transactions and exercising remedies.

By Melissa B. Jones-Prus
February 1, 2018

The case shines a light on the extent and limits of a lender’s duties in both structuring loan transactions and exercising remedies. In this case, a Brazilian citizen used an owner trust to obtain a US aircraft registration and avoid payment of Brazilian taxes. The aircraft was later confiscated by the Brazilian government, and the lender, unable to foreclose on its collateral, sued the debtors and the insurers. The lender, while ultimately successful, had to defend arguments that it (1) negligently misrepresented that the ownership structure complied with Brazilian laws, (2) failed to mitigate its damages and (3) impaired the collateral.

Aircraft Seized by Brazilian Authorities for Tax Evasion

In 2009, Neto, a Brazilian citizen, hired Wells Fargo to act as owner trustee of an aircraft trust. A company affiliated with Neto, Quest Trading LLC, was the beneficial owner of the aircraft under the trust agreement. Neto created the trust in order to purchase a Dassault Falcon 2000 business jet and register it with the US Federal Aviation Administration. The aircraft was based in and flown predominantly within Brazil for Neto’s personal use. In January 2011, Neto caused Wells Fargo to borrow $6 million from 1st Source Bank and pledged the aircraft to the lender as collateral. Neto also issued a personal guarantee of the loan obligations to the lender.

In June 2012, the Brazilian authorities confiscated the plane, alleging that the US registration and trust ownership of the aircraft had been improperly used to avoid the payment of Brazilian import tax. In September 2014, the borrower ceased making payments on the loan to 1st Source Bank. 1st Source Bank then accelerated the loan. When the loan was not repaid, the lender filed a suit against the borrower and the guarantor, and also brought a claim against the aircraft’s insurer for losses arising from government confiscation. The lender recovered over $3 million from the insurer, and sought summary judgment against the borrower and the guarantor for the remaining unpaid debt balance.

Lender Not Liable for Seizure

The borrower and Neto counterclaimed against 1st Source Bank for negligent misrepresentation, asserting that the lender had advised them that Brazilian laws permitted their contemplated use of the aircraft with a US registration and trust ownership structure. To support this argument, Neto pointed to language in the term sheet stating that the lender believed the terms of the financing to fall within applicable US and Brazilian laws, and that the borrower would be responsible for all taxes and duties associated with operating the aircraft. He also argued that he had relied on the fact that 1st Source Bank issued the loan to imply that the structure and contemplated use of the aircraft was permitted under Brazilian laws. The court rejected the counterclaim, noting that Neto had established the trust structure prior to seeking the loan and that the term sheet language could not be construed as advice on the legality of the aircraft’s registration or ownership structure. The court also noted that there was no evidence that the lender was aware that the aircraft would not be used for business purposes—the basis for its seizure in Brazil.
Lender Not Obligated to Further Pursue Brazilian Government and Insurer

Finally, the borrower and Neto raised two defenses to 1st Source Bank’s claim—impairment of collateral and failure to mitigate damages—both of which were rejected by the court.

The defendants argued that the lender should have done more to secure the release of the plane by the Brazilian government, and that their failure to do so had impaired the collateral. The court rejected the defense, noting that Neto, and not 1st Source Bank, was responsible for the aircraft’s seizure, and that 1st Source Bank had done all that it could to obtain its release. These efforts included warning Neto that Brazilian-operated aircraft registered in the US were being confiscated by the Brazilian authorities as soon as it learned of this development—a warning that Neto did not heed. Once the plane was seized, the lender also successfully prevented the Brazilian authorities from selling the aircraft by notifying them of its security interest. The court observed that the defendants did not suggest any other actions that 1st Source Bank could have taken, particularly given that the Brazilian government had refused to release the aircraft for anything less than its full market value plus the import tax payable.

The borrower and Neto also claimed that 1st Source Bank failed to mitigate its damages by settling the insurance claim for less than 100 percent of the outstanding loan balance. The court rejected this argument on the basis that the duty to minimize losses does not give rise to a duty to collect the loss from anyone in particular. The court further noted that 1st Source Bank was not contractually bound to seek payment from the insurer before calling on the guarantee.

Conclusion

This case serves as a useful reminder that borrowers should take care and responsibility in structuring the tax and cross-border aspects of their aircraft ownership arrangements. It also illustrates how the law will protect lenders who take commercially reasonable measures to enforce their security and mitigate their damages.

Rising interest rates, shrinking yields, increasing volatility in financial markets, heightened trade wars and regulatory changes pose new challenges in relation to financing and refinancing transactions. Market players have found scarcity in capital heightened and risk frequently repriced which makes it increasingly challenging to close asset finance transactions. Along with the ten-year anniversary of the 2008 global financial crisis, we thought it was about time to remind our clients and friends of the necessity of being well prepared for an unexpected downturn. This winter survival guide is designed to explore a few common issues that may be relevant to restructuring asset based loans and aircraft leases in challenging markets.

PART 1: Navigating an Asset Finance Restructure

What does it take to restructure a finance document? The most common mechanisms used to effect modification of financing agreements are:

Consents and waivers
Consents and waivers are most commonly used to deal with a past or present non-material breach or a course of action that would otherwise be prohibited under a set of finance documents. For example, a consent and waiver could be utilized to address a failure to deliver financial statements on time or document the consents necessary for internal restructuring purposes.

Amendment and Restatement Agreements
An amendment agreement could be used to effect permanent changes to a finance agreement, such as adding or altering the debt service coverage ratio, debt to tangible net worth ratio or minimum working capital/tangible net worth requirement. In this case, the loan documentation would comprise both the original agreement and the amendment agreement.

The amendment and restatement of the original financing or security instrument itself
In the alternative, where the proposed modifications are extensive, the original finance agreement itself could be amended and restated in full, thereby replacing the original agreement in its entirety.

Three items to watch out for in any form of modification

Implied Waivers: It is always prudent to review the complete set of financing documents with a fresh pair of eyes.

Breakage Costs: Don’t forget to ensure these costs are fully considered (including any associated derivative hedge positions).

Monitoring Capabilities: Take care to ensure these are feasible, in particular if the proposed modification imposes covenants that require proactive monitoring, such as financial covenants.

Before putting pen to paper…

Is lender consent required?
In most cases, consent is required from the affected lenders and the finance documents will specify the requisite level, which may be majority consent (simple or supermajority) or unanimous consent. The question of whether a particular loan facility is affected by an action or event, is determined by reference to the specific facts of the matter and the terms of the documentation. If class voting is required, it will likely be cost effective to engage the class members early with a view to arriving at a consensus prior to implementing restructuring. In most cases, engaging the right professionals to assist in this process is critical to facilitating a successful outcome. In certain jurisdictions, the borrower is permitted to offer incentives to lenders to consent to amendments.

How burdensome are closing logistics?
Cost is often an issue in restructuring and refinancing transactions. We are often asked whether the customary closing documentation, such as legal opinions (covering various jurisdictions), board resolutions, solvency certificates, good standing certificates and secretary’s certificates are required. Undoubtedly, there is room to limit the number of conditions precedent to closing, but this approach does not come without risk. That said, at a bare minimum, we would expect the finance parties to receive (i) confirmation from each obligor, in the form of a director’s certificate, that there are no other defaults or event of default continuing, (ii) confirmation of the amount of outstanding indebtedness and (iii) certified copies of corporate authorizations and evidence that such corporate authorizations have been executed appropriately. The corporate resolutions prepared in the
original financing transaction may extend to authorizing such obligors to enter into subsequent amendments. However, if there is doubt as to an obligor’s authorization to enter into restructuring agreements, new corporate authorizations should be provided.

**Are my guarantees still enforceable?**

For further information on the topic of preserving guarantees, please see Practice Tip “How Not to Lose a Guarantee” on page 135. This practice tip highlights the importance of checking the terms of each guarantee to ensure any changes to the guaranteed agreements will not affect the enforceability of that guarantee. In most cases, obtaining a simple written reaffirmation or acknowledgement from a guarantor provides the necessary legal support to give the relevant finance parties sufficient comfort to proceed with restructuring.

**Will any provisions in the finance documents be invalidated in the borrower’s insolvency?**

This is often assumed otherwise in commoditized or market standard documentation. Two common problematic issues are (i) claw back clauses and (ii) *ipso facto* clauses. Claw back clauses are “avoidance” actions taken by an insolvency officeholder that seek to set aside or unwind certain transactions in the event of an insolvency, such as those transactions where unfair or undue preference was given, or an asset was sold at a below market price. *Ipso facto* clauses are those which try to alter the relationship between contractual parties in the event of an insolvency. These clauses are often prohibited by bankruptcy law. These provisions may make an enforcement action problematic once a borrower faces distress.

**PART 2: Exploring an Aircraft Lease Restructure**

This part focuses on key issues arising in the negotiation or restructuring of aircraft operating leases in challenging economic environments. While many aircraft lessors tend to follow their “house standard” leases to maintain contractual consistency within their fleet, there are inevitably departures from any standard form due to the requirements of various lessees. Furthermore, operational and legal risk differ from jurisdiction to jurisdiction and should be carefully managed to limit exposure to economic downturns.

**Revisiting key economic terms**

Certain economic terms should be revisited, such as length of lease and payment terms. Common payment terms in operating leases include requirements for security deposits, rent, maintenance reserves and for lessees to pay other costs such as hangar rentals, customs, taxes and aviation authority fees. Lessors should be aware of the implications on the choice of terminology, such as “security deposit” versus “commitment fee” or “maintenance reserves” versus “supplement rent” which may have different treatment in the case of bankruptcy of the lessee. In practical terms, lessors should monitor lessee compliance closely and take effective action if any payment arrears or irregularities are identified. It is also worth noting that contractual provisions that are deemed to impose a “penalty” for late payments or other failure to perform may not be enforceable in certain jurisdictions. As a matter of English law, in order to avoid “penalty” clauses, a provision will need to provide for a “genuine pre-estimate of loss” rather than a proportionate increase in lease payments. In the event that the lessee is subject to insolvency proceedings, operating leases are usually regarded as executory contracts and the continuation of these agreements may be subject to specific rules governing the management of the lessee estate while subject to bankruptcy proceedings. For example, a “security deposit” may be deemed by a bankruptcy court to be funds belonging to the debtor’s estate, while a “commitment fee” may not. In addition, lessors may be stayed for a limited time from exercising remedies against a lessee, such as repossessing an aircraft on lease, under bankruptcy laws.

**Understanding redelivery conditions**

It is important to ensure that provisions relating to the required redelivery or return condition are clear and unambiguous so that both parties are clear as to what the lease requires. In many cases, early engagement between the lessor and lessee will enable the return process to be properly managed and will allow sufficient time for the parties to resolve issues before a dispute arises.

**Maintenance reserves**

Maintenance reserves are designed to ensure that sufficient funds are available to pay for the cost of major scheduled aircraft maintenance, typically relating to the airframe, engines, landing gear, APU and certain life-limited parts. Payment terms are often determined as a result of the creditworthiness of the lessee. In the context of making maintenance payments to lessees from the “maintenance reserves”, lessors should consider (i) any amounts paid to a lessee in advance of maintenance work being complete and the extent to which they may be at risk and (ii) the likelihood of any liens being imposed by a maintenance performer in respect of payments owed by a lessee that are not related to the lessor’s aircraft. As a practical matter, lessors should consider having a back-up maintenance facility available if a defaulting lessee appears unable to return an aircraft in the lease-required condition, in order to facilitate a swift transition of the aircraft to the next lessee under contract.

**Defaults, event of defaults and termination events**

There is often confusion over the subtle but necessary difference between “default” and “event of default” as the former will trigger the lessor’s right to exercise remedies only if any grace period provided has expired or a determination...
or notice by the lessor has been provided. Generally speaking, “defaults” are attributable to actions within a lessee’s control. Leases may also contain cross-default provisions that give the lessor the right to exercise remedies as a result of a default by the lessee under another contract entered into by the lessee. One final point on the exercise of remedies is that lessors may have a duty to mitigate their damages under the law.

**Keeping the finance parties informed**

It is likely that finance parties' consent will be required in connection with a lease restructuring. As a result, it is a good idea to engage any relevant finance parties early, to help avoid unexpected financier requirements that could result in closing delays.

**Operational and tax indemnities**

Operating leases generally provide that the lessee indemnifies the lessor for operational risks and tax risks. Treating such critical provisions as “boilerplate” or overlooking them in a restructuring scenario would be a grave mistake. Indemnity provisions need to be carefully reviewed to ensure that the indemnitees obtain the full benefit of these important contractual provisions.

**PART 3: Tightening the Security Package**

As a risk management measure, it is often advisable to consider whether the finance parties' rights are in any way impaired (or otherwise vulnerable) in the loan documentation and security package. The starting point is to review the loan agreement, the aircraft mortgage and the ancillary security documents. It is important to note that the security package will vary depending on the nature of the transaction, but usually we expect an aircraft mortgage (or assignment), security over maintenance reserves, a charge over shares in the borrower, assignments of airframe and engine warranties and assignments of insurances in favour of the finance parties. There are a few key areas that finance parties should carefully consider to help avoid a deficient security package.

**Description of aircraft**

If the description of an aircraft is overlooked at the time of granting security, it may become an issue when enforcing the finance parties’ rights. It is important to ensure security documentation fully and accurately describes the aircraft, with accurate references to the airframe, engines, manuals and technical records. A review of the mortgage/security assignment should be performed in order to ensure that the security granted is enforceable so the finance parties will have the right to, inter alia, repossess and sell the aircraft (i) on default; or (ii) following an acceleration of the loan. In some jurisdictions, it is worth noting that a local law mortgage is not permitted to be taken over an aircraft and alternative forms of security will need to be considered and their effectiveness assessed.

**Security over maintenance reserves**

This is usually stated to be supplemental or additional rent, which is the sole property of the lessor (with the intent to cover certain heavy maintenance events). If (contrary to the intent of the parties) the supplemental or additional rent is held as “maintenance reserves,” it is advisable that a first priority charge is granted over it. That said, this may be seen by a court as defensive and effectively as an admission that the sums involved are indeed reserves and the property of the lessee.

**PDP financing**

In the case of pre-delivery payment financing, the security package includes an assignment of the aircraft purchase agreement (and often the engine general terms agreement, if any). These security assignments will come into play in the event of a transfer, or a default or insolvency of the purchaser. It is important to consider the cross-border impact of these arrangements and the jurisdiction of incorporation of the purchaser, including any adverse results that may arise in the event of a purchaser insolvency.

**Legal opinions**

It is advisable to obtain certain legal opinions when primary security documents are entered into. We would expect such legal opinions to cover (i) the obligor's (including the borrower, guarantor and any third party security providers) jurisdiction, (ii) the jurisdiction of the registration of the aircraft and (iii) the jurisdiction where the aircraft was located at the effective time of the creation of the security interest. It is important to bear in mind that each legal opinion is only valid on the date on which it is signed and should reflect the position of the law as of such date.

**Perfection/registration**

The failure to perfect a charge may render a charge void as against a liquidator or creditor of the company (in the case of English law). Accordingly, it is important to ensure there are no issues with perfection or registration of the security package. For example, if the lease provides that a security deposit or maintenance reserves are held as assets of the lessee and charged in favour of the lessor, then in the lessee's bankruptcy these amounts would likely be treated as part of the lessee's estate. As a result, the disposition of these assets would depend on whether the security in favour of the lessor was properly granted, perfected and/or registered. More specifically, the lessor will have to show that the charge was properly perfected in order to recover these amounts. A registration on the International Registry of Mobile Assets (where applicable) is also recommended to be made in order to ensure protection for secured parties.
PART 4: Enforcement Considerations
Terminating an operating lease for breach is one way that the contractual relationship between the lessor and lessee may conclude. If a creditor decides to repossesses an aircraft to seek satisfaction of its debt, then the first step is to consider the implications of enforcement (such as the impact on the business relationship with the debtor), the cost of the repossession, and the amount the creditor is likely to recover from selling or otherwise disposing of the aircraft. The following are some practical issues to consider.

Notice of default
The specific form, timing, addresses and methods provided for in the finance documents should be adhered to. It is also advisable to specify the relevant events of default and note the finance parties’ intention to enforce its security (i.e. on the basis of the aircraft mortgage, security assignment or lease agreement).

Is a court order required?
In certain jurisdictions, creditors may exercise default remedies under the Cape Town Convention, such as (i) taking possession or control of the aircraft in order to resell or lease the aircraft or (ii) procuring the de-registration, export and removal of the aircraft from the territory in which it is located, without a court order. In other jurisdictions, aircraft repossession cannot proceed without a court order. A finance party may seek a court order when their repossession action involves an uncooperative debtor, a questionable basis upon which to exercise remedies, defects in finance documents or where an expedient sale is required.

Insurance coverage
In addition to arranging for aircraft maintenance following repossession, finance parties and lessors should ensure that appropriate insurance coverage is in place in order to allow for possession and transportation of a repossessed aircraft.

Competing interests
A security review may uncover potential liens that could impact the ability to repossess an aircraft, such as Eurocontrol liens, tax liens or other regulatory charges. If engines owned by a third party are installed on an aircraft to be repossessed, recognition of rights agreements and other contractual arrangements will need to be reviewed to determine what actions can be taken without violating other parties’ property rights.

Distribution of proceeds
While it may seem intuitive that any surplus proceeds from a sale go directly to the borrower, this is often not the case. Depending on the facts, proceeds of a sale may already be pledged as collateral for one or more other debts, so finance parties should consider any benefit they are entitled to under these circumstances. If required, an aircraft foreclosure sale should be coordinated with the borrower. In addition, in some jurisdictions there is a duty to mitigate losses. In any event, foreclosure sales should always be handled with care and on the basis of competent legal advice.

Gibraltar’s Financial Services Regulator Adopts First-Ever Purpose-Built Blockchain Regulations

Firms in Gibraltar which use distributed ledger technology to store or transmit value belonging to others must now be appropriately licensed.

By Tim Wright, Samuel J. Pearse
February 6, 2018

Gibraltar has become the first jurisdiction worldwide to offer a fully regulated framework for firms working with distributed ledger technology (DLT)—also known as blockchain. The new regulatory framework means that FinTech and other firms in Gibraltar which want to use DLT for transmitting payments, recording transactions and similar use cases will now need to be licensed by the GFSC in much the same way that banks are authorised.

“We are really excited to finally welcome applications from DLT Providers. The team expect to be very busy in the coming months, and are looking forward to working on some interesting and innovative ideas with applicants. Working closely and collaboratively with the financial services industry and the Government of Gibraltar has resulted in the GFSC becoming the first regulator to introduce a DLT Regulatory Framework—it is a very encouraging time and we are also looking forward to the challenge!” —Nicky Gomez, Head of Risk and Innovation, GFSC

Regulatory Framework
Rather than adopting hard and fast rules which can quickly become outdated and unfit for purpose, the GFSC felt that a flexible and adaptive approach was called for in order to regulate DLT Providers whose businesses are based on rapidly evolving technology. Accordingly, the DLT Regulatory Framework is an outcomes-focused, principles-based regulatory framework based around nine regulatory principles.

According to these principles, a DLT Provider must:

• Conduct its business with honesty and integrity.
• Pay due regard to the interests and needs of its customers and communicate with them in a way which is fair, clear and not misleading.
• Maintain adequate financial and non-financial resources.
• Manage and control its business effectively, and conduct its business with due skill, care and diligence; including having proper regard to risks to its business and customers.
• Implement effective arrangements for the protection of client assets and money when it is responsible for them.
• Have effective corporate governance arrangements.
• Ensure that all systems and security access protocols are maintained to appropriate high standards.
• Implement systems to prevent, detect and disclose financial crime risks such as money laundering and terrorist financing.
• Have adequate business continuity, disaster recovery and crisis management plans in place, as well as contingency plans for the orderly and solvent wind down of its business.

The GFSC’s guidance notes on these principles, together with further information about the regulatory framework, are available on its website.

Authorisation Process
GFSC will apply a risk-based approach to all aspects of the authorisation process, which it says will be streamlined, consistent, fair and efficient. Applicants can expect the assessment process to take three months but are advised to engage early with the Risk and Innovation team at the GFSC prior to making an application and to seek appropriate advice. Applicants should then make an application for an initial assessment, before proceeding (if given the green light) to the full application process.

The full application process requires applicants to submit a complete application and to make a presentation which
addresses any specific requirements of the GFSC based on the nature and complexity of the proposed business and which were identified at the initial assessment stage, as well as:

- the background of the key individuals involved in the business;
- the business plan, including corporate structure, products and services, target market and strategy;
- the firm’s financial projections; and
- evidence of how the firm will meet the nine regulatory principles.

Once a licence has been granted, GFSC will make an onsite visit that will give the firm the opportunity to present evidence to the GFSC that the processes and controls implemented and communicated during the presentation are effective and work in practice.

**Transitional Arrangements**

Any firm wanting to carry out DLT activities from 1 January 2018 must to apply to the GFSC for authorisation and will not be allowed to carry out the activities until a licence to operate as a DLT Provider is granted. Firms already carrying out DLT activities in or from within Gibraltar should make use of transitional arrangements which require them to submit a complete application to the GFSC by the 31 March 2018. Whilst their application is under consideration, they will be allowed to continue to operate pending a decision. Firms which fail to use the transitional arrangements will have to cease carrying out DLT activities on 31 March.

**Final Remarks**

The GFSC is well known for facilitating innovation whilst maintaining a strong regulatory presence. Gibraltar is already popular with insurance and gaming businesses and now hopes to attract FinTech firms to a growing and well-supported DLT and crypto ecosystem in the British Overseas Territory as it prepares for Brexit.

The GFSC has also announced plans to expand the framework to cover initial coin offerings (ICOs) on a DLT shortly. The EU-regulated Gibraltar Stock Exchange has announced that it will launch the Gibraltar Blockchain Exchange to provide a cryptocurrency exchange which abides by the governance standards of a regulated exchange. This is a notable development and is another component in the drive by the GFSC to be forward thinking. Whilst, for the time-being, the UK’s FCA has decided not to issue specific regulations on the basis that the current regime is sufficient at present, other countries including Malta and Estonia are set to follow Gibraltar and adopt their own DLT regulatory frameworks in early 2018.

How Not to Lose a Guarantee

By Eugene Yeung  
April 5, 2018

**Key takeaways:**

— Lenders should not assume a market standard guarantee (e.g. an LMA guarantee) will not be discharged when the guaranteed finance documents are amended or restated

— Guarantors should contemporaneously acknowledge and consent to the variation agreement/deed

— If in doubt, consider adding a new guarantee clause or a fresh standalone guarantee

**Amendments and the Purview Doctrine**

Amendments to finance documents in syndicated lending are common, and parties may overlook whether or not an existing third-party guarantee will survive such amendments. The “purview doctrine,”1 provides that if the amended terms in a guaranteed agreement are fundamentally different from the terms in the original guaranteed agreement, the amended terms may be regarded as outside the “purview” of the original guarantee. If this occurs, a creditor will need to enter into a separate agreement with the guarantor for the guarantee of these additional contractual terms. In most cases, a properly drafted guarantee permits variations to the underlying obligations without the surety being discharged.

In the English case of *Triodos v Dobbs*², the guarantor successfully argued that, despite having a broad “anti-discharge” provision in the original finance documents whereby the parties had agreed that the guarantee would not be affected by any variation of the primary obligations, the court found the nature of the principal contract to be “so fundamental that they could not properly be described as a variation at all” and hence “fell outside the general purview of the original guarantee.”

While contracting parties often take comfort that the market standard LMA guarantee is sufficient to ensure that the included guarantee will continue to be effective despite variation to the terms of the original finance documents, it is best practice to consider asking the guarantor to contemporaneously consent to any such amendment and confirm that its guarantee will extend to the amended obligations. The effect of a written confirmation can be regarded as a cost-effective alternative to re-taking security in the sense that: (i) it shows the surety’s consent, (ii) it operates as a representation establishing an estoppel concerning the scope of the guarantee and (iii) it operates as a contractual estoppel if the variation is supported by consideration or executed as a deed. The caveat is that under English law such written confirmation may be construed as a “transaction” and may be vulnerable to an avoidance action pursuant to the Insolvency Act 1986.

**The alternatives**

In some cases, it may not be practical for creditors to obtain a surety’s consent to every amendment or variation to the guaranteed agreement(s). Another option is to have the original finance documents include some form of indemnity combined with a guarantee, such that the indemnity will continue to be unaffected by the changes to the original finance document. It is not uncommon for such an indemnity against non-payment or non-performance to be subject to a cap.

**Other practicalities**

In cases where an LMA form of guarantee is not used, or is substantively amended, the “anti-discharge” language should be clear and specific, such that there is no ambiguity that the guarantor has waived any defense that it should be discharged from its obligations in the event of a variation to the guaranteed obligations. Another alternative to consider is a free-standing all money guarantee from the surety that covers not only present but future liabilities, as a surety may be liable for substantially increased obligations under this type of arrangement despite not explicitly having consented to them.³

World Aircraft Repossession Index 148
You decided to buy a private aircraft. Before getting on the runway, you must be mindful that aircraft acquisition requires comprehensive planning and raises a number of difficult questions: Will the aircraft be acquired by your business? If not, will it be acquired by your family office? What are the potential liability risks? What are the tax consequences of the purchase? How should the purchase be structured? What are the costs of regulatory compliance?

To add to the complexity, the Tax Cuts and Jobs Act of 2017 (hereinafter, the “Act”) significantly altered the landscape of private aircraft acquisitions and ownership by eliminating tax-free exchanges under Internal Revenue Code § 1031, modifying the depreciation rules applicable to aircraft and limiting the deductibility of business entertainment and commuting expenses.

To maximize federal income tax benefits and develop an ownership plan most beneficial for your needs, thoughtful planning and the help of competent professionals who will guide you through any potential pitfalls will ensure that your dream of aircraft ownership takes off.

**Structure of Aircraft Acquisition**

Before the acquisition is made, careful consideration should be given to the ownership structure that will be utilized. As you will see, significant tax benefits—or significant tax liability—will flow from this crucial determination.

Typically, the aircraft will be owned and operated by the business of the acquirer. As a result, the operating costs associated with the aircraft are incidental to the company’s business and deductible under Section 162 of the Internal Revenue Code (hereinafter, the “Code”) as ordinary and necessary expenses paid or incurred in carrying on a trade or business. In many cases, the aircraft is owned by a special purpose entity that is wholly owned by the taxpayer's business. The special purpose entity may be a limited liability company or an S-corporation which not only purchases and operates the aircraft but also employs the crew, pays the aircraft vendors, and dry leases the aircraft to the business.

Thoughtful planning regarding the structure of the acquisition is even more critical when the entity acquiring the aircraft is a family office. In general, a family office is a family controlled investment vehicle which allows the family members to retain direct control over the family’s assets. The family office provides significant economies of scale for the family by providing services in areas such as investment management, tax planning and estate planning.

With proper planning, a family office may be respected as a “trade or business” under the Code. While not defined in the Code, case law describes a trade or business as a continuous and regular activity the owner engages in to earn income or make a profit. Being engaged in a trade or business is very important as significant tax advantages flow from this determination. Notably, in the case of a family office that owns a private aircraft, the family office could deduct the expenses related to the aircraft under Code § 162 which allows deductions for ordinary and necessary trade or business expenses paid or incurred during the course of a taxable year. Without such designation, these expenses can only be deducted under Code § 212 which governs the deductibility of expenses relating to investment activities. Historically, this has been a critical distinction as deductions under Code § 212 were only partially deductible as miscellaneous itemized deductions and is even more critical under the Act as miscellaneous itemized deductions are no longer deductible.

As a result, if the family office is respected as a trade or business, costs associated with the aircraft will be treated as above-the-line fully deductible trade or business expenses rather than non-deductible expenses (miscellaneous itemized deductions). Of even more significance, qualifying as a trade or business may allow the family office to deduct 100% of the cost of the aircraft in the year it is acquired under the new rules related to bonus depreciation which will be discussed in greater detail later in this article.

The recent Lender Management decision should serve as guidance on how to properly structure a family office as...
the Tax Court found that the activities of the family office were sufficient to constitute a trade or business. In Lender Management, LLC v. Comm’r, T.C. Memo. 2017-246, the family office provided investment management and financial planning services to three investment limited liability companies, the beneficial owners of which were other family members. Although a familial relationship existed between the owners of the family office and the owners of the investment limited liability companies, the Court found that the family office was carrying on a trade or business because it “carried on its operations in a continuous and businesslike manner for the purpose of earning a profit, and it provided valuable services to clients for compensation.” The Court also emphasized that that the family office provided individual investors in the investment limited liability companies with investment advisory and financial planning services, employed full-time employees including a CFO who oversaw all financial accounting, and that the family office not only received a return on its investment, but also compensation attributable to the services it rendered in the form of profits interests in the investment partnerships it advised.

A well-structured acquisition plan also allows a taxpayer to save—and possibly avoid—state sales and use taxes. Many aircraft sales are not subject to sales tax as long as the acquirer takes delivery of the aircraft in a tax-friendly jurisdiction. The key is to determine which jurisdiction most efficiently caters to the needs of the taxpayer. For example, an acquirer may seek to close on the purchase while the acquirer is on the ground in a state that does not have a general sales tax. Alternatively, the owner may take delivery in a state that exempts aircraft from sales tax altogether. Another option is to deliver the aircraft in a state that has enacted a “fly-away” exemption for aircraft sales. The “fly-away” exemption may be available only if the aircraft is based in another state after the sale, removed from the state promptly after the sale, and does not return to the state for a certain period of time. Failing to fully comply with the “fly-away” exemption requirements may result in considerable tax liability for the aircraft owner.

Use tax may be imposed regardless of where the owner takes delivery of the aircraft as the application of use tax depends on where the aircraft is based or used most frequently. Laws regarding use tax vary significantly from state to state as some states exempt aircraft from such tax while others do not have such tax.

**The Tax Cuts and Jobs Act of 2017**

The Act significantly altered the landscape surrounding the acquisition and ownership of private aircraft. At first blush, many of the changes seem to benefit the private aircraft owner or acquirer, but a closer inspection reveals that there are many potential pitfalls. As a result, these issues should be carefully explored through consultations with competent professionals.

Before the Act, Code § 1031 provided that no gain or loss was recognized when property held for productive use in the taxpayer’s trade or business was exchanged for property that was “like-kind.” Under the former § 1031, if an aircraft used in a taxpayer’s trade or business was sold to trade up, the taxpayer could utilize this provision to essentially defer the gain on the sale. This is no longer the case as the Act modified Code § 1031 to only permit like-kind exchanges of real property. Although this change is quite significant, the impact of the elimination of like-kind exchanges can be mitigated by the new bonus depreciation rules.

Under the Act, 100% of the cost of an aircraft used in a trade or business may be depreciated during the first year of ownership (hereinafter referred to as “bonus depreciation”). These new rules apply to purchases of either new or pre-owned aircraft acquired and placed in service after September 27, 2017 but before January 1, 2023. If the aircraft does not qualify for bonus depreciation, its acquisition cost will be depreciated using the straight line method.

In order to qualify for bonus depreciation under the Act, the taxpayer must comply with the stringent and complex provisions of Code § 280F which limits the allowable depreciation deduction where the property is not predominantly used in a “qualified business use.” In general, property is treated as predominantly used in a qualified business use if the business use for the year exceeds 50%. A “qualified business use” is any use in the taxpayer’s trade or business, but is subject to some notable exceptions. In the case of an aircraft, qualified business use does not include (1) flights provided as compensation to other service providers, unless the flights were included in such service providers’ gross income. In addition, qualified business use does not include leasing to a 5% or more owner or related party. If, after application of the above exceptions, at least 25% of the use of the aircraft is qualified business use, the exceptions will not apply for purposes of the general 50% analysis.

A trap for the unwary occurs if qualified business use falls below these thresholds in any year and the taxpayer fails Code § 280F as a result. In that case, the deduction would be prorated between the qualified business use and personal use, greatly reducing the value of the deduction. Worse yet, if the taxpayer fails Code § 280F in a year after bonus depreciation has been taken, the bonus depreciation taken in prior years will be recaptured as the owner must recognize recapture income equal to the amount of bonus depreciation.
As previously noted, bonus depreciation is only available for aircraft used in a trade or business. As a result, if the aircraft is to be acquired by a properly structured family office that is engaged in a trade or business, the taxpayer may obtain a sizable tax deduction in the year of acquisition if the family office has other business income that may be offset by the bonus depreciation. Otherwise the loss will be carried forward under the new more limited deductibility rules. Under these rules, a so called excess business loss may only offset up to $500,000 (for married taxpayers filing jointly) and $250,000 (for single taxpayers) of non-business taxable income like dividends, interest and capital gains in the year of the business loss.

In future years, the carryforward loss may only offset up to 80% of a taxpayer's taxable income for these subsequent years.

Owners must also be particularly cautious about how much time the aircraft is used for personal, non-business uses, including entertainment and commuting. Prior law disallowed entertainment expenses incurred on behalf of existing or prospective clients and customers and other entertainment related events unless actual business activities or discussions were being conducted immediately before, after or during the entertainment event. The Act modified Code § 274 so that entertainment expenses are no longer deductible. This new rule applies to aviation related expenses irrespective of whether the expenses were directly related to a taxpayer's trade or business. Until guidance is issued, it is reasonable to apply existing rules that look to the primary purpose of the trip from the standpoint of each individual traveler to determine the deductibility of such expense.

This is a very complex issue as many business trips involve both business and entertainment activities, and there is often not a fine line between them. Despite this hazy distinction, there is limited guidance clarifying what expenses are subject to the entertainment disallowance. In most cases, an objective test will be used to determine whether an activity is considered entertainment: if an activity is generally considered to be entertainment, it will constitute entertainment for purposes of the statute. Examples of this are parties, rounds of golf and sporting events. Unfortunately, this is not always a straightforward inquiry as variables such as the nature of the taxpayer's business and the location where the expense in question took place can shift the analysis.

If a trip included both business and entertainment activities, it is not clear what expenses should be subject to the new disallowance. Until guidance is issued it is reasonable to use a “primary purpose test” to determine whether the trip was primarily for entertainment or business. This is a facts and circumstances based inquiry that centers on whether the trip’s main objective is the furtherance of the taxpayer’s trade or business. If the primary purpose of the trip is business, only the direct entertainment expenses should be nondeductible (for example, the cost of playing a round of golf) and the deductibility of the other costs associated with the trip (for example, the cost of air travel) should be evaluated in accordance with the typical rules applicable to business expenses.

The Act also modified the deductibility of expenses incurred in providing transportation between an employee’s residence and place of employment, unless the transportation related expenses are incurred primarily for the employee's safety. Before the Act, commuting expenses of this type were generally deductible as a compensation related fringe benefit. These expenses were deemed ordinary and necessary expenses under Code § 162. Additional guidance should be provided to determine the boundaries of this new provision. For example, does the new limitation include travel between each residence and place of employment of the employee or just travel between the employee’s primary residence and primary place of employment?

A reasonable interpretation of the provision is that transportation expenses incurred for travel to or from business locations other than the employee's primary place of business should not be considered a non-deductible commuting expense, but should be considered as ordinary and necessary business travel expenses under Code § 162 even if the trip begins or ends at the employee's primary residence.

Furthermore, the new provision does not provide guidance regarding how to determine the non-deductible amount and leaves open the question regarding the deductibility of commuting expenses that are imputed as income to the employee. A reasonable reading is that the full amount of the expenses should be deductible to the employer if the proper amount of income is imputed to the employee.
As noted above, there is an exception for travel that is “necessary for ensuring the safety of the employee.” Unfortunately, compliance with this exception could be difficult as there is currently no guidance on what exactly it means. In this situation, most practitioners agree that an employer can avoid the application of this disallowance if the employee is flying pursuant to an “overall security program” established based on the employer’s “independent security study” that a bona fide business-oriented security concern exists (Treas. Reg. § 1.132-5(m)(2)(ii) and (iii)). Under current guidance, determining whether a bona fide business-oriented security concern exists will be based on the facts and circumstances of the situation. An example of a factor indicating a specific basis for concern would be a death or kidnapping threat to the employee. The employer must periodically evaluate the situation to determine whether the security concern continues to exist.

Finally, this new disallowance applies to employees and, while this may seem straightforward on its face, guidance should be provided as to who, exactly, is an employee. It is reasonable to assume that the term “employee” refers to the definition of employee under Treas. Reg. § 31.3401(c)-1. Under this definition, partners, independent contractors (a group that includes directors) and other self-employed individuals are not considered employees. Would a 2% or greater shareholder of a Subchapter S-corporation be considered an employee? Most practitioners don’t believe so, but without additional guidance confirming, the question will remain.

**Conclusion**

Before purchasing an aircraft, careful thought and consideration must be given to the variety of issues the purchase will raise. From the outset, it is critical to enlist the help of competent professionals to lay the foundation for the transaction by selecting the proper acquisition structure and shepherd you through the process to ensure the purchase meets your needs and that the most efficient tax results flow from the transaction. Said simply, make sure not to rush the take off. ■

<tbody>
<tr>
<td>Aruba</td>
<td>Generally. Under Aruba law there are 2 types of security interests that can apply to aircraft. When using the term “mortgage” in this context, reference is made to both a mortgage and a right of first pledge. The latter is more flexible and efficient.</td>
</tr>
</tbody>
</table>
| Australia              | Insolvency: Insolvency moratorium (question 2(d)). A transaction may be structured to take the benefit of certain provisions modifying the effect of the moratorium. Also, the Cape Town Convention applies with effect from 1 September 2015.  
Insolvency: Overreaching of the lessee’s insolvency estate (question 2(e)). In conjunction with the CTC (Alternative A, 60 calendar days), after a waiting period, the insolvency administrator may continue the lease by paying rent and other amounts attributable to the use and possession of the aircraft.  
Registration: Aircraft register type (question 3(a)). If the owner is not an Australian citizen, the registered operator must be an Australian citizen. Certain other eligibility criteria apply.  
Registration: Convenience of registration (question 3(d)). We are not aware of CASA having entered into an article 83bis agreement as this requires CASA to publish a notice in a gazette. However we are aware of aircraft in New Zealand and USA regularly stationed in Australia.  
Export: Export licenses/permits (question 5(c)). This assumes applicable requirements to operate an aircraft under safety laws and regulations (including flight permits) have been obtained. |
| Belgium                | Generally. The only security interest that can be established in Belgium with regards to aircraft is for the time being, setting up a Belgian law governed “pledge” on the aircraft and register the pledge in a special “Register of Pledges”. Belgian law does not recognize any other consensual non-possessory security interests over moveable property, such as aircraft. |
| Bermuda                | Judgments/Arbitration: Enforceability of judgments (question 6(a)). As a matter of Bermuda law, the courts of Bermuda would recognize as a valid judgment, a final and conclusive judgment in personam obtained in a New York state or US federal court sitting in New York against a Bermuda company based upon the relevant documents under which a sum of money is payable (other than a sum of money payable in respect of multiple damages, taxes or other charges of a like nature or in respect of a fine or other penalty) and would give a judgment based thereon provided that: (a) such courts had proper jurisdiction over the parties subject to such judgment; (b) such courts did not contravene the rules of natural justice of Bermuda; (c) such judgment was not obtained by fraud; (d) the enforcement of the judgment would not be contrary to the public policy of Bermuda; (e) no new admissible evidence relevant to the action is submitted prior to the rendering of the judgment by the courts of Bermuda; and (f) there is due compliance with the correct procedures under the laws of Bermuda. |
Brazil

**Repossession: Legal cost of repossession (question 1(f)).** Local costs for repossession could be equal to or less than US$50,000 in most cases, however, this will depend on a number of factors, including the exact location of the aircraft. A sum between US$35,000 and US$75,000 would be more accurate.

Bulgaria

**Repossession: Taxes and fees (question 1(d)).** Significant, because the fees are based on 2% of the value, but not less than BGN 25 (approx. EUR 12.5).

**Repossession: Speed of repossession (question 1(e)).** The term includes also the time for the second (appeal) and third (cassation) instances.

**Repossession: Legal cost of repossession (question 1(f)).** Only the court fees may vary from 2% to 8% of the value of the property (in all instances) and therefore the costs may be above US$1,000,000.

**Export: Export licenses/permits (question 5(c)).** Export Certificate of Airworthiness.

Canada

**Generally.** The answers to the questionnaire apply also to the following jurisdictions: Provinces of Quebec, British Columbia, Alberta, Manitoba, Saskatchewan, Nova Scotia, New Brunswick, Newfoundland & Labrador, Prince Edward Island, Territories (Yukon, Northwest Territories, Nunavut).

**Registration: Aircraft register type (question 3(b)).** The Canadian Civil Aircraft Register is an operator only register. International interests under the Cape Town Convention are noted in the International Registry. Interests in non-CTC aircraft objects may be perfected under each province’s Personal Property Security Act (PPSA) (The Civil Code of Quebec in the case of Quebec).

Cayman Islands

**Insolvency: Insolvency moratorium (question 2(c)).** While no claim may be started or continued against a company in a Cayman Islands compulsory liquidation without the Court’s leave, under the Companies Law a secured party may enforce its security without the Court’s leave or reference to the liquidator.

**Registration: Convenience of registration (question 3(c)) and Deregistration Convenience of deregistration (question 4(d)).** The Civil Aviation Authority (CAACI) has advised that it has discretion to relax its notarization policies depending on the circumstances. It is generally prepared to relax such policies where documents are provided through known agents, such as local law firms.

**Deregistration: Third party rights to deregister (questions 4(a) and 4(b)).** In hostile repossessions, where it may be difficult to obtain the original certificate of registration, the CAACI will accept a copy of the certificate of registration duly signed by the owner or its attorney-in-fact.

**Preferential Liens: Unusual or onerous preferential liens (question 7(b)).** Cayman Islands law provides for liens in favor of the CAACI and the Airports Authority for fees and charges owed to them and does not stipulate whether such lien is only in respect of the aircraft incurring such fees and charges or any aircraft operated by the person who owes such fees or charges.

Chile

**Repossession: Self-help remedies (questions 1(a) and 1(b)).** There is no real repossession in Chile; rather, the secured creditor shall request to the relevant court the sale of the aircraft in a public auction (in which he can participate and pay by setting-off the auction price against its credit, subject to certain limitations).

**Preferential Liens: Unusual or onerous preferential liens (questions 7(a) and 7(b)).** The answers are without prejudice to: (i) certain statutory preferences; and (ii) preferential transfers claw-back rules. With respect to the liens described in question 7(a), “fleet-wide” non-consensual liens could arise but only with respect to extraordinary expenses required for the conservation of the aircraft.
**China (People’s Republic of)**

Repossession: Speed of repossession (question 1(e)) and Legal cost of repossession (question 1(f)). Answers were chosen after considering the corresponding declarations made by PRC to Article 13 of the Cape Town Convention, which requires PRC court to make a court order within 10 calendar days and enforce such order immediately.

Insolvency: Insolvency moratorium (questions 2(c) and 2(d)). Answers were chosen after considering the corresponding declarations made by PRC to Article XI of the Protocol, which provides for a waiting period of 60 calendar days.

Deregistration: Third party rights to deregister (questions 4(a) and 4(b)). Answers were chosen if owner/lessor or mortgagee apply to CAAC for deregistration of aircraft by using IDERA pursuant to relevant CAAC regulations.

Export: Export licenses/permits (question 5(c)). The confirmation of the Airworthiness Department of CAAC (as a matter of procedure) as to the airworthiness for ferry flight of the aircraft is required for the export purpose.

**Costa Rica**

Generally. Costa Rica will be a contracting state for the Cape Town Convention from December 2018.

**Croatia**

Registration: Aircraft register type (question 3(a)). Both the owner and the operator of the aircraft are registered with the Croatian Registry of Civil Aircraft, maintained by the Croatian Civil Aviation Agency. It is visible from the registration in which capacity each of them is registered.

**Curacao**

Generally. Under Curacao law there are 2 types of security interests that can apply to aircraft. When using the term “mortgage” in this context, reference is made to both a mortgage and a right of first pledge. The latter is more flexible and efficient.

**Czech Republic**

Repossession: Self-help remedies (questions 1(a) and 1(b)). Self-help test: (i) protected rights are endangered and (ii) public authority action would come too late.

Insolvency. Preferential possessory liens are well recognized.

**Denmark**

Registration: Aircraft register type (question 3(b)). The mortgagee’s interest can only be registered in the Danish rights registry to the extent that the interest is not governed by the Cape Town Convention.

Judgments/Arbitration: Enforceability of judgments (question 6(b)). Danish courts will currently recognize and enforce a judgment rendered by an English court. However, following Brexit this may change.

Preferential Liens: Unusual or onerous preferential liens (question 7(c)). By general applicable law, lessee may have a right of retention over the aircraft for a valid claim under the lease against the owner-lessor. However, it will often be agreed in the lease that the lessee does not have such right.

**Dominican Republic**

Insolvency: Sophistication of insolvency laws (question 2(a)). The current insolvency law was approved by Congress about two years ago but its application in the court is yet to be determined.

**Ecuador**

Export: Taxes and fees (question 5(d)). Applicable taxes depend on how the aircraft was imported into Ecuador and the year of manufacture of the aircraft. Generally, in a well structured transaction no taxes apply.

**Egypt**

Repossession: Legal cost of repossession (question 1(f)). We could not respond to this question as part of these costs under certain claims are calculated based on the value of the claimed debt.
<table>
<thead>
<tr>
<th>Country</th>
<th>Explanation</th>
</tr>
</thead>
</table>
| El Salvador  | **Generally.** There are no prececdents of repossession in El Salvador, neither bankruptcy is a common practice in El Salvador.  
**Repossession: Legal cost of repossession (question 1(f)).** The estimation of legal fees will be determined depending on each case.  
**Registration: Aircraft register type (question 3(a)).** Registration of aircraft in El Salvador are only for aircraft with a Salvadoran license.  
**Registration: Aircraft register type (question 3(b)).** Mortgages over aircraft can be registered in El Salvador only on aircraft with a Salvadoran license.                                                                                                                                 |
| Estonia      | **Export: Export licenses/permits (questions 5(a) to 5(d)).** The answer relates to the export of civil aircraft to non-EU countries. Separate regimes apply to military aircraft and intra-EU trade.                                                                                                                                                                                                                                                           |
| Ethiopia     | **Repossession: Taxes and fees (question 1(d)).** Stamp duty at the rates of 1% and 0.5% on value is payable on security deeds and leases/sub-leases, respectively. Failure to pay the applicable stamp duty will render the relevant document inadmissable as evidence in court. However, the relevant document can be admitted in evidence by paying two times the applicable stamp duty.  
**Deregistration: Convenience of deregistration (question 4(d)).** In the very first hostile case of deregistration of an Ethiopian registered aircraft, the Ethiopian civil aviation authority required the original certificate of registration of the aircraft as a condition to deregister the aircraft. However, due to the difficulty involved in providing the original certificate of registration, the aviation authority expressed willingness to accept a notarized copy of the certificate with an undertaking that the original certificate would be provided once in possession. |
| Fiji         | **Registration: Aircraft register type (question 3(b)).** Strictly, local legislation does not permit registration of mortgagee interests. However, the local Authority will note a mortgagee interest as a matter of practice.                                                                                                                                                                                                                                                                |
| Finland      | **Repossession: Judicial proceedings: requirement for a deposit, bond or other security (question 1(c)).** If precautionary measures are applied, a deposit is required by the enforcement agency. However, in an action for declaratory judgement a deposit is not required but this process is a much longer one.  
**Insolvency: Insolvency moratorium (question 2(d)).** Finland has not ratified the Cape Town Convention.  
**Judgments/Arbitration: Enforceability of arbitral awards (question 6(d)).** “YES” now but will be subject to the outcome of “Brexit”.                                                                                                                                                                                                                                        |
| France       | **Repossession: Speed of repossession (question 1(e)).** I assumed that the lease was terminated and that a New York or London judgment has been entered before the lessee’s judgment of bankruptcy or before the lessee is protected by a judgment of judicial safeguard.                                                                                                                                                                                                                |
| French Polynesia | **Repossession: Speed of repossession (question 1(e)).** I assumed that the lease was terminated and that a New York or London judgment has been entered before the lessee’s judgment of bankruptcy or before the lessee is protected by a judgment of judicial safeguard.                                                                                                                                                                        |
Georgia

Judgments/Arbitration: Enforceability of judgments (question 6(a)). The judgments of foreign courts may be recognized and enforced in the courts of Georgia without reconsideration of the merits of the case in accordance with and subject to limitations set forth in the Law of Georgia on Private International Law, dated April 29, 1998, as amended. The recognition and enforcement of such judgment may be refused, however, where, inter alia, the courts of the rendering jurisdiction do not recognize judgments of Georgian courts. We believe that it is less likely for the courts of Georgia to refuse recognition and enforcement of judgments rendered by US and UK courts based on the above ground.

Preferred Liens: Unusual or onerous preferential liens (question 7(b)). For the purposes of this Question, we have assumed that the respective third party has possession over the aircraft.

Germany

Repossession: Legal cost of repossession (question 1(f)). Lawyers’ legal fees in Germany are governed by statutory law which provides for graduated fees based on the value of the matter (maximum value in repossession proceedings = total amount of lease rentals for one year). The answer to question 1(f) on the estimated legal cost of repossession is based on the hypothetical total amount of lease rentals for one year of US$9 million. Based on this hypothetical statutory legal fees would amount to approximately US$11,250 where the proceedings are contested. Depending on the specific circumstances lawyers may require the conclusion of a fee agreement for higher fees, but the legal costs for obtaining a court order for repossession may still be less than or equal to US$50,000.

Guernsey

Aircraft Registration: Aircraft register type (questions 3(a) and 3(b)). Responses are subject to the overriding requirement that persons must be Qualified Persons to hold legal/beneficial interest in registered aircraft. Qualified Persons include the Crown, natural persons who are (i) Nationals of any EEA State (ii) British Islands Resident (iii) British Overseas Territory Resident or (iv) represented by resident agent, legal persons which (i) are a business in Appendix C to the GFSC’s handbook on countering financial crime or (ii) represented by resident agent or (iii) any other person at discretion of Registrar subject to additional requirements imposed. There is no definition of “operator” so we assume this is the end user & includes a lessee (to which the plane has been chartered by demise) and there is no third party structure i.e. owner, lessee/charter & operator. The interest of the owner or the operator would be registered (not both) plus a mortgagee.

Hong Kong

Repossession: Self-help remedies (questions 1(a) and 1(b)). Provided that self-help remedies are stipulated in the relevant underlying lease or mortgage documents (as applicable).

Registration: Aircraft register type (question 3(a)). Provided that the operator OR the owner are a “qualified person” under the Hong Kong Air Navigation Order 1995 (Ch. 448C) AND the operator is also registered as a charterer by demise. “Qualified persons” include the government of Hong Kong or the PRC, Chinese Citizens, permanent resident of Hong Kong and bodies incorporated in or under the law of Hong Kong or other parts of the PRC and having their principal business in Hong Kong or other parts of the PRC.

Registration: Aircraft register type (question 3(b)). There is no register of aircraft mortgages but an aircraft mortgage needs to be registered at the Hong Kong Company Registry to the extent that the mortgagor is a company incorporated in Hong Kong or having a place of business in Hong Kong.

Deregistration: Third party deregistration rights (question 4(a)). “YES” provided that the Owner-Lessor is a “qualified person” (see foregoing note on question 3(a)).
**Deregistration: Third party deregistration rights (question 4(b)).** “YES” so long as the mortgagee is the qualified person in which name the aircraft is registered.

**Export: Lessee/debtor cooperation (question 5(b)).** “YES” so long as the mortgagee is the qualified person in whose name the aircraft is registered.

**Judgments/Arbitration: Enforceability of judgments (question 6(a)).** A judgement rendered by a New York state or U.S. federal court sitting in New York or by an English court cannot be recognized and enforced in Hong Kong through a process of registration of judgments allowed for certain other countries designated by the Foreign Judgments (Reciprocal Enforcement) Ordinance (Cap. 319) of Hong Kong but have recourse under common law, provided that, **inter alia**, (i) proceedings are commenced by writ before the Hong Kong courts; (ii) the foreign judgment is a proof of a valid debt (not being a sum payable in respect of taxes or other charges of a like nature or in respect or a fine or other penalty) which can be sued upon and is final and conclusive; and (iii) a judgment that recognizes the foreign judgment is given directly by the Hong Kong courts, which judgment can be later enforced like any other Hong Kong judgment. We have rendered a “YES” answer to this question as the aforementioned requirement that Hong Kong courts scrutinize the foreign judgment as to whether it is a proof of a valid debt does not seem to exceed the “permitted threshold conditions”.

<tbody>
<tr>
<td>India</td>
<td>Preferential Liens: Unusual or onerous preferential liens (questions 7(a) and 7(b)). Please note that once the aircraft has been deregistered, the owner/lessor is entitled to export the aircraft without lessee’s consent. However, this right is subject to certain conditions, for instance, if the lessee is under corporate insolvency resolution process under the newly enacted Insolvency and Bankruptcy, 2016, the owner/lessor is restricted from recovering its aircraft which is in possession of the lessee due to application of a moratorium of 180 days (extendable up to 270 days).</td>
</tr>
<tr>
<td>Indonesia</td>
<td>Insolvency: Insolvency moratorium (question 2(c)). Indonesia adopts “Alternative A” in its entirety to all types of insolvency proceedings, and the waiting period shall be sixty (60) calendar days. Compared to general insolvency proceedings, the application of a sixty (60) calendar day waiting period is more beneficial to the lessor.</td>
</tr>
<tr>
<td></td>
<td>Judgments/Arbitration: Enforceability of judgments (questions 6(a) and 6(b)). Foreign judgment can be offered at trial as prima facie evidence of matters governed by the relevant foreign law and of the underlying factual issues.</td>
</tr>
<tr>
<td></td>
<td>Preferential liens: Government requisition and confiscation (question 7(d)). Under State of Emergency Law, any goods, including aircraft and the engines attached to the aircraft, might be used or owned by the government for the interests of security and defense in case of statement of war.</td>
</tr>
<tr>
<td>Israel</td>
<td>Repossession: Legal cost of repossession (question 1(f)). Both legal fees and court fees are determined in relation to the debt that has been repaid. The court fees are equal to 1% of the amount of the repayment, and the higher the repayment amount is, the lower the percentage of the legal fees are, respectively.</td>
</tr>
<tr>
<td></td>
<td>Preferential Liens: Unusual or onerous preferential liens (question 7(a)). A repairer/mechanic/hangar-keeper lien may subsist only as long as the aircraft is in the possession of the repairer/mechanic/hangar-keeper.</td>
</tr>
</tbody>
</table>
**Japan**

**Repossession: Taxes and fees (question 1(d)).** Ad valorem taxes are paid upon the full registration of a mortgage as a percentage of the value of the mortgage. Market practice has developed to allow for a provisional mortgage registration to be made on payment of a nominal amount in order to secure priority for the mortgagee. If the mortgage becomes enforceable, the provisional registration of the mortgage will need to be converted to a full registration and the necessary ad valorem taxes paid at such time before approaching the court for an enforcement order.

**Insolvency: Insolvency moratorium (questions 2(c) and 2(d)).** No moratorium period applies in the case of bankruptcy proceedings. A moratorium may apply in the case of corporate reorganization proceedings and the period of such moratorium is determined by the (mandatorily appointed) reorganization trustee in its discretion.

**Registration: Aircraft register type (question 3(a)).** The Japanese registry is an owner registry and only a Japanese individual or corporate entity may be registered as the owner of an aircraft.

**Registration: Convenience of registration (question 3(c)).** There is no system for registering a lease in Japan. If a foreign owner wants to register an aircraft in Japan it will need to do so by selling the aircraft to a Japanese entity and entering into contractual arrangements whereby all ownership rights are transferred back to the foreign owner pursuant to a conditional sale agreement. The foreign owner will often take a Japanese mortgage with provisional registration over the aircraft in order to secure its rights under the conditional sale agreement. Any foreign mortgagee will need to notarize its signatures and supporting documents before it can complete a provisional registration of the mortgage in Japan.

**Deregistration: Third party rights to deregister (questions 4(a) and 4(b)).** Only the registered owner can deregister the Aircraft. An owner can deregister an aircraft acting alone provided it has the necessary documents which includes the certificate of registration. Although the consent of the airline is not required for deregistration, Article 59 of the Civil Aeronautics Act requires that the certificate of registration is kept on the aircraft and therefore an uncooperative airline could in practice prevent deregistration.

**Deregistration: Convenience of deregistration (question 4(d)).** There is no need for the Japanese registered owner to notarize or authenticate any documents filed on deregistration. However, if a mortgage is also to be removed from the register and the mortgagee is a foreign entity, any documents signed by the foreign mortgagee must be notarized and translated.

**Export: Export licenses/permits (question 5(c)).** An export permit must be obtained from the Director-General of Customs.

**Export: Taxes and fees (question 5(d)).** The taxes or fees imposed on export of the aircraft depend on the country to which the aircraft is being exported and are typically imposed by that country not Japan.

**Preferential liens: Unusual or onerous preferential liens (question 7(a)).** Please note that the holder of a possessory lien (as opposed to a non-possessory lien) has the right to sell the aircraft through the courts by public auction. Examples of such possessory liens include those arising in favor of an airport administration for unpaid landing charges (although there is no precedent for this particular kind of lien) or in favor of a maintenance provider for unpaid maintenance fees.

**Jersey**

**Registration: Aircraft register type (questions 3(a) and 3(b)).** Responses to questions 3(a) and 3(b) must be read in conjunction with the overriding requirement that a person must be a Qualified Person to hold a legal or beneficial interest in a registered aircraft. A Qualified Person is a body incorporated or undertaking established in, or a citizen or resident of, one of the following countries: Jersey, Guernsey, Isle of Man, Switzerland, a Commonwealth country, a European Economic Area country.
Jordan

Repossession: Self-help remedies: (questions 1(a) and 1(b)): Prior to the ratification of the Cape Town Convention, Jordanian laws prohibited the exercise of “self-help” remedies. Given Jordan’s declaration under Article 54(2) whereby Jordan has declared that the exercise of self-help remedies under the Convention and Protocol are available to creditors, and in light of Articles 8 and 10 of the Convention and Article IX of the Protocol, this has been overturned specifically in relation to aircraft. Notwithstanding this declaration, we believe that, from a practical perspective, it would be very difficult for a creditor to exercise a self-help remedy in relation to its interest over an aircraft that is located in a Jordanian airport/hangar, and the creditor may be forced to obtain a court order to attach and ground the aircraft and commence legal proceedings to exercise any of its remedies under the Convention and Protocol. Moreover, there are no precedents on the application and interpretation of the Convention or the Protocol.

Kazakhstan

Repossession: Legal cost of repossession (question 1(f)). The state duty amount is 3% of the balance sheet value of aircraft.

Deregistration: Third party rights to deregister (questions 4(a) and 4(b)), Precedent of refusing to deregister (question 4(c)), Convenience of deregistration (question 4(d)): Answers are given based on the assumption that the aircraft is registered in the Kazakhstan register in the owner’s name.

Export: Lessee/debtor cooperation (questions 5(a) and 5(b)). Please note that new Code on customs regulations in the Republic of Kazakhstan dated December 26, 2017, came into effect on 1 January 2018 and there is little practice of application of its provisions.

Kenya

Repossession: Legal cost of repossession (question 1(f)). Advocates legal fees are guided by the Advocates Remuneration Order 2014 (Legal Notice No. 35) which provides for graduated fees (minimum fees chargeable) based on the value of the matter. By way of illustration, the statutory legal fees chargeable for seeking a court order for repossession of an aircraft with a hypothetical value of US$ 80 million would be approximately US$ 1.3 million where the proceedings are contested.

Registration: Convenience of registration (question 3(c)). The official language of Kenya is English. The Kenya Civil Aviation Authority provides no mandatory requirement for documents to be filed with it to be translated into English, however, in order to ascertain the ownership or which party has operational control of an aircraft, an English translation of the indicative document should be submitted.

Korea (Republic of)

Insolvency: Insolvency moratorium (question 2(c)). In rehabilitation proceedings, if the receiver elects to perform the lease, the lessee will continue to possess the aircraft so long as it thenceforth performs the lease in accordance with its terms.

Lithuania

Repossession: Taxes and fees (question 1(d)). If litigation on the merits of the case is stated in Lithuanian courts, then the court fees may exceed US$1,000 depending on the type and amount of the claim.

Deregistration: Third party rights to deregister (question 4(a)). Assuming that no mortgages or arrests are registered in the Lithuanian Civil Aircraft Registry over the aircraft (engines) in favor of the lessee, practically no cooperation of the lessee is required for the aircraft owner in order to achieve deregistration. It is important however that the lessee’s cooperation would be required at a later stage as the aircraft deregistration certificate will be issued only upon providing the Lithuanian Civil Aviation Authority with the original aircraft registration certificate, which is normally located aboard the aircraft.
Macau

**Generally:** The answers to the questions above are given on a general basis and do not intend to address any specific issues. Furthermore, the answers above do not represent an exhaustive analysis of Macau law or of any specific case. Interested parties should request separate legal advice for any particular concern as the answers may differ on a case-by-case basis depending on the circumstances and details of each case. On a final note, the solution to each question depend on the existence of a repossession/deregistration power of attorney and the powers granted thereunder.

Malta

**Repossession: Self-help remedies (question 1(a)).** The right of an owner/lessor to repossess an aircraft without the need for court intervention is conditional upon the registration of the interest of the owner/lessor in the International Registry under the Cape Town Convention.

**Export: Export licenses/permits (question 5(c)).** This depends on the export destination and on whether the aircraft has a valid CoA. An Export Conformity Certificate will be required for export to non-EASA Member States. A Permit to fly will be required if the aircraft does not have a valid CoA.

**Preferential Liens: Unusual or onerous preferential liens (question 7(c)).** Non-consensual privileges arise by operation of law in priority to the rights of a mortgagee also in favor of the registry of courts in relation to costs for the enforcement of a mortgage or other executive title; in favor of the Director General for Civil Aviation for any fees due; in favor of crew for their wages; in favor of the holder of a possessory lien for any debt due in connection with the repair or preservation of the aircraft; and in respect of wages and expenses for salvage in respect of an aircraft.

Mexico

**Export: Taxes and fees (question 5(d)).** Applicable taxes are subject to the importation regime with which the aircraft is introduced into Mexican Territory. VAT and import taxes are exempted if the importation is made under the temporary importation (Article 106(V)(b) Customs Law). The temporary importation regime permits the importation of an aircraft dedicated to public air transportation services for a period of up to 10 years. The party that conducts the importation (e.g., airline, air taxi or a third party operator) is responsible to maintain possession during the temporary importation period and shall also be responsible for the exportation at the end of the same, or for the renewal thereof.

**Judgments/Arbitration: Enforceability of judgments (questions 6(a) and 6(b)).** Whilst a foreign judgment would not be subject to any additional requirements other that the threshold conditions enumerated herein, the judicial process to homologate a foreign judgment is highly complicated and not recommended.

Nepal

**Repossession: Self-help remedies (questions 1(a) and 1(b)).** Self-help repossession is effective only if the lease is (1) for a period exceeding one year; (2) for an indefinite period; (3) initially for a period of one year or less and the lessee, with the consent of the lessor, retains uninterrupted possession of the leased goods for a period of more than one year after the lessee first acquired possession of the goods; or (4) for a period of one year or less but which may be renewed for a period of more than one year.

Netherlands

**Registration: Aircraft register type (question 3(a)).** The registration of a leased aircraft must refer to the owner as well as to the operator.

**Registration: Convenience of registration (question 3(c)).** If the aircraft is to be registered in the ownership/mortgage register (which is not mandatory unless the aircraft is to be made subject to a mortgage, a right in rem in relation to a lease agreement and/or a right in rem in relation to a purchase option) notarized/authenticated documents will be required.

**Deregistration: Third party rights to deregister (questions 4(a) and 4(b)).** For deregistration the original certificate of registration must be submitted.
<p>| <strong>Deregistration: Precedent of refusing to deregister (question 4(c)).</strong> | Dutch CAA will in practice cooperate if it is demonstrated that the lessee is no longer entitled to possess and operate the aircraft. |
| <strong>Export: Lessee/debtor cooperation (question 5(b)).</strong> | This assumes that under applicable law the deregistration and export power of attorney is valid and will not terminate upon the owner’s insolvency. |
| <strong>Preferential Liens: Unusual or onerous preferential liens (question 7(a)).</strong> | Dutch law does provide for non-consensual preferential liens for repairmen/mechanics, but only as long as the aircraft is in their possession. |
| <strong>New Caledonia</strong> | <strong>Repossession: Speed of repossession (question 1(e)).</strong> I assumed that the lease was terminated and that a New York or London judgment has been entered before the lessee’s judgment of bankruptcy or before the lessee is protected by a judgment of judicial safeguard. |
| <strong>New Zealand</strong> | <strong>Judgments/Arbitration: Enforceability of judgments (questions 6(a) and 6(b)).</strong> We have answered “YES” to these questions on the assumption that, while the additional conditions below exist, these are assumed to be not sufficiently significant to render a “NO” answer. In the case of an English judgment, it would be enforceable under the Reciprocal Enforcement of Judgments Act 1934 and the following extra conditions would apply: (1) it must not be in respect of taxes or similar charges or a fine or other penalty; (2) it must be enforceable in England; (3) it must not have been wholly satisfied; (4) the defendant must have had sufficient notice of the proceedings to enable him to appear; and (5) the rights under the judgment must be vested in the applicant. In the case of a New York judgment, it would be enforced at common law (usually by way of summary judgment) and additional condition (1) above would also apply. It would be a further defense to an enforcement action that the judgment was obtained in breach of natural justice. |
| <strong>Nigeria</strong> | <strong>Repossession: Taxes and fees (question 1(d)).</strong> Please note that stamp duty (at a nominal rate) is payable as condition to admitting documents in evidence for the purpose of a repossession. |
| | <strong>Repossession: Legal cost of repossession (question 1(f)).</strong> Please note that legal costs may vary due to certain factors such as time spent by counsel, the state of the court’s list, the amount of documentation which are relevant to the matter, the caliber of counsel and the length of time for trial. |
| | <strong>Deregistration: Convenience of deregistration (question 4(d)).</strong> Please note that the NCAAA will require the translation of a document not in English. |
| | <strong>Preferential Liens: Unusual or onerous preferential liens (question 7(b)).</strong> Please note that Nigerian courts will likely, should the need arise, make reference to persuasive English authorities. |
| <strong>Norway</strong> | <strong>Generally.</strong> Norway has adopted the Cape Town Convention and aircraft protocol, and will respect an IDERA registered in the Norwegian Civil Aviation Registry. |
| | <strong>Deregistration: Third party rights to deregister (question 4(b)).</strong> A mortgagee must rely on a registered IDERA in order to be able to unilaterally request the aircraft to be deregistered, without the cooperation of the registered owner. |</p>

<tr>
<th>Country</th>
<th>Local Counsel Explanatory Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pakistan</td>
<td>Preferential Liens: Unusual or onerous preferential liens (questions 7(a) and 7(b)). The answers in the questionnaire are predicated upon the assumptions set out in the questions. For example for question 7(a), our law does not recognize any non-consensual preferential non-possessory liens over aircraft in favor of a repairer/mechanic/landlord/hangar-keeper. However under Pakistan law, there are two categories of priority non-consensual rights (i) claims against aircraft which may be enforced by an action in rem under the relevant provisions of the Admiralty Jurisdiction of the High Courts Ordinance, 1980; and (ii) where there are unpaid taxes or other public dues directly related to the use of that aircraft and owed by the owner of that aircraft. Similarly, for question 7(b), our law does not recognize “fleet-wide” liens however under the Implementation Rules (which incorporates CTC into our domestic law), any person including a state entity with the requisite powers can arrest/detain an aircraft for violation of law or for payment of any amount owed and directly relating to the services pertaining to that aircraft.</td>
</tr>
<tr>
<td>Panama</td>
<td>Judgments/Arbitration: Enforceability of judgments (questions 6(a) and 6(b)). Apart from a special treaty, any judgment for a definite sum given by the courts of a given country would be recognized and accepted by the Panamanian courts unless (a) the courts of the given country would not generally enforce the judgments of the corresponding Panamanian courts; and (b) subject to the provisions of the Panamanian Judicial Code relating to the enforcement of a foreign judgment in Panama, which may only be enforced without a rehearing of the issues if the courts of Panama grant an exequatur for such an enforcement. This will be granted provided the foreign judgment satisfies the following requirements (i) judgment has been rendered in an action in personam; (ii) summons and complaint have been personally served on the defendant in the place where the action is filed; (iii) the obligation sought to be enforced is lawful under the laws of Panama; and (iv) a copy of the said foreign judgment has been duly legalized by a Panamanian Consulate and translated into the Spanish language.</td>
</tr>
<tr>
<td>Papua New Guinea</td>
<td>Registration: Aircraft register type (question 3(b)). The Personal Property Security Act 2011 commenced in operation on May 9, 2016, one of the most significant pieces of legislative reform for the Papua New Guinea finance sector and commerce generally. Security holders can submit a notification of security interests granted by corporations and individuals in relation to personal property situated in Papua New Guinea (and security interests governed by Papua New Guinea law).</td>
</tr>
<tr>
<td>Paraguay</td>
<td>Repossession: Legal cost of repossession (question 1(f)). Judicial fee is between 0.50% and 0.74% of amount claimed depending on the claim’s nature. Officer of Justice fee is up to 5% of amount claimed, but generally 1 or 2% of amount claimed. Attorneys’ fees are between 5% and 20% of amount claimed; one third of such percentages in case of precautionary measures proceedings. Insolvency: Sophistication of insolvency laws (question 2(b)). Although to the best of our knowledge there is no precedent of owners, lessors or mortgagees claiming repossession, sequestration or export of aircraft whether involved in insolvency/bankruptcy proceedings or not. Preferential Liens: Unusual or onerous preferential liens (question 7(b)). A creditor may not exercise his privilege over the aircraft unless it is duly registered before the National Aeronautical Registry within 3 months of the end of operations, acts or services that originated them.</td>
</tr>
</tbody>
</table>
**Poland**

| Registration: Convenience of registration (question 3(c)) and Deregistration: Convenience of deregistration (question 4(d)). | The applicable legal provisions require that documents be notarized and/or authenticated, however in practice the aviation authority tends to accept simple copies of any presented documents. |
| Export: Export licenses/permits (question 5(c)). | An Export Certificate of Airworthiness may be required. For the purposes of the questionnaire, we do not consider this to constitute an export license or permit or any other restriction on the ability to export the aircraft. |
| Export: Taxes and fees (question 5(d)). | Provided that the owner-lessee does not conduct business operations in Poland through a permanent establishment and that it is not obliged to register in Poland for VAT purposes. |

**Saudi Arabia**

| Repossession: Judicial proceedings requirement for a deposit, bond or other security (question 1(c)). | In case the proceedings aim for a final order, no bond or guarantee is required. However, if the proceedings aim for a preliminary order, the deposit of a bond or guarantee is likely to be required. |
| Insolvency: Insolvency moratorium (questions 2(c) and 2(d)). | Saudi Arabia has approved a new Bankruptcy Law on or around 18 February 2018. However, the same will only come into effect after the approval of the Implementing Regulations. |
| Deregistration: Third party rights to deregister (questions 4(a) and 4(b)). | It is standard practice of the General Authority of Civil Aviation to request confirmation from the Lessee in advance. Hence, despite the assumption, our answer is “NO”. |
| Export: Lessee/debtor cooperation (questions 5(a) and 5(b)). | It is standard practice of the General Authority of Civil Aviation to request confirmation from the Lessee in advance. Hence, despite the assumption, our answer is “NO”. |
| Judgments/Arbitration: Enforceability of judgments (questions 6(a) and 6(b)). | Among other threshold conditions, the recognition/enforcement of a foreign subject is always subject to the requirement of reciprocity. |
| Judgments/Arbitration: Enforceability of arbitral awards (question 6(c)). | The enforcement of an arbitral award will also be subject to the requirement of reciprocity. |

**Singapore**

| Repossession: Judicial proceedings requirement for a deposit, bond or other security (question 1(c)). | The application considered is for a final and not an interim order. |
| Repossession: Taxes and fees (question 1(d)). | Reference is only to GST, subject to fulfilling the relevant conditions. |
| Registration: Aircraft register type (question 3(a)). | Nationality requirements apply. |
| Registration: Aircraft register type (question 3(b)). | There is no prescribed field/form for this on the Certificate of Registration; the notation has no legal effect. |
| Registration: Convenience of registration (question 3(c)). | Notarization and legalization requirements apply for the submission of an IDERA. |
| Deregistration: Third party rights to deregister (question 4(a)). | Although in our view this isn’t a specified requirement under Singapore law, please note that in an advisory circular, the registry has stated that return of the Certificate of Registration is necessary. |
Export: Taxes and fees (question 5(d)). Reference is only to GST, subject to fulfilling the relevant conditions.

Preferred Liens: Unusual or onerous preferential liens (question 7(a)). Assumes the stated parties are not the Singapore government or related agency.

Preferred Liens: Government requisition and confiscation (question 7(d)). Excludes the airport authority’s statutory powers of seizure and sale for unpaid charges.

Slovakia

Repossession: Self-help remedies (questions 1(a) and 1(b)). Conditions for self-help remedies are (i) an imminent threat, (ii) an unauthorized intervention, (iii) that the remedy is performed by the affected person and (iv) in a reasonable manner.

Insolvency: Insolvency moratorium (question 2(c)). Although Slovak law does not recognize a “moratorium,” a debtor may stay insolvency proceedings for a period of 60 days if an administrator is properly appointed to prepare a restructuring opinion.

Export: Export licenses/permits (question 5(c)). Although an Export Certificate of Airworthiness may be required, it is ignored for purposes of this questionnaire.

Judgments/Arbitration: Enforceability of judgments (questions 6(a) and 6(b)). Slovak courts sometimes broadly interpret the public policy restriction and thereby, indirectly, open examination of the merits.

Preferred Liens: Unusual or onerous preferential liens (question 7(a)). A non-consensual preferential non-possessory lien over an aircraft may arise in favor of a landlord (hangar-keeper) in the event of unpaid rent, but may cease to exist if the aircraft is removed from the landlord’s premises before the lien is recorded by a court officer.

South Africa

Registration: Aircraft register type (question 3(b)). The registration of the aircraft will confer “legal ownership” of the aircraft on the name of the registered party as a matter of South African law. There is currently no filing allowed to recognize the rights of the true legal owner of the aircraft under the regulations of the South African Aviation Authority.

Deregistration: Third party rights to deregister (questions 4(a) and 4(b)) and Precedent of refusing to deregister (question 4(c)). The answers here reflect the bald legal and administrative position but we do not have any evidence that the South African Aviation Authority will, in practice, comply with the exercise of these rights absent a court order.

Export: Lessee/debtor cooperation (questions 5(a) and 5(b)). Whilst the exercise of these rights may be technically possible we have assumed that the non-co-operation of the Lessee will comprise a major obstacle.

Spain

Repossession: Self-help remedies (questions 1(a) and 1(b)). Pursuant to article 54(2) of the Cape Town Convention, Spain shall require leave of a court for the creditor to exercise self-help remedies, but shall not require leave of a court for an authorized party to unilaterally procure deregistration of an aircraft under Article XIII of the Aircraft Protocol. Spain has made such declaration in the instrument of accession to the Cape Town Convention, but not in the accession to the Aircraft Protocol as prescribed by art. 54(2) of the Cape Town Convention.

Deregistration: Precedent of refusing to deregister (question 4(c)). Since Cape Town Convention entered into force in Spain on 1 March 2016, there are no precedents yet on the application of the provisions the Convention or the Aircraft Protocol regarding the deregistration where the debtor has issued an irrevocable deregistration and export requests authorization substantially in the form annexed to the Aircraft Protocol and has submitted such authorization for recodification to the Spanish Civil Aviation Authority.
Switzerland

Repossession: Speed of repossession (question 1(e)). Our answer relates to proceedings up to the first instance decision being specified that if all appeals are made, judiciary proceedings may take up to several years. Please note that the duration of court proceedings is difficult to assess as there is no applicable statutory period and may vary depending in particular on the applicable canton and the complexity of the concrete case.

Repossession: Legal cost of repossession (question 1(f)). The cost of proceedings may be less than we estimated, in particular (1) in the event of repossession by an owner-lessee and/or (2) in the event of repossession by a mortgagee where the contractual situation is clear and the debtor has no ground to challenge the validity of the secured obligations and/or of the security interest.

Taiwan (Republic of China)

Registration: Aircraft register type (question 3(a)). Assumes owner is domiciled outside Taiwan. If owner domiciled in Taiwan, registration in name of owner is permitted.

Registration: Convenience of registration (question 3(c)) and Deregistration: Convenience of deregistration (question 4(d)). Checked “YES” solely because translation is required.

Export: Lessee/debtor cooperation (questions 5(a) and 5(b)) and Export licenses/permits (question 5(c)). Assumes airworthiness certificate and aviation approvals have been obtained.

Thailand

Registration: Aircraft register type (question 3(a)). While an aircraft owner can register the aircraft, the owner must have Thai nationality.

Deregistration: Third party rights to deregister (question 4(a)) and Convenience of deregistration (question 4(d)). Any party submitting a registration or deregistration application on behalf of another party must submit a notarized power of attorney document. All non-Thai supporting documents to the power of attorney must be authenticated and legalized.

Preferential Liens: Unusual or onerous preferential liens (question 7(a)). “Liens”, as a registrable or legally-recognized security interest, do not exist under Thai law. However, a third party creditor, such as an airport authority, can still have a “preferential right” over an aircraft which must be satisfied before the aircraft is permitted to be exported from Thailand.

Turkey

Registration: Aircraft register type (questions 3(a) and 3(b)). The answers are provided irrespective of enforcement of Cape Town remedies. The Turkish registry is an owner registry however there are some cases where the operator was registered as owner.

Deregistration: Convenience of deregistration (question 4(d)). Despite its established practice concerning the surrender of the original certificate, this has not been requested in recent cases.

Judgments/Arbitration: Enforceability of judgments (questions 6(a) and 6(b)). There are no reciprocal treaties with the UK or with the USA. In order for enforcement of a judgment, Turkish courts require de facto reciprocity to be proven. We are not aware of de facto reciprocity with the USA. De facto reciprocity examples we have seen for English court judgments are not aviation related.

United Kingdom

Registration: Aircraft register type (question 3(a)). There is nothing in the Air Navigation Order 2009 (SI 2009/3015) prohibiting registration of an aircraft in the name of the owner in circumstances where the aircraft is leased or chartered to another party who is the operator; however, it has become clear following discussions with the U.K. Civil Aviation Authority (“CAA”) that it would be reluctant to allow such an arrangement, strongly preferring the aircraft to registered in the name of the operator wherever possible.

Registration: Aircraft register type (question 3(b)). While there is no register to which the public have access recording or noting the identity of the legal owner, the application to register an aircraft requires the legal owner, if not the registrant, to be identified to the CAA who will keep a note of this on (private) record.
Deregistration: Third party rights to deregister (questions 4(a) and 4(b)). The U.K. has adopted the Cape Town Convention and Aircraft Protocol and an IDERA registered with the CAA will be honored provided the correct forms are submitted to the CAA. The CAA will not countersign any IDERA but will confirm acceptance of the IDERA by email or letter to the registered owner and the authorized party. If an owner-lessor requests the deregistration of an aircraft which is subject to a mortgage registered on the UK Register of Aircraft Mortgages created prior to 1 November 2015, then the mortgage must be discharged or the consent of the mortgagee must be obtained before such deregistration can occur. If a mortgage is registered on the UK Register of Aircraft Mortgages created after 1 November 2015 consent is not required prior to deregistration.

Export: Lessee/debtor cooperation (question 5(b)). A mortgagee does not need the consent of the registered owner or any other party on the CAA’s registration records in order to rely on a registered IDERA in order to be able to unilaterally request the aircraft to be deregistered and exported.

Export: Export licenses and permits (question 5(c)). An Export Certificate of Airworthiness may be required. For the purposes of the jurisdictional questionnaire, we do not consider this to constitute an export license or permit or any other restriction on the ability to export the aircraft.

Judgments/Arbitration: Enforceability of judgments (question 6(a)). While there is no automatic recognition of New York judgments under English law, where the judgment in question is an order for a sum of money, other than judgments in respect of taxes or similar charges or a fine or other penalty, common law allows the judgment creditor to sue on the judgment for payment as if it were any other debt (usually by way of summary judgment). In practice, such a process will often amount to de facto recognition and enforcement without re-examination on the merits.

Preferential Liens: Government requisition and confiscation (question 7(d)). While requisition compensation is payable in the United Kingdom in the circumstances described, the degree to which such compensation may be viewed as “reasonable” will be determined by the government.

United States

Repossession: Judicial proceedings: requirement for a deposit, bond or other security (question 1(c)). Bond/deposit with court - required for an interim order, but not for a post-judgment order.

Insolvency: Insolvency moratorium (question 2(c)). For the insolvency moratorium period, the 60 days can be extended in circumstances where the debtor has cured all defaults (other than those defaults constituted by the filing of bankruptcy proceedings).

Preferential Liens: Unusual or onerous preferential liens (questions 7(a) and 7(b)). For mechanic’s liens, New York law does provide that the lien remains attached for a 30 day period following the lienholder relinquishing possession, although it is uncertain whether its preferential status (above that of a holder of a security interest or an owner-lessor) would continue during such period.
About the Contributors

Pillsbury gratefully acknowledges and would like to thank all of the contributors in each jurisdiction listed below for dedicating their time, free of charge, to make this publication possible.

Argentina - Argüelles & Asociados

Emilio Argüelles was the founding senior partner of Argüelles & Asociados in 1985. Mr. Argüelles’ aviation practice included six years as general counsel of Argentina’s then largest private airline, Austral Líneas Aéreas, and more than 30 years of private practice representing many of the world’s leaders aircraft and engines manufacturers, aircraft lessors, banks and financial institutions, including US Eximbank and European ECAs, on most of the major aircraft transactions taken place in Argentina including operative and financing leases, purchase, sale and lease-back, securitization and cross-border operations. Also an extensive practice representing major international as well as domestic airlines on regulatory matters, operational issues, air traffic rights, bilateral air-transport agreements, airport and ground handling matters and litigation. He has worked in several jurisdictions, principally in the USA and other American and European countries. He was member of various committees on air transportation regulations in Argentina, and is currently the coordinator of the Argentine Contact Group for the Aviation Working Group with respect to the Cape Town Convention and a member of the AWG Legal Advisory Panel. Mr. Argüelles is a Fulbright Scholar, received awards from the Institute of Law of the Americas and the Ford Foundation, and was appointed Honorary Citizen of the State of Texas, USA.

Jorge A. Pezzuti joined Argüelles & Asociados as partner in 2008, after having worked as senior counsel for another major Argentine aviation legal firm since 1994. Mr. Pezzuti has represented through the years most of the principal aircraft manufacturers, lessors and international banks in transactions involving the sale, finance, refinance and transfer of both business aircraft and airliners. As Head of the Litigation Department of Argüelles & Asociados, he has contributed decisively to build the firm’s current reputation as the leading firm in this field in Argentina, through its continuing success in protecting creditor’s rights at court through the fast collection of defaulted credits and the prompt repossession of aircraft and parts, even in insolvency scenarios. He assists his partner Emilio Argüelles in the coordination of the Argentine Contact Group of the Aviation Working Group, and coordinates the joint activity with local major aviation companies and the federal authorities in matters of implementation of the Cape Town Convention.
About the Contributors

Aruba - Gomez & Coffie

Lincoln D. Gomez is a partner of Gomez & Coffie. His corporate law practice is concentrated in the areas of aircraft title, registration, and financing and leasing and related matters. He is also a guest lecturer at the Universiteit van Aruba on Aviation Registration and Aviation Finance Law. His clients and peers refer to him as “the Aruba Guy” for finding creative solutions to complex legal issues in Aruba. He authors an aircraft registration and aviation blog: www.lincolngomez.com. Lincoln holds degrees in International Tax & Financial Services from Thomas Jefferson School of Law, a law degree from the Universiteit van Aruba and undergraduate degrees in Sciences from Saint Leo University. He is past President of the Aruba Bar Association. Lincoln counseled the Government of Aruba about the adoption by the Kingdom of the Netherlands of the Cape Town Convention in 2010. He has also advised on implementation of new aviation regulations. He is a frequent speaker at global international aviation registration and finance conferences and works closely with the Registry of Aruba in creating tailor made solutions for aircraft registration in Aruba.

Australia - King & Wood Mallesons

John Canning is a partner in King & Wood Mallesons’ Sydney office where he specializes in cross border, structured finance transactions. John is recommended as a leading individual in the area of Aviation by The International Who’s Who of Aviation Lawyers and by The Best Lawyers in Australia 2015. John has been involved in the design and implementation of the Personal Property Securities Legislation (PPS) with the Attorney General’s Department and Senate Inquiries. John is now advising clients on the impact of the PPS on their business and products. In Chambers Global Guide, John was described as “one of the leading practitioners in Australia” and “well respected on the aviation side.”

Tejaswi Nimmagadda is a Registered Foreign Lawyer (England & Wales) and Counsel in the Banking and Finance department of King & Wood Mallesons’ Hong Kong office, with broad experience covering asset finance and leasing, infrastructure and project finance, corporate and leveraged finance and securitization. Tejaswi is experienced in all aspects of aircraft financing and leasing, including pre-delivery payment financing, export credit agency supported financing, operating and finance leasing, sale and leasebacks, structured financing, portfolio acquisitions and sales, EETCs and portfolio securitizations. He has regularly acted for financiers, lessors, owners, borrowers, issuers and airlines, managers and operators. In 2014-2015, Tejaswi was requested by the Australian government to assist with the implementation of the Cape Town Convention in Australia.

Austria - Binder Grösswang

Emanuel Welten joined Binder Grösswang in 2001 and was promoted to partner in 2009. He specializes in finance, restructuring, banking law and aviation law. He has advised several financing banks and lessors in relation to all aspects of aircraft financing, including the repossessing and relocation of aircraft. Emanuel studied and worked in Vienna, Paris, Brussels and New York.

Robert Wippel joined Binder Grösswang in 2014 as a senior associate from a magic circle law firm and specialises in banking and finance as well as aviation law. Robert holds a masters and a doctorate degree in law and studied in Vienna, St. Gallen and Hamburg.
**Azerbaijan - BM Morrison Partners LLC**

Delara Israfilova joined BM Morrison Partners in 2003 and is a partner of the firm as of 2013. She specializes in finance, including project financing, employment, and general corporate matters. She regularly advises foreign lenders on aircraft finance deals in Azerbaijan. Delara’s particular experience includes pioneer transactions such as representing a foreign lender negotiating the Emissions Reduction Purchase Agreement (ERPA) in Azerbaijan and its registration as a “project participant” in the Clean Development Mechanism (CDM) contemplated by the Kyoto Protocol, aircraft financing secured by local pledge, and Eurobond offerings.

Leyla Safarova joined BM Morrison Partners in 2013 as an associate. She specializes in intellectual property, including licensing and general corporate matters along with the banking and finance industry expertise. She regularly advises foreign lenders on aircraft finance deals in Azerbaijan. Recently, she advised a US export credit bank and a manufacturer on aircraft finance deals, including engine leases, involving the national air carrier in Azerbaijan.

**Bahrain - Al Salam Advocates**

Ahmed Rahmi is a partner at Al Salam Advocates. Prior to joining Al Salam Advocates, Ahmed was the Deputy General Counsel of Gulf Air. Ahmed is one of the few lawyers in Bahrain who has, in the aviation field, extensive in-house experience in addition to private practice experience. Ahmed is experienced in reviewing, negotiating and advising on aircraft sale and purchase, wet and dry leasing and all aspects of aircraft financing. Ahmed’s experience further extends to undertaking aircraft and security registration/deregistration before the Bahrain CAA; advising in relation to opening new routes/destinations for airlines; and advising on the appointment/termination of general sales agent of airlines. Ahmed is fluent in both Arabic and English.

Alaa AlQassab is a senior associate at Al Salam Advocates. Prior to joining Al Salam Advocates, Alaa was a Legal Advisor at Gulf Air. Alaa has extensive experience in advising on the opening and closure of routes and destinations for airlines; and has acted for a number of regional airlines and ground handlers in relation to dispute resolution, commercial and regulatory matters. Alaa possesses a working knowledge of passenger rights and carrier liability and has participated in several seminars and has contributed to many publications relating to these fields. Alaa qualified as a lawyer in Bahrain in 2011, and is fluent in both Arabic and English.
Bangladesh - Hossain & Khan Associates

Ali Asif Khan is one of the Managing Partners of Hossain & Khan Associates and specializes in Company Law, Merger & Acquisitions, Foreign Investment, Banking, Law of Telecommunication & Information Technology, Constitutional Law, Energy Law and Aviation Law. Mr. Khan has extensive experience in the telecommunication sector and has worked as a Legal Consultant for the Bangladesh Telecommunication Regulatory Commission (BTRC) on various Government projects. He is the lead counsel for Robi Axiata Limited, the second largest Cellular Mobile Operator in Bangladesh and he is also the Legal Advisor of Biman Bangladesh Airlines Limited, which is a state owned national carrier of Bangladesh. He has extensive experience in syndication loan financing and has acted as counsel in several loan syndication projects. He was called to the Bar of England and Wales from the Hon’ble Society of Lincoln’s Inn upon completion of the Bar Vocational Course (BVC) from the Inns of Court School of Law (ICSL), & PGDL from the City University, London, United Kingdom. Thereafter, he entered the legal profession in Bangladesh and currently practicing as an Advocate of the Hon’ble Appellate Division & High Court Division of the Supreme Court of Bangladesh.

Brazil - Cascione, Pulino, Boulos & Santos Advogados

João Paulo Servera is the Head of Cascione, Pulino, Boulos & Santos Advogados’ Aviation & Aircraft Finance department, leading a team exclusively dedicated to Aircraft Finance and General Aviation matters. He focuses his practice on asset finance, with relevant experience in aircraft financing and cross-border transactions, including foreign investment and cross border securitization. With over a decade of experience in aircraft finance transactions involving commercial aircraft, engines, general air service companies, helicopters and corporate aircraft, João assists ECAs, banks, financiers, lessors and operators in the securitization of assets in Brazil and Latin America and has extensive background and experience in aircraft-related commercial litigation, mostly involving aircraft repossession, insolvency procedures and bankruptcy. João is a member of the Aviation Working Group – AWG in Brazil and was directly involved in the implementation of the Cape Town Convention and the drafting of local laws and regulations.

British Virgin Islands - Conyers Dill & Pearman

Audrey M. Robertson is Counsel in the Corporate department of Conyers Dill & Pearman in the British Virgin Islands. Audrey’s practice covers general corporate and commercial matters with particular focus on public offerings and joint ventures. She has extensive experience in a wide variety of international asset finance and corporate transactions. Audrey has particular expertise in financings involving aircraft, including aircraft acquisitions and dispositions, sale and leasebacks and pre-delivery payment and warehouse facilities. Audrey advises leading financial institutions, leasing companies, development agencies and companies. Audrey is recognised in a number of international legal directories, including Chambers Global, Legal 500, Who’s Who Legal, Legal Media Group Experts Guide and Women in Business Law for her corporate and commercial and aviation law expertise.
Bulgaria - Boyanov & Co.

Raina Dimitrova is a partner at Boyanov & Co. and practices in the area of aircraft finance and leasing, as well as contract law, consumer protection, franchise, procurement, tourism, TMT and other regulatory regimes. Previously, Raina was a senior legal advisor at the Ministry of Trade and Tourism in Bulgaria. She has published many publications, including contributing to Aircraft Finance (Longman), and Aircraft Liens and Detention Rights (Sweet & Maxwell). Raina graduated with an M.A. in law from Sofia University St. Kliment Ohridski, Bulgaria.

Borislav Boyanov is the founding partner of Boyanov & Co. and is a “lead name in the field,” and is highly regarded for his considerable experience and expertise in Bulgarian corporate matters and wider CEE transactional matters. Sources consider him “the person to talk to for strategic advice” – Chambers Europe 2015, Corporate/Commercial. Borislav is the only Bulgarian lawyer regularly listed in Who’s Who Legal for M&A. He is a founder and Member of the Board of Directors of the British Bulgarian Business Association, a founder and Chairman of the Indian Bulgarian Business Chamber, the founder, Co-Chair and Honorary Chair of South East Europe Legal Group (SSE Legal) and the Honorary Consul for Malta in Bulgaria. He is also a member of the Sofia Bar Association and the International Bar Association. Borislav graduated with an M.A. in law from Sofia University St. Kliment Ohridski, Bulgaria and was ranked first in his class.

Canada - Blakes

Donald Gray is head of Blakes’ international aircraft finance practice based in Toronto. He advises a number of aircraft and engine lessors, financiers, manufacturers, and domestic and international airlines on aircraft finance and aviation commercial and regulatory law matters. Donald has advised on the financing or re-financing of more than 700 aircraft over the past 10 years, and he played a leading role on behalf of aircraft lessors and financiers in every significant Canadian airline bankruptcy proceeding in the last 25 years. Donald represented: GECAS in the Air Canada restructuring (Airfinance Journal Deal of the Year Award 2004) and the underwriters in Air Canada’s historic 2013 Enhanced Equipment Trust Certificate (EETC) financing of its Boeing 777 deliveries (Airfinance Journal and Airline Economics Deal of the Year Awards 2014) and the world’s first EETC fully funded on US airline terms with non-USD. Donald was a Canadian delegate to the Unidroit/ICAO sessions which prepared the Cape Town Convention and Aircraft Protocol and has served as a member of the Cape Town Convention and Aircraft Protocol and has served as a member of the Cape Town Drafting Group and Chair of the Insolvency Sub-group. Donald was a founding member of and has served as chair of the Legal Advisory Panel of the Aviation Working Group (AWG).
Cayman Islands - Walkers

James Burch is a partner in the Corporate & Finance Group in Walkers’ Cayman Islands office specializing in all aspects of structured and asset finance. James’ aviation finance experience covers aircraft portfolio securitisations and all aspects of cross-border and domestic asset financing and leasing structures, including export credit-supported financings. James is ranked as a rising star by IFLR 1000 and a recommended lawyer by Legal 500. Prior to joining Walkers, James was a partner in the structured and asset finance group of another major offshore firm and at Linklaters in London prior to that.

Paul Osborne is a senior counsel in the Corporate & Finance Group in Walkers’ Cayman Islands office. He specializes in all aspects of asset finance, with a particular focus on aviation financing. His experience covers all aspects of cross-border and domestic asset financing and leasing structures, including export credit-supported financings, including export credit-wrapped bond refinancing, pre-delivery financing, tax-driven transactions, Japanese operating lease structures, receivables backed financings, aircraft acquisitions and disposals and restructurings. Paul is ranked as a rising star by IFLR 1000 and a next generation lawyer by Legal 500. Prior to joining Walkers Paul worked in the structured and asset finance group of Freshfields Bruckhaus Deringer in London after moving from the asset finance group at Denton Wilde Sapte.

Chile - Claro & Cia

Juan León focuses on Banking & Finance, Capital Market and Bankruptcy and Restructuring. He has been professor of Business Law in Universidad Adolfo Ibáñez. He joined Claro & Cia. in 2004. Since 2016, he has been a member of Toesca Asset Management’s Board of Directors. He is admitted to practice in Chile. Languages: Spanish and English.

China (People’s Republic of) - King & Wood Mallesons

Ma Feng specializes in banking, project finance, domestic and international lending, establishment projects for financial institutions, and aircraft and equipment financing. He has advised a variety of domestic and foreign banks on banking and foreign exchange matters; and has participated in numerous loan financings, including bank financing, syndicate financing, acquisition financing, export credit and trade financing. Ma Feng has been extensively involved in project financing for numerous cross-border investments, involving natural resources and infrastructure, power plants and subways. He has also been involved in numerous financing and leasing projects for aircraft, ships, large machinery and other equipment, and has advised various domestic and international lessors, financiers and airlines on various commercial aircraft finance structures. In 2016, Ma Feng was ranked as a “Leading Individual” by Chambers Asia Pacific Guide. In 2015, he was recognized as a Rising Star in the area of Banking & Finance by Euromoney’s first Rising Stars guide published by Legal Media Group. Ma Feng joined King & Wood Mallesons in 2002. From 2007 until 2009, Ma Feng also held a position as legal adviser at a well-known foreign bank where he provided legal support for bank management personnel and all business lines in China including Global Credit Trading, Private Wealth Management, Private and Corporate Banking, and Global Transaction Banking. Ma Feng earned his LLB and LLM at the University of International Business and Economics.
Wang Ning specializes in aviation, banking and finance and debt capital markets. He has extensive experience in aircraft financing and leasing, and assists various domestic and overseas lessors, financiers and airlines in almost all types of transactions in the market, including US Ex-Im guaranteed financing, European ECA financing, French tax leasing, JOLCO leasing and Chinese bonded area leasing. Wang Ning also represents clients in business jet acquisitions and is familiar with each aspect of the purchase, importation, finance and operation of such transactions. He also assists financial institutions in asset backed securitization transactions and advises on offshore bond issuance projects. Wang Ning joined King & Wood Mallesons in November 2006. He received his bachelor’s degree in law in 2005 from the China University of Politics and Law, and received his master’s degree in internal business law in 2006 from the University of Manchester. Wang Ning was admitted to practice the law of the PRC in 2009.

Costa Rica - Aguilar Castillo Love

Marco Solano is a corporate partner in the Costa Rica office of Aguilar Castillo Love. His practice focuses on mergers and acquisitions, corporate, finance, transactional and private equity both locally and cross border. He has represented a wide range of clients, including corporations, foreign governments, private equity sponsors and investment banks. He holds an LL.M. from Georgetown University Law Center, Washington, DC. He has practiced in the offices of global law firms in Washington D.C. and New York, gaining exposure to cross-border transactions throughout the Americas. He advises clients in a diverse spectrum of sectors including: banking and financial services, pharmaceutical, retail/services, automobile, heavy construction, medical devices, technology and software among other industries.

John Aguilar Jr. is a corporate partner in the Costa Rica office of Aguilar Castillo Love. He is currently the co-managing partner of the firm. His practice focuses on corporate law, antitrust, foreign investments, mergers and acquisitions, and taxation both locally and cross-border throughout the offices in Central America. He holds an LL.M. from Harvard University Law School, Cambridge, MA. He advises clients in a diverse spectrum of sectors including: technology, renewable energies, travel and leisure, real estate, media and entertainment, among other industries.
**Cote D’ivoire - AnyRay & Partners**

Ika Raymond Any-Gbayere’s main concentration is corporate transactions in a variety of business sectors and mainly in finance, oil and gas, mining, aviation and telecommunication. With 23 years of experience, Mr. Any-Gbayere has extensive practice in legal advisory and arbitration in the West Africa region. Recent works involve representing clients such as Macquarie AirFinance, Appolo Aviation, CIT, Aviation Capital, Anadarko Petroleum Corporation, Ophir Energy and African Petroleum on PSC and Techmahindra in business acquisitions matters. Recent works also involve representing clients such as Anglo Gold Ashanti and CAT for mining finance deals, Rabobank and India Eximbank in a project finance transaction, Commerzbank for securities regulations and Societe Generale, BNP and ADM for an employee’s share plan scheme. Mr. Any-Gbayere is cited as one of the Ivory Coast’s leading corporate lawyers in Chambers and Partners and Legal 500. Mr. Any-Gbayere graduated from the University of California at Berkeley (USA) and from the University of Queen Mary in London (UK) where he received respectively a JSD and an LLM degree and a PgDip in International Commercial Arbitration. He also holds a postgraduate degree in Business law from the University of Abidjan in Cote d’Ivoire and a Certificate in English law from the London School of Economics and Political Science. He received his first law degree from the University Francois Rabelais (Tours in France) and he studied Tax Law at University of Paris I Pantheon-Sorbonne. Mr. Any-Gbayere is currently a member of the Chartered Institute of Arbitrators of London and is a lecturer at the University of Abidjan in the Ivory Coast.

Marie-Claude Koffi-Dihye has showed in the last 4 years extensive knowledge and leadership in financial transactions and regulations. She has worked on project finance deals (backed by complex guarantees), credit insurance in the field of Import-Export, mining, banking and micro-finance. She has assisted clients such as SACE (Italian Credit Insurance Institution for Export), the Bank of America and GE Capital. Ms. Koffi-Dihye has also worked on projects in the field of telecommunications for clients such as Apple, Samsung and Amazon in the OHADA space. In the last two years, she has showed progressive leadership in aviation law assisting clients such as CIT, Macquarie Airfinance and Pillsbury. Ms. Koffi-Dihye graduated from the Catholic University of Abidjan in the Ivory Coast, the Universities of Vannes and Le Havre in France, where she respectively received a Bachelor, a Master’s degree in Business Law and New Technologies, and a Graduate degree in General Theory of Law.
Croatia - Kovačević Prpić Simeunović LLC

Danijela Simeunović is one of the founding partners of Kovačević Prpić Simeunović LLC. Aviation and transport law, as well as banking and finance, are the core areas of her practice. Danijela was engaged in some of the largest transactions in the Croatian aircraft industry in the last decade. She has significant expertise in advising international financial institutions and lessors, predominantly on aircraft purchase and deliveries, leasing, financing and refinancing of aircraft and aircraft engines. She regularly represents clients before the Croatian Aviation Authority (Civil Aviation Agency) in Croatia, in particular in registration and deregistration proceedings before the Civil Aircraft Registry. She also advised airlines in regulatory matters, wet lease arrangements and legal disputes arising from their commercial contracts. She is a member of European Air Law Association (EALA), while Kovačević Prpić Simeunović LLC is one of the founding members of the Croatian Transport Law Association. Danijela has been recognised in the leading legal directories, namely, Legal 500, Chambers & Partners and IFLR1000. She is a standing court interpreter for English and German and is the firm’s main contact for clients from German speaking countries.

Curacao - Gomez & Coffie

Lincoln D. Gomez is a partner of Gomez & Coffie. His corporate law practice is concentrated in the areas of aircraft title, registration, and financing and leasing and related matters. He is also a guest lecturer at the Universiteit van Aruba on Aviation Registration and Aviation Finance Law. He authors an aircraft registration and aviation blog: www.lincolngomez.com. Lincoln holds degrees in International Tax & Financial Services from Thomas Jefferson School of Law, a law degree from the Universiteit van Aruba and undergraduate degrees in Sciences from Saint Leo University. He has also advised on implementation of new aviation regulations, including those related to the Cape Town Convention. He is a frequent speaker at global international aviation registration and finance conferences.

Czech Republic - Kocián Šolc Balaštík, Advokátní Kancelář, S.R.O.

Jiří Horník is a partner and leader of KSB’s aviation practice. Apart from graduating from Czech universities (Masaryk, Charles), he also graduated from McGill’s Institute of Air & Space Law (2001) and was an intern at the Aviation Directorate at the European Commission (2004). Jiří has built up KSB’s aviation practice, which is considered one of the few aviation practices in the Czech Republic. He has been advising local and foreign airlines on aircraft financing, repossession, regulatory and other issues and represented them in many litigation cases. Jiří is a member of the Management Committee of the European Air Law Association (EALA) and is recognized by Who’s Who Legal as leading aviation lawyer in the Czech Republic.
Petr Koblovský is a senior associate at KSB. He graduated from Yale in 2004, as well as from other leading universities (Masaryk, Charles, Goethe); he was also a visiting researcher at Harvard Law. Petr joined KSB in 2014 from a top tier international firm where he focused on banking. He has been advising clients on a wide range of domestic and cross-border financing, private equity and M&A transactions. His previous experience also includes advising on general debt and equity capital market transactions. Petr is admitted to practice in New York and in the Czech Republic and his strong knowledge of economics and finance assists him in his position as a head of the Liberal Institute and a chairman of the Institute for the Behavioral and Economic Studies.

Denmark - Gorrissen Federspiel

Morten Hans Jakobsen is a Partner and heads up the aviation department of Gorrissen Federspiel in Copenhagen, Denmark. Since 1997 he has specialised in aviation and aircraft finance and advises airlines, aircraft and engine lessors, banks and other players within the aviation sector in matters relating to, inter alia, leasing, wetleasing, charters, purchase/sale, maintenance, incidents and accidents, regulatory matters, registration, arrest and repossession, traffic rights, insurance, code-sharing, airline start-ups, insolvencies and insolvency work-outs and industry related M&A, procurement and restructurings. In addition to his aviation and aircraft finance practice, Morten advises on ship finance and other asset finance and leasing matters. Also, in 2015, Morten joined the firm’s restructuring and insolvency department and is the head of the Copenhagen department. Morten is on the management committee of the European Air Law Association and holds office as secretary of the association. He co-lectures at the annual ‘Aircraft Finance’ workshop at Leiden University’s International Institute of Air and Space Law and speaks at aviation related conferences and seminars, both nationally and internationally. Morten also contributes often to various national and international publications on aviation and finance issues. Morten is also on the Aviation Working Group’s legal advisory panel and chairs the Nordic contact group in that respect. For many years, Gorrissen Federspiel has been positioned as a leading corporate law firm in Denmark with strong and long standing international relations. Gorrissen Federspiel numbers more than 260 lawyers and has offices both in Copenhagen and Aarhus.
Dominican Republic - Raful Sicard & Polanco

Maria Esther Fernández A. de Pou is a partner at Raful Sicard & Polanco and has extended experience in the fields of aeronautics and airports. She has been for several years the Legal Counsel for Asociación de Líneas Aéreas (ALA- Airlines Association), as well as the Airports Association. She provides specialized consulting services to private sector clients in the different branches of these sectors with regard to all their legal needs in the country. She has worked for several years in the maritime, corporate (mergers and acquisitions), foreign investment and finance structuring domains, customs, tax, as well as concessions, privatizations, agreements, real estate law and dispute resolution. Throughout her professional career she has advised leading companies in these sectors in their business operations in the Dominican Republic. In addition, she has represented the Dominican Republic before the International Civil Aviation Organization (ICAO) and the Latin American Civil Aviation Commission (LACAC). She has participated in numerous national and international conferences of the subject as speaker and has been a professor at several national universities and institutions. She has made several contributions to various national and international publications and has collaborated internationally in several books on aeronautics.

Ecuador - CorralRosales

Xavier Rosales is a senior partner at CorralRosales in Ecuador. Xavier leads the aviation practice at the firm, serving the industry for over 15 years. Xavier also practices in the areas of corporate and competition law. His extensive aviation practice, business-oriented legal advice, industry-specific knowledge, and economic knowledge and understanding have been key for rendering sophisticated and tailored advice and solutions to his clients. Clients praise his ability to develop thoughtful strategies for dealing with highly complicated cases, making it seems as if dealing with the case were straight forward. Clients also highlight his availability and hands-on approach, together with his accuracy and detail-oriented style in providing legal advice. Xavier is involved in financing, regulatory and litigation aviation work. He handles all phases of the airline process to start operations, obtain route authority and keep current with its regulatory obligations to operate. Xavier is also involved in competition cases involving airlines and the aviation industry. He also represents airlines in regulatory, consumer protection and other litigation in representation of different airlines. Xavier also represents lessors, financiers and others in the sale, lease and use of aircraft.

She is an author of Chapters on Ukraine in Aircraft Finance: Registration, Security and Enforcement under general editor G. McBain since 2006, The Aviation Law Review under editor Sean Gates from 2013 and in the 11th edition of Getting the Deal Through – Air Transport 2016.
United Arab Emirates - Al Jallaf Advocates

Amna Al Jallaf, described by some as the “Queen of Aviation”, is recognized internationally as one of the Middle East’s leading Aviation Law and Islamic Finance specialists. Amna began her career as the first Emirati and Arabic speaking legal counsel at Emirates. In 1999, she founded the UAE’s first specialist aviation firm: Al Jallaf Advocates & Legal Consultants. Amna has been appointed to a number of prestigious institutions, including the Legal Advisory Panel of the AWG. She has served as a Member of the Board at the Dubai Chamber of Commerce for over 10 years and is a Member of the Board of Directors for the Awqaf and Minors Affairs Foundation. Amna holds an LL.M. from the Washington College of Law, American University, Washington DC, and is a licensed UAE Advocate. She advises on all aspects of national and international aviation law and regulations, including on both contentious and non-contentious matters. Al Jallaf Advocates & Legal Consultants is one of the UAE’s premier commercial law boutiques. Comprising a diverse team of internationally qualified lawyers, the firm advises and represents local and international clients on various litigation and commercial matters with a focus on aviation law.

Ihab Arja is an Italian attorney-at-law and expert in the aviation sector. He has been engaged in commercial and regulatory law practice for many years, with a focus on aviation. He has an extensive experience in high-profile litigation, aircraft financing and leasing, aviation regulation, aircraft accident investigations and policy & business aviation issues. During his career, he has been actively involved in a full range of legal matters arising in the aviation industry, including drafting aviation legislations, participating in major Privatization and Public–Private Partnership projects, delivering regulatory consultations & proceedings, handling general aviation and commercial issues including sale, purchase and lease of aircraft transactions, aircraft & air navigation services’ insurance and reinsurance, and other environment, security & safety issues. Ihab has addressed numerous conferences on aviation law and aircraft financing & leasing in the Middle East, Europe and Canada, and published on a variety of issues, including commercial aviation developments, environmental regulation impacting the aviation sector and the Cape Town Convention and its Aircraft Protocol. He is a member of ICAO’s Commission of Experts of the Supervisory Authority of the International Registry (CESAIR) for the purposes of the Cape Town Convention (CTC) and the Aircraft Protocol.
Debra Erni serves as the Managing Partner of Pillsbury’s London office and represents several of the world’s largest aircraft and engine leasing companies, together with financiers, airlines and certain manufacturers in connection with the sale and purchase of portfolios of new and used aviation assets, operating lease and secured debt financings, and the creation and dissolution of large scale joint venture aviation leasing platforms. Formerly resident in Japan for nearly a decade in the nineties, Debra is well-known for her ability to speak and read Japanese fluently and for her familiarity with many aspects of Japanese law and practice. Debra was also a secondee to Aercap in the formative stages of her career and is recognized in numerous directories, including Chambers UK, Asset Finance: Aviation Finance (2016-2018), Euromoney’s Expert Guides – Aviation Lawyers (2013-2018), Euromoney’s Expert Guides – Women in Business Law (2013-2018), Who’s Who Legal Transport: Aviation Finance (2016-2018) and Legal 500 Asset Finance and Leasing (2014-2018).

Graham Tyler leads Pillsbury’s Finance practice in London and co-leads the firm’s Asset Finance team globally. He is a recognized expert in aircraft finance and leasing and regularly advises his clients on aircraft procurement, portfolio acquisitions and sales, commercial debt deals including portfolio financings and warehouse facilities, pre-delivery financing, operating and finance leases, export credit financing, Islamic financing, capital markets transactions and restructurings. Graham has also worked on deals involving other assets, including ships/offshore equipment rolling stock and yellow goods. Graham is recognized in Chambers UK, Asset Finance (2015-2018) as “very experienced in the industry,” “solution-driven” and “skillful in negotiations”, and in Legal 500 UK, Asset Finance & Leasing (2014-2016) as a “leading industry figure”. Graham has also been recognized in Chambers Global, Aviation: Finance - Global-wide (2015-2018). He is listed as an aviation expert in Euromoney’s Expert Guide - Aviation Lawyers and was awarded the 2018 deal of the year by Airline Economics for his leading role and innovative work on behalf of clients Oaktree Capital and World Star Aviation.

Mark Lessard is a partner in the New York office and global head of Pillsbury’s finance practice, primarily representing clients who are active in the Aviation, Aerospace and Transportation sectors. Mr. Lessard represents a worldwide clientele of lenders, lessors, investors, operators, underwriters, liquidity providers, manufacturers, rating agencies and trustees in connection with all forms of transportation asset-backed financings. Mr. Lessard has particular experience in cross-border transactions, having placed, financed or repossessed aviation assets in dozens of jurisdictions around the world. He has been an active member of the Legal Advisory Panel to the Aviation Working Group since 2012, at the forefront of the adoption and implementation of the Cape Town Convention.
Leo T. Crowley is a partner in the New York office in the law firm’s Insolvency & Restructuring practice. He is a former leader of the firm’s Insolvency & Restructuring Practice and the Litigation Section. Mr. Crowley has extensive experience in all fora, including Federal District Court; Federal Bankruptcy Court; the United States Circuit Courts of Appeal; New York State Supreme Court; the New York State Appellate Division; New York State Court of Appeals; federal and state administrative agencies; and arbitration and mediation tribunals.

### Repossession

**Box 1**

**Self-help remedies**

(a) May an owner-lessee exercise "self-help" repossession remedies in your jurisdiction? [ ]

(b) May a mortgagee exercise "self-help" repossession remedies in your jurisdiction? [ ]

**Judicial proceedings: requirement for a deposit, bond or other security**

(c) In the event the owner-lessee or mortgagee applies for repossession order in the courts of your jurisdiction, would the owner-lessee or mortgagee typically be required to deposit a bond or other guarantee with the court? [ ]

**Taxes and fees**

(d) Are there any "significant" taxes or fees payable in your country or under the laws of your jurisdiction on repossession of the aircraft, or on applying for a court order for repossession of the aircraft? [ ]

---

**Guidance Notes**

Please note the DISCLAIMER on page 7

- Select the country from the drop-down box
- Type which jurisdiction(s) within the country your responses relate to. Include federal law if applicable
- Format: [month in words] [dd] [yyyy]
- List the full name of the firm and, if applicable, the local office completing the questionnaire

Maximum two persons, the first name being the lead lawyer completing the questionnaire.

Your responses, if presented in a brochure for general distribution to the public, will be subject to disclaimer language provided to you together with this questionnaire.

By providing us with your completed questionnaire, you consent to us reproducing and publishing a graphic of your firm’s logo in the materials presenting the results.

If any answer is “probably yes” or “probably no”, then you should answer “YES” or “NO”, respectively.

---

**Answer “YES” OR “NO”. (1) You should assume that the lease has been terminated (or that the mortgage has become enforceable). (2) "Self-help" means that the laws of your jurisdiction permit an owner-lessee (and/or mortgagee) to repossess the aircraft from an uncooperative lessee (or debtor) without the need to obtain a court order, provided that it does so peaceably, without using force or the threat of force.**

**Answer “YES” OR “NO”. If a bond or guarantee IS NOT typically required but MAY be required at the discretion of the court, the answer to this question should be “NO”. If, on the other hand, a bond or guarantee IS typically required but MAY be waived at the discretion of the court, the answer to this question should be “YES”.**

**Answer “YES” OR “NO”. An example of such a tax might include a stamp tax payable as a condition to admitting documents in evidence for the purposes of a repossession (where self-help remedies are not available). We leave it to your discretion to determine if fees are significant; however, “significant” fees or taxes would include any fees or taxes assessed on a percentage basis against the value of the aircraft or the sum secured by a mortgage, etc., but would exclude nominal fees or nominal taxes amounting to less than US$1,000 or its equivalent in the local currency.**
# 30-Minute (Check-Box) Jurisdictional Questionnaire (continued)

## Repossession (contd...)

### Box 1 (contd...)

**Speed of Repossession**

(e) In your opinion and estimation, which of the bands below provides, on the balance of probabilities, the most accurate estimate of how long it might take to obtain a court order for repossession of the aircraft, following commencement of judicial proceedings?

- (1) Less than or equal to 60 days:
- (2) in excess of 60 days, but less than or equal to 180 days:
- (3) in excess of 180 days, but less than or equal to 1 year:
- (4) in excess of 1 year:

### Legal Cost of Repossession

(f) In your opinion and estimation, which of the bands below provides, on the balance of probabilities, the most accurate estimate of the legal costs of obtaining a court order for repossession of the aircraft, following commencement of judicial proceedings?

- (1) Less than or equal to U.S.$50,000:
- (2) in excess of U.S.$50,000, but less than or equal to U.S.$250,000:
- (3) in excess of U.S.$250,000, but less than or equal to U.S.$1,000,000:
- (4) in excess of U.S.$1,000,000:

### Insolvency

#### Box 2

**Sophistication of insolvency laws**

Is the body of insolvency law in your jurisdiction:

- (a) Undeveloped, under development, or somewhat limited in its development:
- (b) Moderately or well developed:

---

**Guidance Notes**

ANSWER "YES" TO ONE OF THE FOUR BOXES, LEAVING THE REMAINDER BLANK. For the purposes of your answer, (1) you should ignore any self-help remedies that may be available as an alternative means of repossession. You should also assume that (2) the mortgagor or the owner-lessee is ultimately successful, (3) the proceedings are contested by the lessee (or an insolvency practitioner or bankruptcy trustee on its behalf), but are otherwise not contested by any competing creditor, (4) where judicial proceedings are instigated by the mortgagor, it has the cooperation of the owner/lessor, (5) there is already either an English or New York judgment or an arbitration award ordering repossession (and your answer should represent the quickest of either litigating afresh on the merits or enforcing such judgment/award), and (6) the lessee is insolvent at such time the proceedings are instituted. (7) The proceedings may either be for a preliminary (i.e. interim) or a final order, whichever represents the quickest in your jurisdiction.

ANSWER "YES" TO ONE OF THE FOUR BOXES, LEAVING THE REMAINDER BLANK. For the purposes of your answer, (1) you should ignore any self-help remedies that may be available as an alternative means of repossession. (2) The estimated legal costs should be inclusive of all court and lawyer fees incurred by the owner-lessee or mortgagor (but without deducting any amounts that represent any potential recovery of those costs). You should also assume that (3) the mortgagor or the owner-lessee is ultimately successful, (4) the proceedings are contested by the lessee (or an insolvency practitioner or bankruptcy trustee on its behalf), but are otherwise not contested by any competing creditor, (5) where judicial proceedings are instigated by the mortgagor, it has the cooperation of the owner/lessor, (6) there is already either an English or New York court judgment or an arbitration award ordering repossession (and your answer should represent the least costly of either litigating afresh on the merits or enforcing such judgment/award), and (7) the lessee is insolvent at such time the proceedings are instituted. (8) The proceedings may either be for a preliminary (i.e. interim) or a final order, whichever represents the least costly in your jurisdiction.

ANSWER "YES" TO ONE OF THE TWO BOXES, LEAVING THE OTHER ONE BLANK. (1) Your answer should be restricted to insolvency law as it relates to the rights of a mortgagor (as a creditor) and an owner-lessee (as a creditor/owner). (2) Your answer should take into account (a) the frequency, volume and history of case law and any applicable legal commentary on the subject, and (b) the sophistication of the applicable statutes.
### 30-Minute (Check-Box) Jurisdictional Questionnaire (continued)

#### Insolvency (contd...)

**Insolvency moratorium**

(c) Under the mandatorily applicable laws of your country or your jurisdiction, how long is the **period during which a moratorium may be imposed in the event of a lessee (or debtor) insolvency/bankruptcy**, thereby adversely affecting the rights of the owner-lesser (or mortgagee) to repossess the aircraft on termination of the leasing of the aircraft (or enforcement of the mortgage):

1. Less than or equal to 60 days: 
2. In excess of 60 days, but less than or equal to 180 days: 
3. In excess of 180 days, but less than or equal to 1 year: 
4. In excess of 1 year, or variable: 

(d) Does the moratorium period given in your answer in (c) above apply:

1. In all circumstances: 
2. Only in certain (or limited) circumstances: 

#### Overreaching of lessee’s insolvency estate

(e) If the lessee is put into administration, liquidation or similar bankruptcy or insolvency process, under the mandatorily applicable laws of your country or jurisdiction, will the **aircraft be deemed to be the lessee’s property and part of its bankruptcy or insolvency estate (notwithstanding that the owner-lesser is the legal owner)?**

#### Registration

**Aircraft Register Type**

(a) May an aircraft be registered in your country in the name of:

1. The aircraft operator, if the operator is not also the owner: 
2. The aircraft owner, if the owner is not also the operator: 

---

**Guidance Notes**

ANSWER "YES" TO ONE OF THE FOUR BOXES, LEAVING THE REMAINDER BLANK. For the purposes of your answer, (1) you should assume that the lessee (or debtor) entity is subject to the mandatorily applicable insolvency / bankruptcy laws of your country or jurisdiction. (2) If, in your country or jurisdiction, the full extent of the moratorium period cannot be known in advance because the law takes a variable or "ad-hoc" approach to the length of insolvency moratoria, then you should check the box "in excess of 180 days, or variable" (or the box representing the maximum limit, if there is a maximum). If, on the other hand, the law of your country or jurisdiction does provide for a definite fixed period, but that fixed period may be extended with leave of the court, you should check the box which corresponds to that fixed period, ignoring any possible discretionary extensions. (3) If, under the law of your country or jurisdiction, more than one answer may be applicable because the moratorium period may vary depending on the circumstances (e.g. whether or not the Cape Town Convention applies or some other criteria are met), then your answer should reflect the most favorable (i.e. the shortest) such time period, and you should answer question (d) below accordingly.

ANSWER "YES" TO ONE OF THE TWO BOXES, LEAVING THE OTHER ONE BLANK. You should check the "certain / limited circumstances" box if, for example, (1) your country has adopted the Cape Town Convention (and Aircraft Protocol) and has opted for a definite waiting period under "Alternative A" pursuant to Article 13 of the Cape Town Convention (and Article X of the Aircraft Protocol), but a different (longer) waiting period or moratorium applies under the laws of your country or jurisdiction where the Cape Town Convention does not apply, or (2) where the indicated moratorium period applies only to a class of lessee/debtors, such as airlines holding an air operator’s certificate (with a different (longer) moratorium applying to other persons, such as operating lessors).

ANSWER "YES" OR "NO". For the purposes of your answer, you should assume that (1) the lessee (or debtor) entity is subject to the mandatorily applicable insolvency / bankruptcy laws of your country or jurisdiction, and (2) the lease is a true operating lease.

ANSWER "YES" OR "NO" TO EACH BOX. (1) If your country allows aircraft registration either in the name of an owner (who is not also the operator) or in the name of an operator (who is not also the owner), then you should answer "YES" to both boxes. (2) This question refers to in whose name, at a minimum, the aircraft may be principally registered, NOT whether there is an option, in addition, to note the interest of a particular party on the aircraft register or on the certificate of registration. This is addressed in the question below.

---

QUESTIONNAIRE CONTINUES ON NEXT PAGE...
30-Minute (Check-Box) Jurisdictional Questionnaire
(continued)

<table>
<thead>
<tr>
<th>Registration (contd...)</th>
<th>Box 3 (contd...)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(b) May the following interests also be noted on the &quot;register&quot;:</td>
<td></td>
</tr>
<tr>
<td>(1) that of the legal owner:</td>
<td>(2) that of the mortgagee:</td>
</tr>
</tbody>
</table>

Convenience of registration

(c) With respect to registration of an aircraft, does the aircraft register/aviation authority in your country require any document to be notarized and/or authenticated before it will accept and process the registration of an aircraft, or any lease or mortgage of an aircraft?

(d) Please identify in the box below the two most popular alternative countries, if any, in which aircraft habitually based in your country are typically registered, pursuant to a delegation arrangement.

Alternative country #1:  
Alternative country #2: 

Deregistration  

Box 4

Third party rights to deregister

(a) Will the laws of your jurisdiction and/or the local practice of the aircraft register/aviation authority in your country (subject to question (c) below) honor a unilateral request by the owner-lessor to deregister the aircraft from the aircraft register, without the cooperation of the lessee?

(b) Will the laws of your jurisdiction and/or the local practice of the aircraft register/aviation authority in your country (subject to question (c) below) honor a unilateral request by the mortgagee to deregister the aircraft from the aircraft register, without the cooperation of the lessee?

Precedent of refusing to deregister

(c) Are you aware of any instances where the aircraft register/aviation authority in your country has refused to honor a request by the owner-lessor and/or the mortgagee (as applicable) to deregister the aircraft, despite being otherwise entitled to do so as indicated in your answers above?

Guidance Notes

ANSWER "YES" OR "NO". (1) "Register" means either the aircraft register, a separate government ownership/mortgage register, or on the aircraft’s certificate of registration. (2) This question speaks to additional interests that may be noted, as an option, on the register, in the event the aircraft is registered in the name of some other party. (3) If, per your answer above, the aircraft may ONLY be principally registered in the name of the owner (and not alternatively in the name of the operator), then your answer to (b)(1) should be "N/A".

ANSWER "YES" OR "NO". For the purposes of your answer, (1) "document" includes any application forms necessary for registration, any necessary consents, authorizations or supporting documents. (2) "Authenticated" includes any requirement that a document be apostilled, legalized or translated.

IN EACH BOX, EITHER SELECT A COUNTRY, OR CHOOSE "N/A". (1) If, in your experience, aircraft habitually based in your country are typically registered in another country pursuant to a delegation arrangement between your country and that other country, then you should indicate this here. (2) Such delegation arrangements typically made pursuant to a formal "83bis delegation agreement " under the Chicago Convention, but sometimes other types of bilateral arrangements exist between countries.

ANSWER "YES" OR "NO". For the purposes of your answer you should assume that: (1) the owner-lessor (or mortgagee) has repossessed the aircraft, or is seeking simultaneous repossession of the aircraft; (2) the lease has been terminated (or that the mortgage has become enforceable); (3) where any such deregistration request is made by an owner-lessor, it is with the consent of the mortgagee (if any); and (4) "cooperation of the lessee" includes a requirement that the original of the certificate of registration be surrendered. If an original of the certificate of registration is required as a condition to deregistration, the answer to this question should be "NO". (5) A request may be honored either pursuant to (A) the exercise of a deregistration power of attorney or an irrevocable deregistration and export authorisation (IDERA) granted in its favor, or (B) its status as owner-lessor (or mortgagee) of the aircraft, even without any such power or IDERA.

ANSWER "N/A" TO THIS QUESTION IF YOU ANSWERED "NO" TO BOTH QUESTIONS (a) AND (b) ABOVE. OTHERWISE ANSWER "YES" OR "NO" TO THIS QUESTION. (1) This question relates to questions (a) and/or (b) above only to the extent you answered "YES" to those questions. (2) Despite being otherwise entitled to do so means that the owner-lessor (or mortgagee), in submitting the deregistration request, has complied with the local law and the paperwork required for deregistration is otherwise in order.

QUESTIONNAIRE CONTINUES ON NEXT PAGE...
### 30-Minute (Check-Box) Jurisdictional Questionnaire

**Deregistration (contd...)**

<table>
<thead>
<tr>
<th>Convenience of deregistration</th>
<th>Box 4 (contd...)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(d) With respect to <strong>deregistration</strong> of an aircraft, does the aircraft register/aviation authority in your country require any document to be <strong>notarized and/or authenticated</strong> before it will accept and process the deregistration of an aircraft?</td>
<td>☐</td>
</tr>
</tbody>
</table>

**Export**

<table>
<thead>
<tr>
<th>Lessee/debtor cooperation</th>
<th>Box 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) May an owner-lessor (with the consent of the mortgagee, if any) unilaterally export the aircraft from your country without the cooperation of the lessee?</td>
<td>☐</td>
</tr>
<tr>
<td>(b) May a mortgagee unilaterally export the aircraft from your country without the cooperation of the owner or the lessee?</td>
<td>☐</td>
</tr>
</tbody>
</table>

**Export licenses / permits**

| (c) Is any **export license or permit** required or are there any other restrictions on the ability of an owner-lessor or mortgagee to export the aircraft from your country? | ☐ |

**Taxes and fees**

| (d) Are there any “significant” **taxes or fees** payable in your country or under the laws of your jurisdiction on export of the aircraft from your country? | ☐ |

**Judgments / Arbitration**

<table>
<thead>
<tr>
<th>Enforceability of judgments</th>
<th>Box 6</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Subject to certain permitted threshold conditions being met, will the courts of your jurisdiction <strong>recognize and enforce a judgment rendered by a New York state</strong> or U.S. federal court sitting in New York without the case being re-examined on its merits?</td>
<td>☐</td>
</tr>
<tr>
<td>(b) Subject to certain permitted threshold conditions being met, will the courts of your jurisdiction <strong>recognize and enforce a judgment rendered by an English court</strong>, without the case being re-examined on its merits?</td>
<td>☐</td>
</tr>
</tbody>
</table>

**Guidance Notes**

- **ANSWER “YES” OR “NO”.** For the purposes of your answer, (1) "document" includes any application forms necessary for registration, any necessary consents, authorizations or supporting documents. (2) "Authenticated" includes any requirement that a document be apostilled, legalized or translated.

- **ANSWER “YES” OR “NO”.** For the purposes of your answer, you should assume that: (1) the owner-lessor (or mortgagee) has repossessed and deregistered the aircraft, or is seeking simultaneous repossession and deregistration of the aircraft, (2) the leasing has terminated (or the mortgage has become enforceable), and (3) the owner-lessor (or mortgagee) has an export power of attorney granted in its favor, but that the lessee (or debtor) is insolvent and uncooperative at the time the owner-lessor (or mortgagee) is seeking to export the aircraft from your country.

- **ANSWER “YES” OR “NO”.** For the purposes of your answer, you should disregard any restrictions relating to the export of goods to countries subject to sanctions or with respect to classified or military equipment installed on the aircraft.

- **ANSWER “YES” OR “NO”.** We leave it to your discretion to determine if fees are significant; however, “significant” fees or taxes would include any fees or taxes assessed on a percentage basis against the value of the aircraft or the sum secured by a mortgage, etc., but would exclude nominal fees or nominal taxes amounting to less than US$1,000 or its equivalent in the local currency.

- **ANSWER “YES” OR “NO”.** If enforcement of a judgment rendered by a New York or English court (as applicable) would be subject to the satisfaction of one or more of the threshold conditions **ENUMERATED ON THE NEXT PAGE**, but would not be subject to any other conditions, then the answer to this question should be “YES”, if enforcement would be subject to the satisfaction of a threshold condition that is NOT included in the list of threshold conditions set out on the next page, then the answer to this question should be “NO”. For the purposes of your answer, you should assume that "enforcement" means the enforcement of money awards only (and not injunctive or any other type of non-monetary relief).
### Guidance Notes (permitted threshold conditions for enforcement of judgments)

Permitted threshold conditions (for questions (a) and (b) on previous page relating to BOX 5 on Judgments/Arbitration):

1. The court rendering the judgment must have had jurisdiction over the defendant and has obtained such jurisdiction in a way that is compatible with the laws of your jurisdiction; (2) the judgment of the rendering court must be final and conclusive and not subject to appeal; (3) the judgment must have been given on the merits of the case; (4) the judgment must not have been obtained by fraud; (5) the judgment must not be incompatible with the public policy of your jurisdiction; (6) the judgment must not contradict another judgment rendered by a court in your jurisdiction; and (7) in the case of a judgment rendered by an English court and if your country is a sister EU member state, any of the conditions or exceptions permitted by the “recast” Brussels Regulation (Council Regulation (EU) 1215/2012).

A requirement for reciprocity of recognition/enforcement by a New York or English court (as applicable) is NOT a permitted threshold condition, unless it can be said with reasonable certainty that on a general basis (rather than on a case by case basis) such reciprocity requirement will be satisfied with respect to any such New York or English court judgment (because, for example, a reciprocal enforcement treaty exists).

### Judgments / Arb. (contd…)

**Enforceability of arbitral awards**

<table>
<thead>
<tr>
<th>Box 6 (contd…)</th>
<th>Guidance Notes</th>
</tr>
</thead>
</table>
| (c) Has your country adopted the 1958 Convention on the Recognition and Enforcement of Foreign Arbitral Awards (the New York Convention) and, if so, will the courts of your jurisdiction recognize and enforce a decision of an arbitrator? | **Guidance Notes**

**Answer “yes” or “no” for the purposes of your answer, you may assume that a court in your jurisdiction would be entitled to refuse enforcement of the arbitral award based on one of the exceptions and carve-outs enumerated in the New York Convention.**

### Preferential Liens

#### Unusual or onerous preferential liens

<table>
<thead>
<tr>
<th>Box 7</th>
<th>Guidance Notes</th>
</tr>
</thead>
</table>
| (a) Do the laws of your jurisdiction provide for any non-consensual preferential non-possessory liens over aircraft that could arise in favor a repairer/mechanic or a landlord/hangar-keeper? | **Guidance Notes**

**Answer “yes” or “no” to all questions in this box.**

1. A “preferential” lien means a lien that would take priority over the owner/lessor’s ownership and/or a mortgagee’s secured creditor rights in the aircraft. (2) A “fleet-wide” lien means a lien that has arisen as a result of unpaid amounts attributable to a particular aircraft in an operator’s fleet, but has attached or is capable of attaching to any other aircraft in that operator’s fleet (i.e., any other aircraft operated by that operator), regardless of the fact that the owners of such aircraft may be different. (3) For the purposes of question (b) only, examples of third party non-consensual preferential liens include: (A) liens in favor of a repairer or mechanic, (B) liens in favor of an airport authority for unpaid navigation, landing or similar charges, (C) liens in favor of a landlord (hangar-keeper) for unpaid rent, (D) liens in favor of the government or a government agency, (E) liens for unpaid taxes and customs duties, violation of sanctions, drug-trafficking laws or other criminal activities, (F) liens in favor of a person who has provided salvage services with respect to the aircraft, and (F) liens in favor of crew or employees of the airline or operator of the aircraft, with respect to unpaid sums owed to them. An example of such lien might include a non-consensual preferential lien over the aircraft arising by operation of law in favor of a lessee in circumstances where the lessee has a valid counterclaim against the owner-lessee. |
30-Minute (Check-Box) Jurisdictional Questionnaire
(continued)

**Guidance Notes**

**Government requisition and confiscation**

(d) Do the laws of your jurisdiction permit the government to requisition or confiscate an aircraft without needing to pay the owner reasonable compensation?

ANSWER “YES” OR “NO”. For the purposes of your answer, you should disregard government requisition or confiscation of the aircraft in circumstances where there has been a violation of any drug-trafficking laws or other criminal offenses.

END OF QUESTIONNAIRE - SEE BELOW FOR NOTES AND DISCLAIMERS

<table>
<thead>
<tr>
<th>Notes / Comments (if any)</th>
<th>Box 8</th>
</tr>

<tbody>
<tr>
<td>Box and Question number:</td>
<td>Note / Comment (below represents the maximum permitted space):</td>
</tr>
</tbody>
</table>

**DISCLAIMERS**

To the extent that this Jurisdictional Questionnaire has been fully or partially completed and has been published or has otherwise been provided to any person other than the person(s) who completed it (as indicated on page 1), the following disclaimers should be noted:

(1) The Jurisdictional Questionnaire contained in this publication has not been completed by Pillsbury Winthrop Shaw Pittman LLP (“PWSP”) unless otherwise stated, but has instead been completed by the law firm and the person(s) indicated on page 1.

(2) This publication is issued periodically to keep PWSP clients and other interested parties informed of current legal developments that may affect or otherwise be of interest to them. The comments contained herein do not constitute legal opinion of either PWSP or any other law firm identified in this publication and should not be regarded as a substitute for legal advice.

(3) The questions and responses contained in this Jurisdictional Questionnaire provide an estimate and preliminary indication only as to the likelihood of success, cost and speed of repossessing, deregistering, exporting, etc. an aircraft from the country and jurisdiction(s) indicated, based on information received from reputable local attorneys in such country and/or jurisdiction as of the date indicated. The actual likelihood of success for any specific case may differ, depending on a more detailed analysis of the particular facts. In such circumstances specific and up-to-date legal and other professional advice in the relevant jurisdiction(s) should be sought. Furthermore, the questions and responses contained in this Jurisdictional Questionnaire do not represent an exhaustive analysis of all legal issues in the country and/or jurisdiction(s) indicated relevant to financing and leasing of aircraft in such country and/or jurisdiction. There may be other relevant issues not addressed herein and further legal and other professional advice in the relevant jurisdiction(s) should be sought.
